Spacewear Barbara Brownie, 2019-01-10 Today we are living in the New Space Age where mass commercial space travel is almost within our grasp This otherworldly possibility has opened up new cultural images of space both real and fictional and has caused fashion design and spacesuit engineering to intersect in new exciting ways Spacewear traverses this uncharted territory by exploring the changing imagination of space in fashion and fashion in space from the first Space Age to the 21st century Exploring how space travel has stylistically and technologically framed fashion design on earth and how we need to revisit established design practices for the weightless environment Spacewear connects the catwalk and the space station This book draws together speculative fantasies in sci fi films such as *Star Trek* and *2001 A Space Odyssey* with the engineered spacesuits Biosuit and the NASA Z 2 and with catwalk interpretations by the likes of Alexander McQueen Hussein Chalayan Andr Courr ges and Iris van Herpen While the development of commercial space agencies has led to new concerns for style in garments for outer space that re think fundamental design principles such as drape high fashion has experimented with new possibilities for weightlessness that extend far beyond the 1960s vision of Space Age metallic fabrics and helmet style headwear Brownie takes the reader on a fascinating journey from fantasy to function and to form deepening our understanding of this new category of fashion that is prompting new approaches to garment design and construction both on earth and in outer space

Magic Lands John M. Findlay, 1993-09-22 The American West conjures up images of pastoral tranquility and wide open spaces but by 1970 the Far West was the most urbanized section of the country Exploring four intriguing cityscapes Disneyland Stanford Industrial Park Sun City and the 1962 Seattle World s Fair John Findlay shows how each created a sense of cohesion and sustained people s belief in their superior urban environment This first book length study of the urban West after 1940 argues that Westerners deliberately tried to build cities that differed radically from their eastern counterparts In 1954 Walt Disney began building the world s first theme park using Hollywood s movie making techniques The creators of Stanford Industrial Park were more hesitant in their approach to a conceptually organized environment but by the mid 1960s the Park was the nation s prototypical research park and the intellectual downtown for the high technology region that became Silicon Valley In 1960 on the outskirts of Phoenix Del E Webb built Sun City the largest most influential retirement community in the United States Another innovative cityscape arose from the 1962 Seattle World s Fair and provided a futuristic somewhat fanciful vision of modern life These four became magic lands that provided an antidote to the apparent chaos of their respective urban milieus Exemplars of a new lifestyle they are landmarks on the changing cultural landscape of postwar America
