Space Time Crime:

Space, Time, and Crime Kim Michelle Lersch, 2004 **Breaking Rules: The Social and Situational Dynamics of Young People's Urban Crime** Per-Olof H. Wikström, 2012-05-24 Breaking new ground in the study of crime in urban environments *Breaking Rules: The Social and Situational Dynamics of Young People's Urban Crime* examines the findings theoretical basis and new methodology of The Peterborough Adolescent and Young Adult Development Study PADS This major longitudinal study investigates the role of the social environment on crime causation involving a cohort of 700 young people from the age of 12 A particular aim of PADS is to employ a new theory known as Situational Action Theory as well as the innovative methodology of econometrics combined with space time budgets to improve the study of young people's offending and its changes By reviewing the current literature and analysing the theoretical and methodological problems of previous research the book explains how Situational Action Theory can help overcome central problems in criminological theorising Using this new and innovative framework it presents an analysis of the urban structure of Peterborough and its correlation to the differences in social life found in that area The variations in the urban environment are examined in terms of crime victimization and fear of crime and a detailed examination of young persons crime and its spatial patterns is offered through the unique space time budget data collected within PADS that enables analyses of young people their movements and crime involvement With implications for policy and prevention as well as being the first study of its kind this book should be of great interest to policy makers and practitioners interested in issues of urban environments as well as those studying crime in the urban environment and the role of the social environment in crime causation **Understanding Crime and Place** Elizabeth R. Groff, Cory P. Haberman, 2023-03-24 This book instructs students and scholars in foundational methods measurements theories and standard practices in the study of preventing and predicting crime through geographies and place based research methodologies The chapters by leading experts include exercises and walkthroughs *Cyber-Physical System Solutions for Smart Cities* Muthumanikandan, Vanamoorthy, Bhuvaneswari, Anbalagan, Easwaran, Balamurugan, Sudarson Rama Perumal, T., 2023-08-07 In the implementation of smart cities sensors and actuators that produce and consume enormous amounts of data in a variety of formats and ontologies will be incorporated into the system as a whole The data produced by the participating devices need to be adequately categorized and connected to reduce duplication and conflicts Newer edge computing techniques are needed to manage enormous amounts of data quickly and avoid overloading the cloud infrastructure *Cyber Physical System Solutions for Smart Cities* considers the most recent developments in several crucial software services and cyber infrastructures that are important to smart cities Covering key topics such as artificial intelligence smart data big data and computer science this premier reference source is ideal for industry professionals government officials policymakers scholars researchers academicians instructors and students **Geographical Information System and Crime Mapping** Monika Kannan, Mehtab Singh, 2020-11-29 Geographical

Information System and Crime Mapping features a diverse array of Geographic Information System GIS applications in crime analysis from general issues such as GIS as a communication process interjurisdictional mapping and data sharing to specific applications in tracking serial killers and predicting violence prone zones It supports readers in developing and implementing crime mapping techniques The distribution of crime is explained with reference to theories of human ecology transport network built environment housing markets and forms of urban management including policing Concepts are supported with relevant case studies and real time crime data to illustrate concepts and applications of crime mapping Aimed at senior undergraduate graduate students professionals in GIS Crime Analysis Spatial Analysis Ergonomics and human factors this book Provides an update of GIS applications for crime mapping studies Highlights growing potential of GIS for crime mapping monitoring and reduction through developing and implementing crime mapping techniques Covers Operational Research Spatial Regression model Point Analysis and so forth Builds models helpful in police patrolling surveillance and crime mapping from a technology perspective Includes a dedicated section on case studies including exercises and data samples

Character, Circumstances, and Criminal Careers Per-Olof H. Wikstrom,2024 **Allocations of Resources in the Chicago Police Department** Chicago (Ill.). Police Department. Operations Research Task Force,1972 Project Reports of the National Institute of Law Enforcement and Criminal Justice ,1972 The Oxford Handbook of Environmental Criminology Gerben Bruinsma,Shane D. Johnson,2018

The study of how the environment local geography and physical locations influence crime has a long history that stretches across many research traditions These include the neighborhood effects approach developed in the 1920s the criminology of place and a newer approach that attends to the perception of crime in communities Aided by new technologies and improved data reporting in recent decades research in environmental criminology has developed rapidly within each of these approaches Yet research in the subfield remains fragmented and competing theories are rarely examined together The Oxford Handbook of Environmental Criminology takes a unique approach and synthesizes the contributions of existing methods to better integrate the subfield as a whole Gerben J N Bruinsma and Shane D Johnson have assembled a cast of top scholars to provide an in depth source for understanding how and why physical setting can influence the emergence of crime affect the environment and impact individual or group behavior The contributors address how changes in the environment global connectivity and technology provide more criminal opportunities and new ways of committing old crimes They also explore how crimes committed in countries with distinct cultural practices like China and West Africa might lead to different spatial patterns of crime This is a state of the art compendium on environmental criminology that reflects the diverse research and theory developed across the western world

Crime Modeling and Mapping Using Geospatial Technologies Michael Leitner,2013-01-19 Recent years in North America have seen a rapid development in the area of crime analysis and mapping using Geographic Information Systems GIS technology In 1996 the US National Institute of Justice NIJ established the crime mapping research center CMRC to

promote research evaluation development and dissemination of GIS technology The long term goal is to develop a fully functional Crime Analysis System CAS with standardized data collection and reporting mechanisms tools for spatial and temporal analysis visualization of data and much more Among the drawbacks of current crime analysis systems is their lack of tools for spatial analysis For this reason spatial analysts should research which current analysis techniques or variations of such techniques that have been already successfully applied to other areas e g epidemiology location allocation analysis etc can also be employed to the spatial analysis of crime data This book presents a few of those cases

Recent Trends in Artificial Neural Networks Ali Sadollah, Carlos Travieso-Gonzalez, 2020-03-04 Artificial intelligence AI is everywhere and it is here to stay Most aspects of our lives are now touched by artificial intelligence in one way or another from deciding what books or flights to buy online to whether our job applications are successful whether we receive a bank loan and even what treatment we receive for cancer Artificial Neural Networks ANNs as a part of AI maintains the capacity to solve problems such as regression and classification with high levels of accuracy This book aims to discuss the usage of ANNs for optimal solving of time series applications and clustering Bounding of optimization methods particularly metaheuristics considered as global optimizers with ANNs make a strong and reliable prediction tool for handling real life application This book also demonstrates how different fields of studies utilize ANNs proving its wide reach and relevance

Research Methods in Criminal Justice and Criminology Callie Marie Rennison, Timothy C. Hart, 2018-02-06 This is a great text It is comprehensive and easy to understand The illustrations will enable students to learn and remember the information This is the first research methods text I have read that is actually fun to read Tina L Freiburger University of Wisconsin Milwaukee Research Methods in Criminal Justice and Criminology connects key concepts to real field research and practices using contemporary examples and recurring case studies that demonstrate how concepts relate to students lives Authors Callie M Rennison and Timothy C Hart introduce practical research strategies used in criminal justice to show students how a research question can become a policy that changes or influences criminal justice practices The book s student driven approach addresses both the why and the how as it covers the research process and focuses on the practical application of data collection and analysis By demonstrating the variety of ways research can be used and reinforcing the need to discern quality research the book prepares students to become critical consumers and ethical producers of research

Wilson, 2016-09-26 Geo mathematical modelling models from complexity science Sir Alan Wilson Centre for Advanced Spatial Analysis University College London Mathematical and computer models for a complexity science tool kit Geographical systems are characterised by locations activities at locations interactions between them and the infrastructures that carry these activities and flows They can be described at a great variety of scales from individuals and organisations to countries Our understanding often partial of these entities and in many cases this understanding is represented in theories and associated mathematical models In this book the main examples are models that represent elements of the global system covering such topics as trade migration security and development aid together with examples at finer scales This provides an effective toolkit that can not only be applied to global systems but more widely in the modelling of complex systems All complex systems involve nonlinearities involving path dependence and the possibility of phase changes and this makes the mathematical aspects particularly interesting It is through these mechanisms that new structures can be seen to emerge and hence the current notion of emergent behaviour The range of models demonstrated include account based models and biproportional fitting structural dynamics space time statistical analysis real time response models Lotka Volterra models representing war agent based models epidemiology and reaction diffusion approaches game theory network models and finally integrated models Geo mathematical modelling Presents mathematical models with spatial dimensions Provides representations of path dependence and phase changes Illustrates complexity science using models of trade migration security and development aid Demonstrates how generic models from the complexity science tool kit can each be applied in a variety of situations This book is for practitioners and researchers in applied mathematics geography economics and interdisciplinary fields such as regional science and complexity science It can also be used as the basis of a modelling course for postgraduate students

Systems Thinking for Sustainable Crime Prevention Vania Ceccato, Andy Newton, 2024-11-07 This book offers a comprehensive overview of areas with elevated levels of crime which we consider risky places These can be facilities nodes or paths and can be found everywhere from small towns to megacities Crime and fear are examined from the perspective of those who use these places based on examples from the US the UK Sweden Nigeria Brazil China Australia and more Advocating for a systems thinking approach the book shows what can be learned from risky places and identifies ways to

address their inherent problems The book also assesses current barriers to applying systems thinking and identifies ways to foster interconnected long term crime prevention strategies that meet the diverse needs of multiple stakeholders Aimed at academics students and professionals in urban planning criminology geography and related fields this book is a vital resource for those dedicated to creating safer more inclusive and sustainable environments The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution CC BY 4.0 license

Crime Opportunity Theories Mangai Natarajan, 2017-07-05 Opportunity theories of crime seek to explain the occurrence of crime rather than simply the existence of criminal dispositions They emphasize the fundamental element in the criminal act of opportunity how this arises how it is perceived evaluated and acted on by those with criminal dispositions This volume brings together influential research articles on opportunity theories of crime by leading theorists such as Cohen and Felson on routine activity theory and Clarke and Cornish on the bounded rational choice perspective The articles also include more recent theoretical developments and studies of situational crime prevention of specific twenty first century crimes These articles attest to the sheer volume as well to as the richness and the variety of work designed to reduce crime that has forever changed the face of criminology and criminal justice

The Routledge Handbook of Technology, Crime and Justice M. R. McGuire, Thomas Holt, 2017-02-24 Technology has become increasingly important to both the function and our understanding of the justice process Many forms of criminal behaviour are highly dependent upon technology and crime control has become a predominantly technologically driven process one where traditional technological aids such as fingerprinting or blood sample analysis are supplemented by a dizzying array of tools and techniques including surveillance devices and DNA profiling This book offers the first comprehensive and holistic overview of global research on technology crime and justice It is divided into five parts each corresponding with the key stages of the offending and justice process Part I addresses the current conceptual understanding of technology within academia and the criminal justice system Part II gives a comprehensive overview of the current relations between technology and criminal behaviour Part III explores the current technologies within crime control and the ways in which technology underpins contemporary formal and informal social control Part IV sets out some of the fundamental impacts technology is now having upon the judicial process Part V reveals the emerging technologies for crime control and justice and considers the extent to which new technology can be effectively regulated This landmark collection will be essential reading for academics students and theorists within criminology sociology law engineering and technology and computer science as well as practitioners and professionals working within and around the criminal justice system
