Orbital Debris Prevention and Mitigation Efforts among Major

Space Actors Marc Carns,2023-07-03 In the absence of formal treaty law orbital debris has grown exponentially in our most valuable orbital regions To address this problem many major spacefaring programs have implemented independent laws and policies meant to mitigate the release and overall threat of debris However these individual efforts have not translated into a cohesive international set of regulations to address the growing debris problem Fortunately there may exist unappreciated similarities among major international programs either in whole or part that once identified could lay the groundwork for the recognition of customary international law This book reviews a number of major programs in depth and seeks to answer if any commonality among them has likely established customary international law

Space Debris ,2002 The

Environmental Element in Space Law Lotta Viikari,2008-06-30 While decades of space ventures have led to significant technological advances space activities have also brought increasing environmental problems This book examines the current international legal regimes in space law and environmental law in order to ascertain their applicability and efficacy in addressing environmental threats in the space sector The research suggests mechanisms which could improve environmental protection in the sector and strengthen the environmental element in space law These mechanisms include a variety of norm setting strategies used in international environmental management Special attention is drawn to the potential of environmental impact assessment in the space sector and to dispute resolution procedures Like other areas of human activities the space sector should accommodate both economic interests and environmental protection in line with the principle of sustainable development
