Space Frontiers:

New Space Frontiers Piers Bizony, 2014-10-15 Take a journey into the New Space Frontier It is easy to imagine that the space shuttle's retirement has edged the Space Age toward closure at least in terms of human flight beyond the bounds of earth In fact there are more people carrying ships being constructed now than at any time since Yuri Gagarin became the first man in space half a century ago Some are already servicing the International Space Station which incidentally has ensured a permanent human presence in space for the last two decades and is set to continue and expand for decades yet to come What's more NASA is no longer the only big player in the space game Commercial non governmental space exploration is becoming a reality rather than just a pipe dream What orbital adventures await us in the next five decades Will humans ever again head into deep space as the Apollo astronauts once did NASA's new hardware is aimed toward asteroid missions and ultimately Mars but there is a significant chance that a government funded space agency will not be the only or even the first organization to send humans across the solar system Get ready to experience the excitement of adventure with New Space Frontier Through gorgeous photography and engaging writing noted space and science author Piers Bizony speculates beyond just today's hardware and explores what might be possible for the next generation **GALACTIC GOVERNANCE:**

The Space Transportation Market: Evolution or Revolution? Michael J Rycroft,2012-12-06 M Rycroft FacultyMember InternationalSpaceUniversity e mail Rycroft isu isunet edu The Space Transportation Market Evolution or Revolution was the question which was the focus for the papers presented and also the Panel Discussions at the fifth annual Symposium organised by the International Space University Held in Strasbourg France for three lively days at the end of May 2000 the Symposium brought together representatives of the developers providers and operators of space transportation systems of regulatory bodies and of users of the space transportation infrastructure in many fields as well as experts in policy and market analysis From the papers published here it is clear that today s answer to the question tends more towards evolution than to revolution The space launch industry is still not a fully mature one and is still reliant on at least partial funding by governments Better cooperation is essential between governments launch providers satellite builders and satellite operators in order to reduce the problems which the space transportation market faces today
