Santos, 1982 **The Publishers' Trade List Annual**, 1984 **Text, Speech and Dialogue** Petr Sojka, Ivan Kopecek, Karel Pala, 2003-08-02 The Text Speech and Dialogue TSD Conference 2002 it should be noticed is now being held for the fifth time and we are pleased to observe that in its short history it has turned out to be an international forum successfully intertwining the basic fields of NLP It is our strong hope that the conference contributes to a better understanding between researchers from the various areas and promotes more intensive mutual cooperation So far the communication between man and computers has displayed a one way nature humans have to know how the machines work and only then can they understand them The opposite however is still quite far from being real our understanding of how our user friendly computers can understand us humans is not deep enough yet A lot of work has to be done both in the near and distant future Let TSD 2002 be a modest contribution to this goal The conference also serves well in its second purpose to facilitate researchers meeting in the NLP field from Western and Eastern Europe Moreover many participants now come from other parts of the world thus making TSD a real crossroads for researchers in the NLP area This volume contains the proceedings of this conference held in Brno September 9-12 2002 We were honored to have as keynote speakers James Pustejovsky from Brandeis University and Ronald Cole from the University of Colorado We would like to thank all the Program Committee members and external reviewers for their conscientious and diligent reviewing work

Education Modern languages Linguistic Informatics □ State of the Art and the Future Yuji Kawaguchi, Susumu Zaima, Toshihiro Takagaki, Kohji Shibano, Mayumi Usami, 2005-04-14 It is widely believed that linguistic theories and information technology have considerably influenced foreign language education. However, the collaboration of these three domains has not brought about new scientific results. It is thus our attempt to realize an integration of theoretical and applied linguistics on the basis of computer sciences and establish a new synthetic field called Linguistic Informatics. The present volume constitutes the Proceedings of the First International Conference on Linguistic Informatics held at Tokyo University of Foreign Studies (TUFS) in December 2003. The volume is comprised of five chapters: 1 Computer Assisted Linguistics: Potential for collaboration between linguistics and informatics; 2 Corpus Linguistics: Status report on corpus based linguistic research; 3 Applied Linguistics: Relationship between second language acquisition and linguistic theory; 4 Discourse Analysis and Language Teaching: Current status of natural dialogue based discourse analysis; 5 TUFS Language Modules: Development of multilingual e-learning materials covering 17 different languages.
