Popular and Visual Culture Ricardo Campos, Rúben Pinho, Clara Sarmiento, 2014-10-02 Popular and Visual Culture Design Circulation and Consumption is a transnational project that fosters a dialogue with multiple origins both in geographical and academic terms From the onset this book questions the concepts of visual and popular culture terms which are currently applied both to describe scientific fields as operative concepts in theoretical discourse and to characterize specific cultural contexts The book's analysis and categorization of visual and popular culture pursues discourses and practices which mark different historical eras and shape social orders Because popular iconic and written productions are the outcome of a network of political economic ideological and social circumstances that are often hardly detectable and too taken for granted to be critically recognized even by those who draw paint or write and live under their influence That is why visual figurations of popular culture should be studied as the support of a deeply motivated symbolic discourse on the values shared by a community This book deals in a way or another with how popular and visual artefacts and sceneries are socially built preserved and or contested The volume brings together not only different disciplinary perspectives but also diverse empirical phenomena while approaching the wide subject of visibility and popular culture

Rethinking Virtual Places Erik M. Champion, 2021-11-30 How would the humanities change if we grappled with the ways in which digital and virtual places are designed experienced and critiqued In *Rethinking Virtual Places* Erik Malcolm Champion draws from the fields of computational sciences and other place related disciplines to argue for a more central role for virtual space in the humanities For instance recent developments in neuroscience could improve our understanding of how people experience store and recollect place related encounters Similarly game mechanics using virtual place design might make digital environments more engaging and learning content more powerful and salient In addition Champion provides a brief introduction to new and emerging software and devices and explains how they help hinder or replace our traditional means of designing and exploring places Perfect for humanities scholars fascinated by the potential of virtual space *Rethinking Virtual Places* challenges both traditional and recent

evaluation methods to address the complicated problem of understanding how people evaluate and engage with the notion of place

Virgil's Cinematic Art Kirk Freudenburg, 2022-12-27 Through a series of close readings centered primarily on Virgil's Aeneid Kirk Freudenburg shows that the experiential effects that Virgil puts into play do serious narrative work of their own by structuring lines of sight both visual and emotive and shifting them about in ways that move readers interpellated as viewers into and out of the visual and emotional worlds of the story's characters

Art on the Block Ann Fensterstock, 2025-06-25 A fascinating tour of the last five decades of contemporary art in New York City showing how artists are catalysts of gentrification and how neighborhoods in turn shape their art with special insights into the work of artists such as Jean Michel Basquiat Cindy Sherman and Jeff Koons Stories of New York City's fabled art scene conjure up artists' lofts in SoHo studios in Brooklyn and block after block of galleries in Chelsea But today no artist can afford a SoHo loft Brooklyn has long gentrified and even the galleries of Chelsea are beginning to move on Art on the Block takes the reader on a journey through the neighborhoods that shape and are shaped by New York's ever evolving art world Based on interviews with over 150 gallery directors as well as the artists themselves art historian and cultural commentator Ann Fensterstock explores the genesis expansion maturation and ultimate restless migration of the New York art world from one initially undiscovered neighborhood to the next Opening with the colonization of the desolate South Houston Industrial District in the late 1960s the book follows the art world's subsequent elopements to the East Village in the 80s Brooklyn in the mid 90s Chelsea at the beginning of the new millennium and most recently to the Lower East Side With a look to the newest neighborhoods that artists are just now beginning to occupy this is a must read for both art enthusiasts as well as anyone with a passion for New York City

Mapping the Afterlife Emma Gee, 2020-04-03 There are very few accounts of the afterlife across the period from Homer to Dante Most traditional studies approach the classical afterlife from the point of view of its evolution towards the Christian afterlife This book tries to do something different to explore afterlife narratives in spatial terms and to situate this tradition within the ambit of a fundamental need in human psychology for the synthesis of soul or self and universe Drawing on the works of Homer Plato Cicero Virgil and Dante among others as well as on modern works on psychology cartography and music theory Mapping the Afterlife argues that the topography of the afterlife in the Greek and Roman tradition and in Dante reflects the state of scientific knowledge at the time of the various contexts in which we find it The book posits that there is a dominant spatial idiom in afterlife landscapes a journey vision paradigm the horizontal journey of the soul across the afterlife landscape and a synoptic vision of the universe Many scholars have argued that the vision of the universe is out of place in the underworld landscape However looking across the entire tradition we find that afterlife landscapes almost without exception contain these two kinds of space in one form or another This double vision of space brings the underworld as the landscape of the soul into contact with the scientific universe and brings humanity into line with the cosmos
