Spacecraft Contamination Environment:

Spacecraft Contamination Environment, 1982 *Spacecraft Contamination Environment* Carl R. Maag, Jet Propulsion Laboratory (U.S.), 1983 *The Determination of the Spacecraft Contamination Environment*, 1987 **NASA/SDIO Space Environmental Effects on Materials Workshop, Part 1**, 1989 The National Aeronautics and Space Administration NASA and the Strategic Defense Initiative Organization SDIO cosponsored a workshop on Space Environmental Effects on Materials at the NASA Langley Research Center from June 28 to July 1 1988 The joint workshop was designed to inform participants of the present state of knowledge regarding space environmental effects on materials and to identify knowledge gaps that prevent informed decisions on the best use of advanced materials in space for long duration NASA and SDIO missions Establishing priorities for future ground based and space based materials research was a major goal of the workshop The end product of the workshop was an assessment of the current state of the art in space environmental effects on materials in order to develop a national plan for spaceflight experiments The workshop was intended for participation by expert applied researchers systems technologists and program managers for spacecraft systems **Scientific and Technical Aerospace Reports**, 1994 Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database Spacecraft Water Exposure Guidelines for Selected Contaminants National Research Council, Division on Earth and Life Studies, Board on Environmental Studies and Toxicology, Committee on Toxicology, Committee on Spacecraft Exposure Guidelines, 2008-11-21 NASA maintains an active interest in the environmental conditions associated with living and working in spacecraft and identifying hazards that might adversely affect the health and well being of crew members Despite major engineering advances in controlling the spacecraft environment some water and air contamination is inevitable Several hundred chemical species are likely to be found in the closed environment of the spacecraft and as the frequency complexity and duration of human space flight increase identifying and understanding significant health hazards will become more complicated and more critical for the success of the missions To protect space crews from contaminants in potable and hygiene water NASA requested that the National Research Council NRC provide guidance on how to develop water exposure guidelines and subsequently review NASA's development of the exposure guidelines for specific chemicals This book presents spacecraft water exposure guidelines SWEGs for antimony benzene ethylene glycol methanol methyl ethyl ketone and propylene glycol Optics in Adverse Environments Mark A. Kahan, 1980 *Fundamentals of Contamination Control* Alan C. Tribble, 2000 This Tutorial Text provides a comprehensive introduction to the subject of contamination control with specific applications to the aerospace industry The author draws upon his many years as a practicing contamination control engineer researcher and teacher The book examines methods to quantify the cleanliness level required by various contamination sensitive surfaces and to predict the end of life contamination level for those surfaces and it

identifies contamination control techniques required to ensure mission success **Particles on Surfaces 3** K.L. Mittal, 2013-11-11 This volume chronicles the proceedings of the Third Symposium on Particles on Surfaces Detection Adhesion and Removal held as a part of the 21st Annual Meeting of the Fine Particle Society in San Diego California August 21-25 1990 The first two symposia in this series were held in 1986 and 1988 respectively and have been properly documented 2 Like its antecedents the Third symposium was very well received and the continuing success of these symposia reinforced our earlier belief that regular symposia on the topic of particles on surfaces were very much needed Concomitantly the fourth symposium in this series is planned in Las Vegas July 13-17 1992 1 As pointed out in the Preface to the earlier two volumes 2 the topic of particles on surfaces is of tremendous interest and concern in a wide spectrum of technological areas The objectives of the Third symposium were essentially the same as those of the earlier two and our intent here was to provide an update on the research and development activities in the world of particles on surfaces Apropos there has been a deliberate attempt every time to seek out new people to present their research results and we have been very successful in this mission Technology for Large Space Systems ,1983 **Space Station Systems** ,1989 **Large Space Structures & Systems in the Space Station Era** ,1991 *Space Antenna Handbook* William A. Imbriale, Steven Shichang Gao, Luigi Boccia, 2012-06-25 This book addresses a broad range of topics on antennas for space applications First it introduces the fundamental methodologies of space antenna design modelling and analysis as well as the state of the art and anticipated future technological developments Each of the topics discussed are specialized and contextualized to the space sector Furthermore case studies are also provided to demonstrate the design and implementation of antennas in actual applications Second the authors present a detailed review of antenna designs for some popular applications such as satellite communications space borne synthetic aperture radar SAR Global Navigation Satellite Systems GNSS receivers science instruments radio astronomy small satellites and deep space applications Finally it presents the reader with a comprehensive path from space antenna development basics to specific individual applications Key Features Presents a detailed review of antenna designs for applications such as satellite communications space borne SAR GNSS receivers science instruments small satellites radio astronomy deep space applications Addresses the space antenna development from different angles including electromagnetic thermal and mechanical design strategies required for space qualification Includes numerous case studies to demonstrate how to design and implement antennas in practical scenarios Offers both an introduction for students in the field and an in depth reference for antenna engineers who develop space antennas This book serves as an excellent reference for researchers professionals and graduate students in the fields of antennas and propagation electromagnetics RF microwave millimetrewave systems satellite communications radars satellite remote sensing satellite navigation and spacecraft system engineering It also aids engineers technical managers and professionals working on antenna and RF designs Marketing and business people in satellites wireless and electronics area

who want to acquire a basic understanding of the technology will also find this book of interest **Handbook of Environmental Degradation of Materials** Myer Kutz, 2012-12-31 Nothing stays the same for ever The environmental degradation and corrosion of materials is inevitable and affects most aspects of life In industrial settings this inescapable fact has very significant financial safety and environmental implications The Handbook of Environmental Degradation of Materials explains how to measure analyse and control environmental degradation for a wide range of industrial materials including metals polymers ceramics concrete wood and textiles exposed to environmental factors such as weather seawater and fire Divided into sections which deal with analysis types of degradation protection and surface engineering respectively the reader is introduced to the wide variety of environmental effects and what can be done to control them The expert contributors to this book provide a wealth of insider knowledge and engineering knowhow complementing their explanations and advice with Case Studies from areas such as pipelines tankers packaging and chemical processing equipment ensures that the reader understands the practical measures that can be put in place to save money lives and the environment The Handbook s broad scope introduces the reader to the effects of environmental degradation on a wide range of materials including metals plastics concrete wood and textiles For each type of material the book describes the kind of degradation that effects it and how best to protect it Case Studies show how organizations from small consulting firms to corporate giants design and manufacture products that are more resistant to environmental effects International Aerospace Abstracts ,1999 **18th Space Simulation Conference** ,1994 35th Aerospace Sciences Meeting & Exhibit ,1997 **NASA Thesaurus Alphabetical Update** ,1971 **Handbook of Geophysics and Space Environments** U.S. Air Force Geophysics Laboratory,1985 **Technology for Large Space Systems: A Bibliography with Indexes (supplement 20)** United States.
