Someone Else's Face in the Mirror Carla Bluhm,Nathan Clendenin,2009-04-30 In 2005 surgeons in France removed part of the face from a cadaver and grafted it onto the head of a 38 year old woman grossly disfigured by a dog attack Three years later in December 2008 surgeons at the Cleveland Clinic announced they had performed the first U S face transplant Although modern culture is accustomed to pushing medicine and the human body beyond all limits the world's first partial face transplant and the seven that have followed have caused a stir that still reverberates globally This book begins with the story of Isabelle Dinoire the recipient of the first face transplant and chronicles her surgery and battles with tissue rejection Its scope widens with a look at how surgical teams including three U S transplant teams are in a global race to perform the first full face transplant and at how medical history has led up to this point with prior successful transplants ranging from body parts as simple as cornea to those as neurologically complicated as the heart a hand and a penis The most novel among these surgeries the face transplant conjures up particular and expansive psychological issues Authors Bluhm and Clendenin show how transplant recipients struggle with functional issues including a lifetime of anti rejection drugs a danger highlighted by the recent death of the second face transplant patient in China But just as challenging in the case of face transplant is the psychological effect on and potential threat to identity Who are you if suddenly your face or a significant portion of it is not what you were born with What is it like to look in the mirror and see a face that is not the one you have always had Dinoire lamented It will never be me That statement is an absolute simplification of the identity issues a face transplant can create explain the authors Bluhm and Clendenin show how across history and media humankind via medicine literature film and other media has dreamed of a day when face transplants would be possible With so many disfigurements occurring among the military in Iraq and experimental face transplants too expensive for implementation in the private sector it is likely that the U S military will take the reins and further face transplant techniques as quickly as possible to serve injured personnel

When Tengu Talk Wilburn N. Hansen,2008-09-30 Hirata Atsutane 1776 1843 has been the subject of numerous studies that focus on his importance to nationalist politics and Japanese intellectual and social history Although well known as an ideologue of Japanese National Learning Kokugaku Atsutane s significance as a religious thinker has been largely overlooked His prolific writings on supernatural subjects have never been thoroughly analyzed in English until now In When Tengu Talk Wilburn Hansen focuses on Senkyo ibun 1822 a voluminous work centering on Atsutane s interviews with a fourteen year old Edo street urchin named Kozo Torakichi who claimed to be an apprentice tengu a supernatural creature of Japanese folklore Hansen uncovers in detail how Atsutane employed a deliberate method of ethnographic inquiry that worked to manipulate and stimulate Torakichi s surreal descriptions of everyday existence in a supernatural realm what Atsutane

termed the Other World Hansen's investigation and analysis of the process begins with the hypothesis that Atsutane's project was an early attempt at ethnographic research a new methodological approach in nineteenth century Japan Hansen posits that this scientific analysis was tainted by Atsutane's desire to establish a discourse on Japan not limited by what he considered to be the unsatisfactory results of established Japanese philological methods A rough sketch of the milieu of 1820s Edo Japan and Atsutane's position within it provides the backdrop against which the drama of Senkyoibun unfolds There follow chapters explaining the relationship between the implied author and the outside narrator the Other World that Atsutane helped Torakichi describe and Atsutane's nativist discourse concerning Torakichi's fantastic claims of a newly discovered Shinto holy man called the sanjin Sanjin were partly defined by supernatural abilities similar but ultimately more effective and thus superior to those of the Buddhist bodhisattva and the Daoist immortal They were seen as holders of secret and powerful technologies previously thought to have come from or been perfected in the West such as geography astronomy and military technology Atsutane sought to deemphasize the impact of Western technology by claiming these powers had come from Japan's Other World In doing so he creates a new Shinto hero and by association asserts the superiority of native Japanese tradition In the final portion of his book Hansen addresses Atsutane's contribution to the construction of modern Japanese identity By the late Tokugawa many intellectuals had grown uncomfortable with continued cultural dependence on Neo Confucianism and the Buddhist establishment was under fire from positivist historiographers who had begun to question the many contradictions found in Buddhist texts With these traditional discourses in disarray and Western rationalism and materialism gaining public acceptance Hansen depicts Atsutane's creation of a new spiritual identity for the Japanese people as one creative response to the pressures of modernity When Tengu Talk adds to the small body of work in English on National Learning It moreover fills a void in the area of historical religious studies which is dominated by studies of Buddhist monks and priests by offering a glimpse of a Shinto religious figure Finally it counters the image of Atsutane as a forerunner of the ultra nationalism that ultimately was deployed in the service of empire Lucid and accessible it will find an appreciative audience among scholars of Shinto and Japanese and world religion In addition to religion specialists it will be of considerable interest to anthropologists and historians of Japan
