Space Time And Crime:

Space, Time, and Crime Kim Michelle Lersch, 2004 **Space, Time, and Crime** George Rengert, John Wasilchick, 1988 **Understanding Crime and Place** Elizabeth R. Groff, Cory P. Haberman, 2023-03-24 This book instructs students and scholars in foundational methods measurements theories and standard practices in the study of preventing and predicting crime through geographies and place based research methodologies The chapters by leading experts include exercises and walkthroughs Breaking Rules: The Social and Situational Dynamics of Young People's Urban Crime Per-Olof H. Wikström, 2012-05-24 Breaking new ground in the study of crime in urban environments Breaking Rules The Social and Situational Dynamics of Young People s Urban Crime examines the findings theoretical basis and new methodology of The Peterborough Adolescent and Young Adult Development Study PADS This major longitudinal study investigates the role of the social environment on crime causation involving a cohort of 700 young people from the age of 12 A particular aim of PADS is to employ a new theory known as Situational Action Theory as well as the innovative methodology of econometrics combined with space time budgets to improve the study of young people s offending and its changes By reviewing the current literature and analysing the theoretical and methodological problems of previous research the book explains how Situational Action Theory can help overcome central problems in criminological theorising Using this new and innovative framework it presents an analysis of the urban structure of Peterborough and its correlation to the differences in social life found in that area The variations in the urban environment are examined in terms of crime victimization and fear of crime and a detailed examination of young persons crime and its spatial patterns is offered through the unique space time budget data collected within PADS that enables analyses of young people their movements and crime involvement With implications for policy and prevention as well as being the first study of its kind this book should be of great interest to policy makers and practitioners interested in issues of urban environments as well as those studying crime in the urban environment and the role of the social environment in crime causation Handbook of Quantitative Criminology Alex R. Piquero, David Weisburd, 2009-12-16 Quantitative criminology has certainly come a long way since I was first introduced to a largely qualitative criminology some 40 years ago when I was recruited to lead a task force on science and technology for the President s Commission on Law Enforcement and Administration of Justice At that time criminology was a very limited activity depending almost exclusively on the Uniform Crime Reports UCR initiated by the FBI in 1929 for measurement of crime based on victim reports to the police and on police arrests A typical mode of analysis was simple bivariate correlation Marvin Wolfgang and colleagues were making an important advance by tracking longitudinal data on arrests in Philadelphia an innovation that was widely appreciated And the field was very small I remember attending my first meeting of the American Society of Criminology in about 1968 in an anteroom at New York University there were about 25-30 people in attendance mostly sociologists with a few lawyers thrown in That Society today has over 3 000 members mostly now drawn from criminology which has established its own clear

identity but augmented by a wide variety of disciplines that include statisticians economists demographers and even a few engineers This Handbook provides a remarkable testimony to the growth of that eld Following the maxim that if you can t measure it you can t understand it we have seen the early dissatisfaction with the UCR replaced by a wide variety of new approaches to measuring crime victimization and offending

The Oxford Handbook of

Environmental Criminology Gerben Bruinsma,Shane D. Johnson,2018 The study of how the environment local geography and physical locations influence crime has a long history that stretches across many research traditions These include the neighborhood effects approach developed in the 1920s the criminology of place and a newer approach that attends to the perception of crime in communities Aided by new technologies and improved data reporting in recent decades research in environmental criminology has developed rapidly within each of these approaches Yet research in the subfield remains fragmented and competing theories are rarely examined together The Oxford Handbook of Environmental Criminology takes a unique approach and synthesizes the contributions of existing methods to better integrate the subfield as a whole Gerben J N Bruinsma and Shane D Johnson have assembled a cast of top scholars to provide an in depth source for understanding how and why physical setting can influence the emergence of crime affect the environment and impact individual or group behavior The contributors address how changes in the environment global connectivity and technology provide more criminal opportunities and new ways of committing old crimes They also explore how crimes committed in countries with distinct cultural practices like China and West Africa might lead to different spatial patterns of crime This is a state of the art compendium on environmental criminology that reflects the diverse research and theory developed across the western world
