Monakov, 2001      **The Future Of The Soviet Navy** Bruce W. Watson, Peter M Dunn, 2020-01-28 The efforts of the Soviet Union since the mid 1950s to develop naval power have produced one of the strongest navies in the world but this achievement has not been without serious costs The construction of increasingly complex submarines ships and aircraft has required greater investment of resources and manpower This volume addresses whether the Soviet Union will continue naval expansion and what directions technological development will take in the future In particular the contributors consider trends in submarine aircraft carrier and surface combatant

systems and examine what implications these developments have for U S defense planning over the next two decades

**Soviet Naval Operational Art: The Soviet Approach to Naval War Fighting** Dr. Russel H. S. Stolfi, 2015-11-06 A category of military art called naval operational art exists in the Soviet Union For the Soviets the art is the scientific skill of planning and conducting the interlinked engagements strikes and maneuvers that comprise the modern naval operation The Soviets exercise naval operational art according to principles of the art which the Soviets emphasize with a stiff formalism that can be exploited by the West This study describes the art and its style and suggests Soviet naval war fighting scenarios based on the application of the principle of naval operational art
