Soviet Submarines:

Soviet Cold War Attack Submarines Edward Hampshire, 2020-09-17 In this highly detailed book naval historian Edward Hampshire reveals the fascinating history of the nuclear powered attack submarines built and operated by the Soviet Union in the Cold War including each class of these formidable craft as they developed throughout the Cold War period The November class which were the Soviet Union's first nuclear submarines had originally been designed to fire a single enormous nuclear tipped torpedo but were eventually completed as boats firing standard torpedoes The Alfa class were perhaps the most remarkable submarines of the Cold War titanium hulled which was light and strong but extremely expensive and difficult to weld successfully crewed with only thirty men due to considerable automation and 30% faster than any US submarines they used a radical liquid lead bismuth alloy in the reactor plant The Victor class formed the backbone of the Soviet nuclear submarine fleet in the 1970s and 1980s as hunter killer submarines began to focus on tracking and potentially destroying NATO ballistic missile submarines The Sierra classes were further titanium hulled submarines and the single Mike class submarine was an experimental type containing a number of innovations Finally the Akula class were being constructed as the Cold War ended and these boats form the mainstay of the Russian nuclear attack submarine fleet today This book explores the design development and deployment of each of these classes in detail offering an unparalleled insight into the submarines which served the Soviet Union throughout the Cold War period The text is supported by stunning illustrations photographs and diagrams of the submarines

Stalin's Ocean-going Fleet: Soviet Jurgen Rohwer, 2017-07-05 In this work two senior naval historians analyze the discussions held in leading Soviet political military and naval circles concerning naval strategy and the decisions taken for warship building programmes They describe the reconstitution of the fleet under difficult conditions from the end of the Civil War up to the mid 1920s leading to a change from classical naval strategy to a Jeune ecole model in the first two Five Year Plans including efforts to obtain foreign assistance in the design of warships and submarines Their aim is to explain the reasons for the sudden change in 1935 to begin building a big ocean going fleet After a period of co operation with Germany from 1939-41 the plans came to a halt when Hitler attacked the Soviet Union in 1941 Finally this work covers the reopening of the naval planning processes in 1944 and 1945 and the discussions of the naval leadership with Stalin the party and government officials about the direction of the new building programmes as the Cold War began

Red Star Rogue Kenneth Sewell, Clint Richmond, 2006-09-26 The Hunt for Red October meets Blind Man's Bluff in this chilling true story of a rogue Soviet submarine that sank while trying to provoke a war between the U S and China

Cold War Submarines Norman Polmar, Kenneth J. Moore, 2004 Submarines had a vital if often unheralded role in the superpower navies during the Cold War Their crews carried out intelligence collection operations sought out and stood ready to destroy opposing submarines and from the early 1960s threatened missile attacks on their adversary's homeland providing in many respects the most survivable nuclear deterrent of the Cold War For both

East and West the modern submarine originated in German U boat designs obtained at the end of World War II Although enjoying a similar technology base by the 1990s the superpowers had created submarine fleets of radically different designs and capabilities Written in collaboration with the former Soviet submarine design bureaus Norman Polmar and K J Moore authoritatively demonstrate in this landmark study how differing submarine missions antisubmarine priorities levels of technical competence and approaches to submarine design organizations and management caused the divergence *The Secret War Against Sweden* Ola Tunander,2004 Ola Tunander s revelations make it clear that the United States and Britain ran a secret war in Swedish waters Stalin's Ocean-going Fleet Mikhail Monakov,Jurgen Rohwer,2012-11-12 A study of the development of strategic concepts in Stalin s Navy in the context of his foreign defence policy using original archival documents translated from the Russian Decommissioned Russian Nuclear Submarines and International Cooperation Charles Krupnick,2017-07-06 With the end of the Cold War Russia s submarines were no longer needed to deter or fight Western navies and were very expensive to operate and maintain Older submarines were taken out of service in large numbers but without firm plans and infrastructure in place to remove and adequately care for their nuclear components problems soon developed over the disposition of spent fuel assemblies Problems arose also of course between Russia and the international community as to the best way to respond to the challenge This book looks at those problems first discussing Russia s economy its environment and the Russian Navy and then covering in detail the spent fuel of Russian submarines and related nuclear problems The engagement of the international community on the issue is then addressed A theoretical analysis is offered on how Russia s fellow nations can help remedy a troubling environmental problem in a difficult country *Submarines at War 1939-45* Richard Compton-Hall,Richard Compton-Hall, MBE, RN,2004-04 This volume provides Compton Hall s pictorial history of submarine warfare in World War II **Russian Subs** Amelia Khatri,2025-01-05 Russian Subs presents a comprehensive exploration of how submarine warfare has fundamentally shaped Russia s naval power and global military dynamics since World War II The book masterfully weaves together the technological evolution of Russian submarines from early diesel electric models to modern nuclear powered vessels with the strategic doctrine that guided their development and deployment Through declassified documents technical specifications and firsthand accounts from submarine commanders readers gain unprecedented insight into how Russia s undersea forces have influenced international relations and maritime security The narrative challenges conventional wisdom by demonstrating that Russian submarine development follows a consistent strategic vision rather than merely reacting to Western capabilities Key technological milestones such as the revolutionary titanium hull design of the Alpha class submarines and the development of the modern Borei class nuclear deterrent vessels illustrate Russia s commitment to underwater supremacy The book s systematic analysis of submarine warfare s evolution reveals how these naval assets have become crucial tools in diplomatic negotiations and regional security arrangements Structured chronologically and thematically the work bridges military

technology international relations and maritime law while remaining accessible to non specialists The author s careful balance of technical detail and strategic analysis makes this an invaluable resource for military historians defense analysts and policy makers while still engaging general readers interested in naval history By examining submarine capabilities influence on diplomatic and military power the book provides essential context for understanding current maritime security challenges

Red November W. Craig Reed,2010-05-04 Red November delivers the real life feel and fears of submariners who risked their lives to keep the peace Steve Berry author of The Paris Vendetta W Craig Reed a former navy diver and fast attack submariner provides a riveting portrayal of the secret underwater struggle between the US and the USSR in Red November A spellbinding true life adventure in the bestselling tradition of Blind Man s Bluff it reveals previously undisclosed details about the most dangerous daring and decorated missions of the Cold War earning raves from New York Times bestselling authors David Morrell who calls it palpably gripping and James Rollins who says If Tom Clancy had turned The Hunt for Red October into a nonfiction thriller Red November might be the result

Submarine Operational Effectiveness in the 20th Century Captain John F. O'Connell, USN (RET.),2011-08-18 The submarine emerged as a serious weapons system during the First World War 1914 1918 During that conflict Germany with its unrestricted submarine warfare campaign of 1917 nearly drove Great Britain to the negotiating table Its U boats sank 6 196 ships of 13 438 632 gross register tons Despite post war attempts to ban the submarine from warfare it survived Both Italy and Germany used submarines covertly during the Spanish Civil War 1936 1939 This book Part Two of a series discusses the use of submarines during World War Two 1939 1945 and their effectiveness It focuses principally on two strategic submarine campaigns The first is about German U boats against British and neutral commerce That campaign finally failed during the Battle of The Atlantic in 1943 The second deals with American submarines against Japanese shipping from Southeast Asia to the home islands a campaign that successfully isolated Japan from its sources of raw materials and foodstuffs during 1944 and effectively defeated Japan

Soviet Cruise Missile Submarines of the Cold War Edward Hampshire,2018-07-26 The Soviet Union s cruise missile submarines from the modified Whiskey to the Oscar II classes were among the most formidable vessels of the Cold War They were initially designed to carry land attack nuclear tipped cruise missiles designed to strike targets on the eastern coast of the United States By the late 1960s however submarine launched ballistic missiles made the nuclear land attack mission unnecessary so existing classes were converted to the carrier killer role armed with anti ship cruise missiles designed to destroy US super carriers and other important naval targets This fully illustrated study examines these powerful machines that were some of the largest and fastest submarines ever built If war had broken out they would have been at the forefront of the Soviet Navy s campaign to destroy NATO s sea power and cut America s sea link with Europe

Birkeland,2025-07-17 This book offers a comprehensive examination of historical Norwegian and allied airborne maritime surveillance operations in the North Atlantic after World War II until the present Russia s resurgent naval and submarine activity in the High North needs to be closely observed Norway together with her closest allies have monitored such activity in the High North since the end of World War II One of the key instruments in that effort has been Maritime Patrol Aircraft MPA with their Anti Submarine Warfare ASW capabilities However after the Cold War in many nations an atrophy took place within the MPA communities of knowledge resources and experience with airborne ASW This occurred just as the concept of intelligence surveillance and reconnaissance ISR came to play an increasingly important role in modern warfare but without sufficient attention being paid to the specific challenges of maritime airborne surveillance and reconnaissance This book addresses that gap and examines the entwined evolution of airborne maritime surveillance by MPA

and ASW in the High North both during and after the Cold War with the main focus being on Norway The discussion identifies the fundamental building blocks of these historical surveillance operations through a portrayal of the development of airborne surveillance and reconnaissance operations These building blocks are then applied to make recommendations for the future for maritime surveillance in the High North This book will be of much interest to students of naval history strategic studies intelligence studies Nordic studies and International Relations
