Chillida--questions and Space Eduardo Chillida, 1986 The Architecture of the Playing Field Richard L. Cleary, 2025 The author argues that sports and architecture share many concerns as both center the interplay of settings and bodies in motion He sets out to study their conceptual and physical intersection and to show what the aesthetics and spatial relationships of playing fields can tell us about sports and the cultures that create them Cleary s scholarly background and personal experience as a fencer and soccer referee led him to the questions that drive this project In this relatively brief meditation on physical space in sports he argues convincingly that related inquiries in one domain can inspire new readings in others while respecting the unique qualities of each The Sports Center fan the architecture enthusiast and the balletomane have more to discuss than they may think The subjects of Cleary s intriguing new readings range widely from the translucent

As we increasingly communicate and express our social and cultural identities through images in today's culture and economy visual culture has become a burgeoning area of study and research in many academic institutions In light of this public theology must engage with this complex field The concept of iconicity is raising fresh inquiries within the realm of public theology which is already rife with hermeneutic concerns These questions must be revisited as images compel us to reassess our ongoing approach to the interpretation of religion The potency of images is an uncharted and potent force propelling public theology towards a future that is yet to be discovered

Aesthetics After Metaphysics Miguel Beistegui, 2012-08-21 This book focuses on a dimension of art which the philosophical tradition from Plato to Hegel and even Adorno has consistently overlooked such was its commitment explicit or implicit to mimesis and the metaphysics of truth it presupposes De Beistegui refers to this dimension which unfolds outside the space that stretches between the sensible and the supersensible the space of metaphysics itself as the hypersensible and show how the operation of art to which it corresponds is best described as metaphorical The movement of the book then is from the classical or metaphysical aesthetics of mimesis Part One to the aesthetics of the hypersensible and metaphor Part Two Against much of the history of aesthetics and the metaphysical discourse on art he argues that the philosophical value of art doesn't consist in its ability to bridge the space between the sensible and the supersensible or the image and the Idea and reveal the sensible as proto conceptual but to open up a different sense of the sensible His aim then is to shift the place and role that philosophy attributes to art

Public Space and an Interdisciplinary Approach to Design Ettore Vadini, 2018-02-28 The crisis of contemporary public space is a question of interest to all architects The economic social and cultural crisis in particular affecting the entire European continent is clearly and originally reflected in the public spaces of our cities more and more of which are now considered heritage Public space and the public realm due to their original facets are once again a theme of interest for architects but also for philosophers sociologists and anthropologists J Habermas D Innerarity Z Bauman M Aug as complex spaces to be decomposed Hence a few questions Does the analysis of public space and an approach to design in a reality that considers a different concept of public than that of the past century comport a new way of looking A new urban architectural nomenclature An interdisciplinary approach to design The general situation described in this publication in various authors from different disciplinary backgrounds clearly expresses the tangible need to provide or provide once again positive responses to different questions before proceeding with the design or analysis of contemporary public space

Law, Cinema, and the Ill City Anne Wagner, Le Cheng, 2019-04-26 This book uses film and television as a resource for addressing the social and legal ills of the city It presents a range of approaches to view the ill city through cinematic and televisual characterization in urban frameworks political contexts and cultural settings Each chapter deconstructs the meaning of urban space as public space while critically generating a focus on order and justice exploring issues such as state disorder lawlessness and revenge The approach presents a careful balance between theory and application The original and

novel ideas presented in this book will be essential reading for those interested in the presentation of law and place in cultural texts such as film **Daoist Resonances in Heidegger** David Chai, 2022-05-05 East Asian imagery resonates throughout Martin Heidegger's writings. In this exploration of the connections between Daoism and his thought, an international team of scholars consider why the Daodejing and Zhuangzi were texts he returned to repeatedly and the extent Heidegger adhered to Daoism's core doctrines. They discuss how Daoist thought provided him with a new perspective equipping him with images, concepts, and meanings that enabled him to continue his questioning of the nature of being. Exploring the environment, language, death, temporality, aesthetics, and race from the groundlessness of non-being, oneness, and the Way, they illustrate how these themes reverberate with ontological, spiritual, and epistemological potential. A lesson in the art of Daoist and cross-cultural ways of thinking, this collection marks the first sustained analysis of the influence of classical Daoism on a major 20th-century German philosopher **Collage and Architecture** Jennifer A.E.

Shields, 2014-01-03 Collage and Architecture is the first book to cover collage as a tool for design in architecture, making it a valuable resource for students and practitioners. Author Jennifer Shields uses the artworks and built projects of leading artists and architects such as Le Corbusier, Daniel Libeskind, and Teddy Cruz to illustrate the diversity of collage techniques. The six case study projects from Mexico, Argentina, Sweden, Norway, the United States, and Spain give you a global perspective of architecture as collage. Collage is an important instrument for analysis and design, and Shields's presentation of this versatile medium draws on decades of relevance in art and architecture to be adapted and transformed in your own work.

The Sculpted Ear Ryan McCormack, 2020-04-17 Sound and statuary have had a complicated relationship in Western aesthetic thought since antiquity. Taking as its focus the sounding statue, a type of anthropocentric statue that invites the viewer to imagine sounds the statue might make, *The Sculpted Ear* rethinks this relationship in light of discourses on aurality emerging within the field of sound studies. Ryan McCormack argues that the sounding statue is best thought of not as an aesthetic object but as an event heard by people and subsequently conceptualized into being through acts of writing and performance. Constructing a history in which hearing plays an integral role in ideas about anthropocentric statuary, McCormack begins with the ancient sculpture of Laocoön before moving to a discussion of the early modern automaton known as Tipu's Tiger and the statue of the Commendatore in Mozart's *Don Giovanni*. Finally, he examines statues of people from the present and the past, including the singer Josephine Baker, the violinist Aleksandar Nikolov, and the actor Bob Newhart, with each case touching on some of the issues that have historically plagued the aesthetic viability of the sounding statue. McCormack convincingly demonstrates how sounding statues have served as important precursors and continuing contributors to modern ideas about the ontology of sound, technologies of sound reproduction, and performance practices blurring traditional divides between music, sculpture, and the other arts. A compelling narrative that illuminates the stories of individual sculptural objects and the audiences that hear them, this book will appeal to anyone interested in the connections

between aural and statues in the Western world in particular scholars and students of sound studies and sensory history
