**A Bibliography of Adult Aerospace Books and Materials** National Aviation Education Council,1961    **The Mathematical Foundation of Multi-Space Learning Theory** Tai Wang,Mengsiying Li,2024-03-12 This book explores the measurement of learning effectiveness and the optimization of knowledge retention by modeling the learning process and building the mathematical foundation of multi space learning theory Multi space learning is defined in this book as a micro process of human learning that can take place in more than one space with the goal of effective learning and knowledge retention This book models the learning process as a temporal

sequence of concept learning drawing on established principles and empirical evidence It also introduces the matroid to strengthen the mathematical foundation of multi space learning theory and applies the theory to vocabulary and mathematics learning respectively The results show that for vocabulary learning the method can be used to estimate the effectiveness of a single learning strategy to detect the mutual interference that might exist between learning strategies and to predict the optimal combination of strategies In mathematical learning it was found that timing is crucial in both first learning and second learning in scheduling optimization to maximize the intersection effective interval The title will be of interest to researchers and students in a wide range of areas including educational technology learning sciences mathematical applications and mathematical psychology    [Foreign-language and English Dictionaries in the Physical Sciences and Engineering](#) Tibor W. Rasiah Loganathanra,Günther Palm,Moonis Ali,2000-06-07 The focus of the papers presented in these proceedings is on employing various methodologies and approaches for solving real life problems Although the mechanisms that the human brain employs to solve problems are not yet completely known we do have good insight into the functional processing performed by the human mind On the basis of the understanding of these natural processes scientists in the field of applied intelligence have developed multiple types of artificial processes and have employed them successfully in solving real life problems The types of approaches used to solve problems are dependant on both the nature of the problem and the expected outcome While knowledge based systems are useful for solving problems in well understood domains with relatively stable environments the approach may fail when the domain knowledge is either not very well understood or changing rapidly The techniques of data discovery through data mining will help to alleviate some problems faced by knowledge based approaches to solving problems in such domains Research and development in the area of artificial intelligence are influenced by opportunity needs and the availability of resources The rapid advancement of Internet technology and the trend of increasing bandwidths provide an opportunity and a need for intelligent information processing thus creating an excellent opportunity for agent based computations and learning Over 40% of the papers appearing in the conference proceedings focus on the area of machine learning and intelligent agents clear evidence of growing interest in this area    *Understanding and Using Q Replication for High Availability Solutions on the IBM z/OS Platform* Cecile Madsen,Chuck Ballard,Jason Arnold,Rich Briddell,Heverson Campelo,Jayanti Mahapatra,Eduardo Pingarilho,IBM Redbooks,2014-02-11 With ever increasing
