## **Space For Women A History Of Women With The Right Stuff:**

**Space for Women** Pamela Freni, 2002 A history of women who were recruited as potential astronauts early in the space race and their attempt to be the first females in space It tells of their success in the rigorous testing and training and then the ensuing resistance by the male dominated space program The book offers information on ensuing NASA programs culminating with the successful integration of women in today's space program Integrating Women Into the Astronaut Corps Amy E. Foster, 2011-12 Why Amy E Foster asks did it take two decades after the Soviet Union launched its first female cosmonaut for the United States to send its first female astronaut into space In answering this question Foster recounts the complicated history of integrating women into NASA's astronaut corps NASA selected its first six female astronauts in 1978 Foster examines the political technological and cultural challenges that the agency had to overcome to usher in this new era in spaceflight She shows how NASA had long developed progressive hiring policies but was limited in executing them by a national agenda to beat the Soviets to the moon budget constraints and cultural ideas about women's roles in America Lively writing and compelling stories including personal interviews with America's first women astronauts propel Foster's account Through extensive archival research Foster also examines NASA's directives about sexual discrimination the technological issues in integrating women into the corps and the popular media's discussion of women in space Foster puts together a truly original study of the experiences not only of early women astronauts but also of the managers and engineers who helped launch them into space In documenting these events Foster offers a broader understanding of the difficulties in sexually integrating any workplace even when the organization approaches the situation with as positive an outlook and as strong a motivation as did NASA **Almost Astronauts** Tanya Lee Stone, 2011-09-27 They had the right stuff They defied the prejudices of the time And they blazed a trail for generations of women to follow What does it take to be an astronaut Excellence at flying courage intelligence resistance to stress top physical shape any checklist would include these But when America created NASA in 1958 there was another unspoken rule you had to be a man Here is the tale of thirteen women who proved that they were not only as tough as the toughest man but also brave enough to challenge the government They were blocked by prejudice jealousy and the scrawled note of one of the most powerful men in Washington But even though the Mercury 13 women did not make it into space they did not lose for their example empowered young women to take their place in the sky piloting jets and commanding space capsules ALMOST ASTRONAUTS is the story of thirteen true pioneers of the space age Back matter includes an author's note an appendix further reading a bibliography sources source notes and an index Critical issues in the history of spaceflight Steven J. Maher, 2017-03-27 In summer 1969 astronauts landed on the moon and hippie hordes descended on Woodstock two era defining events that are not entirely coincidental Neil M Maher shows how NASA's celestial aspirations were tethered to terrestrial concerns of the time the civil rights struggle the antiwar movement environmentalism feminism and the culture wars **Signal**, 2002 New Boundaries in Political Science Fiction Donald M. Hassler, Clyde Wilcox, 2008 This book offers an interpretation of the evolution of a growing genre in literary film and television As a follow up to their 1997 collection Political Science Fiction Hassler and Wilcox have assembled twenty four noted international scholars representing diverse fields of inquiry to assess the influential voices and trends from the past decade in New Boundaries in Political Science Fiction The terrors and technologies that permeate our daily lives have changed radically in the past decade further highlighting the underlying speculations on our contested future that remain the core of this genre In surveying the vast expanse of politically charged science fiction of recent years the editors posit that the defining dilemma for these tales rests in whether identity and meaning germinate from progressive linear changes or progress or from a continuous return to primitive realities of war death and the competition for survival The discussion of political implications ranges among writers from H G Wells Robert A Heinlein Ursula Le Guin and Isaac Asimov to more radical recent voices such as Iain M Banks William Gibson Joanna Russ Philip K Dick and China Mieville While emphasizing the literature the collection also addresses political science fiction found on film and television from the original Star Trek through the newest incarnation of Battlestar Galactica **Space Feminisms** Marie-Pier Boucher, Claire Webb, Annick Bureau, Nahum, 2024-01-25 Employing a global approach to feminist theory this book examines how scientific popular scholarly and artistic imaginations of space have since the 1950s reflected and embedded earthly hopes anxieties and futures Rather than simply a platform for imagining the future it cultivates radical and alternative modes of inquiry around space through seeing space as a material reality that reflexively encodes humans self perceptions of their planet and beyond Bringing together essayistic reflections artworks and interviews with space scientists engineers and astronauts past and present in one volume Space Feminisms inspects the transformation of terrestrially held notions of gender race class and ableism as they migrate to the extraterrestrial whilst drawing new connections between feminist thought and extraterrestrial power structures Space Feminisms makes a radical enquiry into how earthly power structures are already expanding into our skies facilitating a collaborative and

interdisciplinary platform for scholars artists and designers to imagine radical constructions of human futures beyond Earth At the intersection of scientific cultural social and artistic speculations the book gathers leading scholars scientists artists and designers to develop innovative tactics and disruptive participations to create generative alternative and radical futures of and in space
