This book explains the concept of adding value and shows staff at libraries and other organizations why they need to take steps now to ensure they are adding new value to their communities, whether it be a local town or neighborhood, a faculty and student body or a school. Value is at the core of every organization's purpose. Without value, organizations die. Libraries, as well as museums, archives and galleries, have traditionally added value to their communities through their collections and services, but yesterday's collections and services are no longer enough. In order to remain sustainable, today's libraries, archives, museums and galleries must explore new ways to add value that resonate in the lives of their customers. This unique book explains how addressing the 5 C's of adding value: content, context, connection, collaboration and community, enables organizations to find new ways to invigorate their services, better serve their communities and thrive today and tomorrow. It addresses adding value in the context of other key topics such as crowdsourcing, embedded librarianship, makerspaces, self-publishing and repurposing spaces. Filled with charts, tables, screenshots and other visual representation, this is a useful and provocative guide that anyone interested in vesting in the successful future of libraries, archives and museums needs to read.

based on their comic response to a new imaginative state the state of California Klinkowitz also considers subjects that though they cannot be represented nevertheless exercise constraints on a writer's intention to structure In recent decades two of these pressing themes have been gender as seen here in the works of Grace Paley and war the Vietnam conflict itself as well as the struggles of two generations to come to terms with it Structuring the void left when content collapses these writers have as Klinkowitz demonstrates developed an entirely new style of fiction one that necessarily privileges space over time and self invention over representation
