Myths, Amnesia and Reality in Military Conflicts, 1935-1945 Pier Paolo

Battistelli, Andrew Sangster, 2017-01-06 Stalin fabricated the myth that the Germans carried out the Katy massacre and the West accepted it while always suspecting the reality In the same way each country tried to forget the more painful memories of its past and construct its own mythology The Germans were never taken to task at Nuremberg for bombing because the Anglo Americans virtually carried out a war of annihilation The French Gaullist myth was that it was decadent politicians who caused the defeat and that fighting France freed itself In a similar vein the Italian resistance was fostered as a myth and used postwar to cover the fascist period of their history British and American popular history tends to portray their countries as the main victors often ignoring the massive Russian contribution and generally concentrates on the barbarity of the Eastern war Much is forgotten and much enhanced both incidents and leaders The Italian military historian of this book writes in depth about the Italian war so often ignored in western history and tackles the myth of Italian cowardice while the British author takes a cold calculated look at Anglo American leaders such as Montgomery Mountbatten Clark Patton and questions

the myth of the special relationship between Great Britain and the USA as well as the official and unofficial amnesia relating to self inflicted gas wounds in Italy

Myth and Identity in the Epic of Imperial Spain Elizabeth B. Davis, 2000 The first in depth analysis of some of the most important epic poems of the Spanish Golden Age Myth and Identity in the Epic of Imperial Spain breathes new life into five of these long neglected texts Elizabeth Davis demonstrates that the epic must not be overlooked for doing so creates a significant gap in one's ability to appraise not only the cultural practice of the imperial age but also the purest expression of its ideology Davis's study focuses on heroic poetry written from 1569 to 1611 including Alonso de Ercilla's *La Araucana* undeniably the most significant epic poem of its time Also included are Diego de Hojeda's *La Christiada* Juan Rufo's *La Austriada* Lope de Vega's *Jerusalem Conquistada* and Cristóbal de Virués's *Historia del Monserrate* Examining these epics as the major site for the construction of cultural identities and Renaissance nationalist myths Davis analyzes the means by which the epic constructs a Spanish sense of self Because this sense of identity is not easily susceptible to direct representation it is often derived in opposition to an other which serves to reaffirm Spanish cultural superiority The Spanish Christian caballeros are almost always pitted against Amerindians Muslims Jews or other adversaries portrayed as backward or heathen for their cultural and ethnic differences The pro Castilian elite of sixteenth century Spain faced the daunting task of constructing unity at home in the process of expansion and conquest abroad yet ethnic and regional differences in the Iberian Peninsula made the creation of an imperial identity particularly difficult The epic as Davis shows strains to convey the overriding image of a Spain that appears more unified than the Spanish empire ever truly was An important reexamination of the Golden Age canon Myth and Identity in the Epic of Imperial Spain brings a new twist to the study of canon formation While Davis does not ignore more traditional approaches to the literary text she does apply recent theories such as deconstruction and feminist criticism to these poems resulting in an innovative examination of the material Confronting such issues as canonicity gender the relationship between literature and Golden Age culture and that between art and power this publication offers scholars a new perspective for assessing Golden Age and Transatlantic studies

armies in the Crimea nor a study of the diplomacy of the conflict The core concern is with grand strategy the development and implementation of national policy and strategy The key concepts are strategic derived from the works of Carl von Clausewitz and Sir Julian Corbett and the main focus is on naval not military operations This original approach rejected the Continentalist orthodoxy that dominated contemporary writing about the history of war reflecting an era when British security policy was dominated by Inner German Frontier the British Army of the Rhine and Air Force Germany Originally published in 1990 the book appeared just as the Cold War ended the strategic landscape for Britain began shifting away from the continent and new commitments were emerging that heralded a return to maritime strategy as adumbrated in the defence policy papers of the 1990s With a new introduction that contextualises the 1990 text and situates it in the developing historiography of the Crimean War the new edition makes this essential book available to a new generation of scholars
