Shapiro, 2012-09 What was life like growing up on the Lower East Side of NYC during the Great Depression Can you imagine it For adults of course it was harsh for a young boy like me born in 1924 it was not as bad as you think I actually had fun playing sports and games you probably never heard of Learn about them My vivid recollection paints a broad view of the Lower East Side for you to see what it was like social activity sports activity bread lines patriotism politics professional sports interest compare it to your experiences I was fortunate not to be hungry for food but hungry to experience the wonders of our country Learn how I broke out of the Lower East Side shell A college education was hardly a goal among the youth in my community but I made it at a young age graduating from the City College of NY at twenty I had five industrial engineering jobs hardly the experience that would prepare me to manage NASA satellites operations It did not but by a quirk I became operations manager of a series of NASA weather satellites called Nimbus research satellites that provided many benefits to society you would be interested in learning about So why not also learn how satellites operate I describe that in simple terms Of course this book is my life story my story of raising a family having a productive career paying back to society through volunteerism while keeping close to Judaism and enjoying my senior years while still being productive at consulting work

Deep Space Craft Dave Doody, 2010-04-03 Deep Space Craft opens the door to interplanetary flight It looks at this world from the vantage point of real operations on a specific mission and follows a natural trail from the day to day working of this particular spacecraft through the functioning of all spacecraft to the collaboration of the various disciplines to produce the results for which a spacecraft is designed These results are of course mostly of a scientific nature although a small number of interplanetary missions are also flown primarily to test and prove new engineering techniques The author shows how in order to make sense of all the scientific data coming back to Earth the need for experiments and instrumentation arises and follows the design and construction of the instruments through to their placement and testing on a spacecraft prior to launch Examples are given of the interaction between an instrument s science team and the mission s flight team to plan and specify observations gather and analyze data in flight and finally present the results and discoveries to the scientific community This highly focused insider s guide to interplanetary space exploration uses many examples of previous and current endeavors It will enable the reader to research almost any topic related to spacecraft and to seek the latest scientific findings the newest emerging technologies or the current status of a favorite flight In order to provide easy paths from the general to the specific the text constantly refers to the Appendices Within the main text the intent is general familiarization and categorization of spacecraft and instruments at a high level to provide a mental framework to place in context and understand any spacecraft and any instrument encountered in the reader s experience Appendix A gives illustrated descriptions of many interplanetary spacecraft some earth orbiters and ground facilities to reinforce the classification framework Appendix B contains illustrated detailed descriptions of a dozen scientific instruments including some ground breaking engineering appliances that have either already been in operation or are poised for flight Each instrument s range of sensitivity in wavelengths of light etc and its physical principle s of operation is described Appendix C has a few annotated illustrations to clarify the nomenclature of regions and structures in the solar system and the

planets ring systems and places the solar system in context with the local interstellar environment **Commercial Astronauts** Erik Seedhouse,2024-04-29 The beginning of the 2020 s witnessed dozens of commercial astronauts fly to space on a variety of vehicles These spacecraft included SpaceX s Crew Dragon which supported the Inspiration4 and Axiom Space missions Virgin Galactic s SpaceShipTwo which supported several suborbital science flights and Blue Origin s New Shepard spacecraft which not only flew celebrities but also its fair share of commercial astronauts The story of this new breed of spacefarer has only just begun As evidenced by these missions commercial spaceflight has grown beyond passengers simply traveling to space just for the ride With orbital flights involving commercial astronauts staying in space for several days and weeks companies such as Sierra Space Axiom Space and Blue Origin are preparing for the next steps in commercial space travel which include the construction of orbiting habitats But how will the opportunities for commercial astronauts develop how will they be trained and will this new group of astronauts evolve This book describes how the commercial spaceflight industry is evolving how it will continue to evolve as barriers to entry are reduced competition grows and costs are lowered and how because of these efforts opportunities for commercial astronauts will increase 2021-08-01 1 2 2 8 More **Learning Through Play** Nancy Jo Hereford,Jane Schall,1991
