variants and specially marked colloquial uses **The Sow's Ear Café** Holly Quan, 2018-02-20 In her late 30s Lucie Tanguay is a self-reliant lippy livewire when her high-pressure upscale Vancouver life suddenly and shockingly unravels. With help from one of her few trusted friends, Lucie gets out of town and starts looking for what she doesn't know. Car trouble maroons her in the small town of Sweetgrass, Alberta, where she takes a temporary job in a local café. She begins soaking in the natural beauty and drama of her surroundings and comes to form close bonds with people in town. Sweetgrass becomes as much a state of mind for Lucie as a place she just might want to call home. She falls in love in a brand-new way, her world view utterly altered. Then a series of frightening events causes another seismic shift in Lucie's life, thrusting her into danger and suspicion, a terrifying situation in which she must learn to balance her long-held toughness with her newfound faith in love. A lyrical contemporary romantic drama, *The Sow's Ear Café* tracks one woman's path to healing through spectacular landscape, friends, and love.

Wordsworth Dictionary of Phrase and Fable Ebenezer Cobham Brewer, 2001 This work explains the origins of the familiar and the unfamiliar in everyday speech and literature, including the colloquial and the proverbial. It embraces archaeology, history, religion, the arts, science, mythology, and characters from fiction. Quality Research in Literacy and Science Education Mack C. Shelley, Larry D. Yore, Brian B. Hand, 2008-12-30 Statistical models attempt to describe and quantify relationships between variables. In the models presented in this chapter, there is a response variable, sometimes called dependent variable, and at least one predictor variable, sometimes called independent or explanatory variable. When investigating a possible cause-and-effect type of relationship, the response variable is the putative effect, and the predictors are the hypothesized causes. Typically, there is a main predictor variable of interest; other predictors in the model are called covariates. Unknown covariates or other independent variables not controlled in an experiment or analysis can affect the dependent or outcome variable and mislead the conclusions made from the inquiry. Bock Velleman given the model p is the probability that a relationship is seen by mere chance. The smaller the p value, the more confident we can be that the pattern seen in the data is not random. In the type of models examined here, the R measures the proportion of the variation in the response variable that is explained by the predictors specified in the model. If R is close to 1, then almost all the variation in the response variable has been explained. This measure is also known as the multiple correlation coefficient. Statistical studies can be grouped into two types: experimental and observational.

Phraseology Sylviane Granger, Fanny Meunier, 2008 Long regarded as a peripheral issue, phraseology is now taking centre stage in a wide range of fields. This recent explosion of interest undoubtedly has a great deal to do with the development of corpus linguistics research, which has both demonstrated the key role of phraseological expressions in language and provided researchers with automated methods of extraction and analysis. The aim of this volume is to take stock of current research in phraseology from a variety of perspectives: theoretical, descriptive, contrastive, cultural, lexicographic, and computational. It contains overview chapters by leading experts in the field and a series of case studies focusing on a wide range of multiword units: collocations, similes,

idioms routine formulae and recurrent phrases The volume is an invitation for experienced phraseologists to look at the field with different eyes and a useful introduction for the many researchers who are intrigued by phraseology but need help in finding their way in this rich but complex domain
