important technical features His study shows that since the end of the Cold War all but a few European navies have significantly decreased in size and thus have ceded important capabilities along the way Based on the understanding of sea power as a prerequisite for political influence and economic health the consequences of the geopolitical shift toward the Asian Pacific region and most importantly the general decline of Europe s traditional naval capabilities the author concludes that the ability of European states to influence events near and abroad by means of their naval forces has atrophied and will continue to be called into question in the future Trade and Peace with Old Spain, 1667-1750 Jean O.
