Occupying Space in American Literature and Culture Ana M. Manzanás, Jesús Benito Sánchez, 2014-04-24 Occupying Space in American Literature and Culture inscribes itself within the spatial turn that permeates the ways we look at literary and cultural productions The volume seeks to clarify the connections between race space class and identity as it concentrates on different occupations and disoccupations enclosures and boundaries Space is scaled up and down from the body the ground zero of spatiality to the texturology of Manhattan from the striated place of the office in Melville's *Bartleby the Scrivener* on Wall Street to the striated spaces of internment camps and reservations from the lowest of the low the human clutter that lined the streets of Albany NY during the Depression to the new Towers of Babel that punctuate the contemporary architecture of transparencies As it strings together these spatial narratives the volume reveals how beyond the boundaries that characterize each space every location has loose ends that are impossible to contain

On the nature and passage of time and 4-D geometry Samuel K.K. Blankson, 2013-12-07
PAPERBACK In his 10th book on post relativity philosophy of time the Ghanaian philosopher argues that all the theories we read about time are useful only for constructing clocks to accord accurately with the earth's regular motions and astronomical features The many bemusing technical terms employed like duration between events sidereal time solar time nutation equinox earth's rotation the precession of the equinoxes etc were all invented to account for fixed general and

absolute time running all through the cosmos and the same everywhere This view of time however was abolished by Einstein He adds that everything we have ever used to reckon time including atomic time amounts to mere physical cycles pulses or oscillations that we count as the units of time the years for instance but they are passing He has also uncovered Einstein's undoubted snub to 4 D geometry

Handling Dissonance Chelle L. Stearns, 2019-06-12 Music can answer questions that often confound more discursive modes of thought Music takes concepts that are all too familiar reframes these concepts and returns them to us with incisive clarity and renewed vision Unity is one of these all too familiar concepts thrown around by politicians journalists and pastors as if we all know what it means By turning to music especially musical space the relational structure of unity becomes less abstract and more tangible within our philosophy Arnold Schoenberg as an inherently musical thinker is our guide in this study of unity His reworking of musical structure dissonance and metaphysics transformed the tonal language and aesthetic landscape of twentieth century music His philosophy of compositional unity helps us to deconstruct and reconceive how unity can be understood and worked with both aesthetically and theologically This project also critiques Schoenberg's often monadic musical metaphysics by turning to Colin Gunton's conviction that the particularity and unity at the heart of God's triune being should guide all of our theological endeavors Throughout music accompanies our thinking demonstrating not only how theology can benefit the philosophy of music but also how the philosophy of music can enrich and augment theological discourse

Community, Space and Online Censorship Dr Scott Beattie, 2013-02-28 Internet censorship is a controversial topic while the media periodically sounds alarms at the dangers of online life the uncontrollable nature of the internet makes any kind of pervasive regulatory control impossible This book compares the Australian solution a set of laws which have been criticized as being both draconian and ineffectual to major regulatory systems in the UK and US and understanding what drives them The impossibility of internet regulation opens deeper issues what do we mean by regulation and how do we judge the certainty and effectiveness of law These questions lead to an exploration of the theories of legal geography which provide tools to understand and evaluate regulatory practices The book will be a valuable guide for academics students and policy makers working in media and censorship law those from a civil liberties interest and people interested in internet theory generally

Understanding the City Gülçin Erdi-Lelandais, 2014-06-30 Henri Lefebvre is undoubtedly one of the most influential thinkers in the field of urban space and its organization his theories offer reflections still valid for analyzing social relations in urban areas affected by the crisis of the neoliberal economic system Lefebvre's ideal of the right to the city is now more widely accepted given today's current

cultural and social situation Most current research on Henri Lefebvre refers solely to his ideas and their theoretical discussion without focusing on the empirical transcription of the philosopher This book fills this gap and proposes examples about the empirical use of Henri Lefebvre s sociology from the perspective of different cities and researchers in order to understand the city and its evolutions in the context of neoliberal globalization The book s main purpose is to revisit Lefebvre s still relevant key concepts to propose new comprehensions of the contemporary city Case studies in this book will show also that the reception of Lefebvrian concepts differs across different contexts depending on the social and political circumstances of each country The debates in this book both expand the scope of urban imagination and help to reinvigorate unify and empower shared desires for just urban outcomes The contributions to this book also illuminate the everyday choices concerning the form and social processes of the city and the inspiration that they draw from Lefebvre s theoretical legacy in the realm of urban sociology

Management ,1982 Solipsism, Physical Things and Personal Perceptual Space

Safak Ural,2019-09-30 Solipsism indicates an epistemological position that denies the existence of others by asserting that the self is the only thing that can be known to exist For sophist philosophers the belief that we can not know anything and even if we do so we cannot communicate it is central to this theory However until now there has been little academic scholarship that has tried to provide answers to the pressing issues raised by solipsism In Solipsist Ontology Physical Things and Personal Perceptual Space Ural aims to redefine solipsism by analyzing and elaborating on traditional philosophical problems such as empiricism and rationalism as well as discussing problems of language communication and meaning Ural reveals where solipsism has been previously ignored pseudo problems have arisen that disguise the sources of the problems with prejudices that concern the philosophical problems in question Notably many current as well as traditional problems of ontology epistemology and language are bound up in discourses of solipsism Ural argues that discarding solipsism as a philosophical discourse hinders new interpretations of traditional philosophical thought This book offers a fresh perspective to solipsism by defining it in relation to concepts such as physical things personal perceptual space and identity Importantly Ural proposes that an understanding of identity is not necessary in order to redefine solipsism By building a logical system that fashions communication and solipsism as interrelated it is possible to reject identity as a useless concept and thus overcome the classic solipsist dilemma of we are not able to communicate This original piece of research is an important and timely contribution to the field of philosophy that will be of great interest to teachers researchers and students

The Home-maker Marion Harland, 1890 **Thomas F. Torrance** Paul D. Molnar, 2016-02-17 This book provides an important study of the theology of Thomas F Torrance who is generally considered to have been one of the most significant theologians writing in English during the twentieth century with a view toward showing how his theological method and all his major doctrinal views were shaped by his understanding of the doctrine of the Trinity Torrance pursued a theology that was realist because he attempted to think in accordance with the unique nature of the object that is known In holding to such a methodology he drew an analogy between theology and natural science This book demonstrates how for Torrance God relates with humanity within time and space so that creation finds its meaning in relation to God and not in itself this enabled him to avoid many theological pitfalls such as agnosticism subjectivism and dualism while explaining the positive implications of various Christian doctrines in a penetrating and compelling manner This book offers an important resource for students of theology and for scholars who are interested in seeing how serious dogmatic theology shapes and should shape our understanding of the Christian life

place Tom Bragg argues that the result was a flexible form of fiction that could be modified to reflect both the different historical visions of the authors and the changing aesthetic tastes of the reader Bragg focuses on Scott William Harrison Ainsworth and Edward Bulwer Lytton identifying links between spatial representation and the historical novel's multi-generic rendering of history and narrative Even though their understanding of history and historical process could not be more different all writers employed space and place to mirror narrative stimulate discussion interrogate historical inquiry or otherwise comment beyond the rational factual narrator's point of view Bragg also traces how landscape depictions in all three authors' works inculcated heroic masculine values to show how a dominating theme of the genre endures even through widely differing versions of the form In taking historical novels beyond the localized questions of political and regional context Bragg reveals the genre's relevance to general discussions about the novel and its development Nineteenth-century readers of the novel understood historical fiction to be epic and serious moral and healthful patriotic but also universal Space and Narrative in the Nineteenth-Century British Historical Novel takes this readership at its word and acknowledges the complexity and diversity of the form by examining one of its few continuous features a flexibly metaphorical valuation of space and place The Philosophical Quarterly ,1927
