Spain Under the Habsburgs: Empire and absolutism John Lynch, 1964 Spain Under the Habsburgs: Spain and America, 1598-1700 John Lynch, 1969 Spain Under the Habsburgs John Lynch, 1981 **Spain Under the Habsburgs: Empire and absolutism, 1516-1598** John Lynch, 1964 **A History of the Habsburg Empire 1273-1700** Jean Berenger, C.A. Simpson, 2014-07-22 The first part of a two volume history of the Habsburg Empire from its medieval origins to its dismemberment in the First World War This important volume which is self contained meets a long felt need for a systematic survey in English of the Habsburgs and their lands in the late medieval and early modern periods It is primarily concerned with the Habsburg territories in central and northern Europe but the history of the Spanish Habsburgs in Spain and the Netherlands is also covered The book like the Habsburgs themselves deals with an immense range of lands and peoples clear balanced and authoritative it is a remarkable feat of synthesis and exposition **The Habsburgs** Benjamin Curtis, 2013-07-18 The Habsburgs rank among the most celebrated ruling dynasties in history At one point their territories stretched not only across Europe but across the globe into Asia Africa and the Americas By virtue of their long pre eminence the family made an indelible mark on European affairs shaping the course of international politics and diplomacy and knitting together the diverse peoples of Central Europe The story of the Habsburgs is theatrical and compelling but it is also vital for understanding how kings ruled nations rose and societies changed as modern Europe came into being In this book Benjamin Curtis explores both the Spanish and Austrian branches of the dynasty providing a concise comprehensive picture of the dynasty's development This study clearly demonstrates why the Habsburgs are considered the most consistently accomplished practitioners of European dynasticism The Royal Chapel in the Time of the Habsburgs Juan José Carreras López, Bernardo José García García, Tess Knighton, 2005 Focusing on the royal chapel established by Philip II in Madrid the essays in this richly illustrated volume offer a series of different perspectives on the development of the main court chapels of Europe English version edited by Tess Knighton The royal chapel in Europe as a whole and in Spain in particular was a cultural institution where court ceremonial politics music and the arts were brought together in terms of space and function The ramifications for the patronage and cultivation of the arts and the dynamic between music and the arts and the concept of kingship form the focus of the text The phenomenon of groupings of singers chaplains and musicians at the service of the different European monarchies is of great significance both for the history of music and the political and cultural history of the court in general The royal chapel established by Philip II in Madrid was the central religious and musical institution of royal power until well into the eighteenth century and using this as a focus the essays in this richly illustrated volume offer a series of different perspectives on the development of the main court chapels of Europe These papers were delivered at the international seminar La Real Capilla de Palacio en la época de los Austrias under the auspices of the Fundación Carlos de Amberes Madrid from 14 to 16 December 2000 The volume is edited by Tess Knighton Juan José Carreras and Bernardo García

a García and translated by Yolanda Acker **Spain and Its World, 1500-1700** John Huxtable Elliott, 1989-01-01 It used to be said that the sun never set on the empire of the King of Spain. It was therefore appropriate that Emperor Charles V should have commissioned from Battista Agnese in 1543 a world map as a birthday present for his sixteen year old son the future Philip II. This was the world as Charles V and his successors of the House of Austria knew it: a world crossed by the golden path of the treasure fleets that linked Spain to the riches of the Indies. It is this world with Spain at its center that forms the subject of this book. J. H. Elliott, the pre-eminent historian of early modern Spain and its world, originally published these essays in a variety of books and journals. They have here been grouped into four sections each with an introduction outlining the circumstances in which they were written and offering additional reflections. The first section on the American world explores the links between Spain and its American possessions. The second section, The European World, extends beyond the Castilian center of the Iberian peninsula and its Catalan periphery to embrace sixteenth and seventeenth century Europe as a whole. In The World of the Court the author looks at the character of the court of the Spanish Habsburgs and the perennially uneasy relationship between the world of political power and the world of arts and letters. The final section is devoted to the great historical question of the decline of Spain, a question that continues to resonate in the Anglo-American world of today.

Music and Musicians in the Escorial: Liturgy Under the Habsburgs, 1563-1700 Michael John Noone, 1998 This study explores the composition and performance of liturgical music in El Escorial from its founding by Philip II in 1563 to the death of Charles II in 1700. Philip II promoted within his monastery palace a musical foundation whose dual function as royal chapel and as monastery in the service of a Counter Reformation monarch was unique. The study traces the ways in which music styles and practices responded to the changing functions of the institution. Perceived notions about Spanish royal musical patronage are challenged; musical manuscripts are scrutinized; biographical details of hundreds of musicians are uncovered and musical practices are examined. Additionally, two important choral pieces are printed here for the first time.

Portuguese Trade in Asia Under the Habsburgs, 1580-1640 James C. Boyajian, 2008-02-04 This fascinating history reassesses the consequences of Portugal's flourishing private trade with Asia, including increased tensions between the growing urban merchant class and the still dominant landed aristocracy. James C. Boyajian shows how Portuguese Asian commerce formed part of a global trading network that linked not only Europe and Asia but also for the first time Asia, West Africa, Brazil, and Spanish America. He also argues that contrary to previous scholarly opinion, nearly half of the Portuguese Asian trade was controlled by New Christians, descendants of Iberian Jews forcibly converted to Christianity in the 1490s.

Signs of Power in Habsburg Spain and the New World Jason McCloskey, Ignacio López Alemán, 2013-03-22 Signs of Power in Habsburg Spain and the New World explores the representation of political, economic, military, religious, and juridical power in texts and artifacts from early modern Spain and her American viceroyalties. In addition to analyzing the dynamics of power in written texts, chapters also examine pieces of material culture including coats of arms, coins, paintings, and

engravings As the essays demonstrate many of these objects work to transform the amorphous concept of power into a material reality with considerable symbolic dimensions subject to and dependent on interpretation With its broad approach to the discourses of power Signs of Power brings together studies of both canonical literary works as well as more obscure texts and objects The position of the works studied with respect to the official center of power also varies Whereas certain essays focus on the ways in which portrayals of power champion the aspirations of the Spanish Crown other essays attend to voices of dissent that effectively call into question that authority

The Habsburgs Martyn Rady, 2020-08-25 The definitive history of a powerful family dynasty who dominated Europe for centuries from their rise to power to their eventual downfall In The Habsburgs Martyn Rady tells the epic story of a dynasty and the world it built and then lost over nearly a millennium From modest origins the Habsburgs gained control of the Holy Roman Empire in the fifteenth century Then in just a few decades their possessions rapidly expanded to take in a large part of Europe stretching from Hungary to Spain and parts of the New World and the Far East The Habsburgs continued to dominate Central Europe through the First World War Historians often depict the Habsburgs as leaders of a ramshackle empire But Rady reveals their enduring power driven by the belief that they were destined to rule the world as defenders of the Roman Catholic Church guarantors of peace and patrons of learning The Habsburgs is the definitive history of a remarkable dynasty that forever changed Europe and the world

Escorial John Adamson, 2028-03-02 A portrait of the rhythms and rituals of the magnificent court of the Spanish Habsburgs during Spain's sixteenth and seventeenth century Golden Age Of all the European courts between the Renaissance and the French Revolution none exercised a greater influence than the court of the Spanish Habsburgs in the Castilian fastness of El Escorial northwest of Madrid Their rule in the Iberian Peninsula from 1516 when the dynasty acquired the Kingdoms of Castile and Aragon until the extinction of the Spanish Habsburg line in 1700 coincided with Spain's Golden Age And for much of that period the Iberian kingdoms constituted Europe's dominant imperial superpower Its ships settlers soldiers and priests extended Spanish Habsburg rule from Peru in the Americas to its faraway colonies in the Philippines the one Asian state that still bears the name of a Spanish Habsburg king And the wealth that flowed in from these global possessions gold silver sugar spices exotic woods sustained a court that for much of the sixteenth and seventeenth centuries was the most opulent and magnificently housed in Europe

Spain and Portugal in the New World, 1492-1700 Lyle N. McAlister, 1984 Spanish and Portuguese expansion substantially altered the social political and economic contours of the modern world In his book Lyle McAlister provides a narrative and interpretive history of the exploration and settlement of the Americas by Spain and Portugal McAlister divides this period and the book into three parts First he describes the formation of Old World societies with particular attention to those features that influenced the directions and forms of overseas expansion Second he traces the dynamic processes of conquest and colonization that between 1492 and about 1570 firmly established Spanish and Portuguese dominion in the New World The third part deals with colonial growth and

consolidation down to about 1700 McAlister's main themes are the post conquest territorial expansion that established the limits of what later came to be called Latin America the emergence of distinctively Spanish and Portuguese American societies and economies the formation of systems of imperial control and exploitation and the ways in which conflicts between imperial and American interests were reconciled This comprehensive history with its extensive bibliographic essay and attention to historiographic issues will be a standard reference for students and scholars of the period

The Habsburg Monarchy, 1618-1815 Charles W. Ingrao, 2000-06-29 This is a revised and updated edition of a highly acclaimed history of the early modern Habsburg monarchy Charles W. Ingrao challenges the conventional notion of Habsburg state and society as peculiarly backward by tracing its emergence as a military and cultural power of enormous influence The Habsburg monarchy was undeniably different from other European polities geography and linguistic diversity made this inevitable but by 1789 it had laid the groundwork for a single polity capable of transcending its uniquely diverse cultural and
