The Body in Autobiography and Autobiographical Novels Menotti Lerro, 2018-10-12 This volume explores a web of complex relationships between body and mind discussing the efforts of individuals from a wide variety of backgrounds to define to achieve or to reject the normal and in some cases to put something else in its place After considering the problems arising from other people's perceptions of non standard bodies the book turns to gender is it written upon the body established at birth determined only by physical traits and distinguished by material things such as clothes or is it written within the body defined through the subject's own feelings It considers what happens when males consider themselves female and females consider themselves male It concludes with the analysis of four books by different authors with different sexual orientations Two of these volumes might be considered genuine

Political Institutions Josep M. Colomer,2001-02-01 The role of institutions is to establish the domains of public activity and the rules to select leaders Democratic regimes organize in simple institutional frameworks to foster the concentration of power and alternative successive absolute winners and losers They favour political satisfaction of relatively small groups as well as policy instability In contrast pluralistic institutions produce multiple winners including multiparty co operation and agreements They favour stable moderate and consensual policies that can satisfy large groups interests on a great number of issues The more complex the political institutions the more stable and socially efficient the outcome will be This book develops an extensive analysis of this relationship It explores concepts questions and insights based on social choice theory while empirical focus is cast on more than 40 democratic countries and a few international organizations from late medieval times to the present The book argues that pluralistic democratic institutions are judged to be better than simple formula of their higher capacity of producing socially satisfactory results **The EU's Target for Renewable Energy** Great Britain. Parliament. House of Lords. European Union Committee,2008 Presents evidence that is taken before Sub committee B Internal Market *Medical Miracles* Jacalyn Duffin,2009 Modern culture tends to separate medicine and miracles but their histories are closely intertwined The Roman Catholic Church recognizes saints through canonization based on evidence that they worked miracles as signs of their proximity to God Physicianhistorian Jacalyn Duffin has examined Vatican sources on 1400 miracles from six continents and spanning four centuries Overwhelmingly the miracles cited in canonizations between 1588 and 1999 are healings and the majority entail medical care and physician testimony These remarkable records contain

intimate stories of illness prayer and treatment as told by people who rarely leave traces peasants and illiterates men and women old and young A woman's breast tumor melts away a man's wounds knit a lame girl suddenly walks a dead baby revives Suspicious of wishful thinking or naive enthusiasm skeptical clergy shaped the inquiries to identify recoveries that remain unexplained by the best doctors of the era The tales of healing are supplemented with substantial testimony from these physicians Some elements of the miracles change through time Duffin shows that doctors increase in number new technologies are embraced quickly diagnoses shift with altered capabilities But other aspects of the miracles are stable The narratives follow a dramatic structure shaped by the formal questions asked of each witness and by perennial reactions to illness and healing In this history medicine and religion emerge as parallel endeavors aimed at deriving meaningful signs from particular instances of human distress signs to explain alleviate and console in confrontation with suffering and mortality A lively sweeping analysis of a fascinating set of records this book also poses an exciting methodological challenge to historians miracle stories are a vital source not only on the thoughts and feelings of ordinary people but also on medical science and its practitioners
