Kubrick's Hope Julian Rice, 2008-09-29 There have been two common assumptions about Stanley Kubrick that his films portray human beings who are driven exclusively by aggression and greed and that he pessimistically rejected meaning in a contingent postmodern world However as Kubrick himself remarked A work of art should be always exhilarating and never depressing whatever its subject matter may be In this new interpretation of Kubrick's films Julian Rice suggests that the director's work had a more positive outlook than most people credit him And while other studies have recounted Kubrick's life and production histories few have offered lucid explanations of specific sources and their influence on his films In Kubrick's Hope Rice explains how the theories of Freud and Jung took cinematic form and also considers the significant impression left on the director's last six films by Robert Ardrey Bruno Bettelheim and Joseph Campbell In addition to providing useful contexts Rice offers close readings of the films inviting readers to note details they may have missed and to interpret them in their own way By refreshing their experience of the films and discarding postmodern clichés viewers may discover more optimistic themes in the director's works Beginning with 2001 A Space Odyssey and continuing through A Clockwork Orange Barry Lyndon The Shining Full Metal Jacket and Eyes

Wide Shut Rice illuminates Kubrick's thinking at the time he made each film Throughout Rice examines the compelling political psychological and spiritual issues the director raises As this book contends if these works are considered together and repeatedly re-viewed Kubrick's films may help viewers to personally grow and collectively endure The Oxford Handbook of American Film History Jon Lewis, 2025 In a series of newly commissioned chapters The Oxford Handbook of American Film History offers a new and fully compelling discussion of American film as marked by significant moments of industrial and artistic change Many of the chapters are built upon primary sourced research while others detail aspects of form and style Together the chapters in this book show a history shaped by multiple theses and voices and interests

Downtime Mark Goble, 2025-06-17 Slow motion has become perhaps the least special effect in film and media a stylistic technique for showing violence dream sequences and flashbacks or other experiences outside ordinary time We see so much slow motion on our screens today that we can look past its history and forget how rare it was before the 1960s when films such as *The Wild Bunch* *Bonnie and Clyde* and *2001 A Space Odyssey* helped it explode in popularity at a moment of cultural change and social upheaval This ambitious book tells the story of slow motion tracing a broader fascination with the uneven speeds of modern life and our ability to comprehend them *Downtime* explores the history and aesthetics of slow motion from its origins in early film to its prominence today Mark Goble argues that the effect's sudden visibility after 1968 registers experience of modernity as a period of perpetual acceleration that somehow makes even the smallest intervals of time feel endless Ranging across literature art and cinema including novels by William Faulkner Don DeLillo and W G Sebald as well as Robert Smithson's *Spiral Jetty* and Julie Dash's *Daughters of the Dust* he describes how writers and filmmakers depict the velocities and durations of contemporary life Goble reveals the twentieth century and its aftermath as figured in slow motion rushing past and deliriously delayed everything going fast and slow at once *Downtime* is about time and its technologies in an accelerated world that can advance only in slow motion *Science Fiction and the Prediction of the Future* Gary

Westfahl, Wong Kin Yuen, 2014-01-10 Science fiction has always challenged readers with depictions of the future Can the genre actually provide glimpses of the world of tomorrow This collection of fifteen international and interdisciplinary essays examines the genre's predictions and breaks new ground by considering the prophetic functions of science fiction films as well as SF literature Among the texts and topics examined are classic stories by Murray Leinster C L Moore and Cordwainer Smith *2001 A Space Odyssey* and its sequels Japanese anime and Hong Kong cinema and electronic fiction **Discovering**

fiction film 2001 A Space Odyssey including the multilayered meaning of the Monolith this book traces the themes and symbols encrypted in the films that followed during the director's impressive career It reveals the oblique methods Kubrick used to underscore a wide range of humanitarian alarms covered in films as diverse as A Clockwork Orange Barry Lyndon The Shining Full Metal Jacket and Eyes Wide Shut and the fascinating links these films have to one another Surprising revelations discovered in Dr Strangelove Spartacus Lolita and Paths of Glory are also unveiled for the first time
