Geography in America at the Dawn of the 21st Century Gary L. Gaile, Cort J. Willmott, 2004-02-05 Geography in America at the Dawn of the 21st Century surveys American geographers current research in their specialty areas and tracks trends and innovations in the many subfields of geography As such it is both a state of the discipline assessment and a topical reference It includes an introduction by the editors and 48 chapters each on a specific specialty The authors of each chapter were chosen by their specialty group of the American Association of Geographers AAG Based on a process of review and revision the chapters in this volume have become truly representative of the recent scholarship of American geographers While it focuses on work since 1990 it additionally includes related prior work and work by non American geographers Includes a foreword by the eminent geographer Gilbert White

Hispanic Spaces, Latino Places Daniel D. Arreola, 2009-07-21 Hispanics Latinos are the largest ethnic minority in the United States but they are far from being a homogenous group Mexican Americans in the Southwest have roots that extend back four centuries while Dominicans and Salvadorans are very recent immigrants Cuban Americans in South Florida have very different occupational achievements employment levels and income from immigrant Guatemalans who work in the poultry industry in Virginia In fact the only characteristic shared by all Hispanics Latinos in the United States is birth or ancestry in a Spanish speaking country In this book sixteen geographers and two sociologists map the regional and cultural diversity of the Hispanic Latino population of the United States They report on Hispanic communities in all sections of the country showing how factors such as people s country culture of origin length of time in the United States and relations with non Hispanic society have interacted to create a wide variety of Hispanic communities Identifying larger trends they also discuss the common characteristics of three types of Hispanic communities those that have always been predominantly Hispanic those that have become Anglo dominated and those in which Hispanics are just becoming a significant portion of the population

Enemy in the Blood Eric D. Carter, 2012-01-06 Enemy in the Blood Malaria Environment and Development in Argentina examines the dramatic yet mostly forgotten history of malaria control in northwest Argentina Carter traces the evolution of malaria science and policy in Argentina from the disease s emergence as a social problem in the 1890s to its effective eradication by 1950 Malaria control proponents saw the campaign as part of a larger project of constructing a modern identity for Argentina Insofar as development meant building a more productive rational and hygienic society the perceptions

of a culturally backwards and disease ridden interior prevented Argentina from joining the ranks of modern nations The path to eradication however was not easy due to complicated public health politics inappropriate application of foreign malaria control strategies and a habitual misreading of the distinctive ecology of malaria in the northwest especially the unique characteristics of the local mosquito vector Homegrown scientific expertise a populist public health agenda and an infusion of new technologies eventually brought a rapid end to malaria s scourge if not the cure for regional underdevelopment Enemy in the Blood sheds light on the often neglected history of northwest Argentina s interior adds to critical perspectives on the history of development and public health in modern Latin America and demonstrates the merits of integrative socialenvironmental research *American Reference Books Annual* Juneal M. Chenoweth,1995-04-15 With more than 1600 descriptive and evaluative entries ARBA continues its 26 year tradition as a comprehensive review source for reference works published or distributed in the US ARBA 95 encompasses the subject spectrum covering such broad areas as general reference history education economics and business and science and technology Of special note in this edition is increased coverage of CD ROM products More than 350 reviewers provide reviews that cover strengths and weaknesses of the reference works **ARBA Guide to Subject Encyclopedias and Dictionaries** Susan C. Awe,1997 Provides a selection of subject dictionaries and encyclopedias that would be useful in all types of libraries *Elsevier's Dictionary of Geography* Vladimir Kotlyakov,Anna Komarova,2006-12-20 Geography is a system of highly developed sciences about the environment Geographical science embracing the study of the Earth s physical phenomena people and their economic activities has always been in need of an extensive terminology Geographical terms are related to the terms of natural sciences physics chemistry biology geology etc and humanities history economics sociology etc since geography is based on these fundamental subjects Geography includes a number of disciplines and subdivisions which appeared along with the development of the science In spite of being very different geographical disciplines have some common tools of investigation which is maps comparative method of exploration remote sensing geoinformation systems Today very well developed terminologies of all the specialist fields of geography and related subjects exist in the main world languages However they are not always well correlated Nowadays geographical terminology requires unification and international correlation more than ever before Hence the idea of compiling a multilingual polydisciplinary dictionary The Dictionary consists of the basic table of terms arranged according to the order of the English alphabet with each term numbered Each entry consists of the term in English and its equivalents in Russian French German Spanish Short definitions of terms are given in English and in Russian The terms are supplied with the necessary grammar labels such as gender of nouns plural number etc The Dictionary combines two functions that of a defining dictionary and that of a bilingual dictionary These two functions are basically contradictory because usually the defining dictionary is aimed at giving one meaning of the word which is the main and essential one while the bilingual dictionary tries to give different equivalents of a given word in the other language in order to supply the user with maximum

possible translations differing in the shades of meanings thus giving him the possibility to choose the appropriate word But in our Dictionary we intentionally decided to combine the two functions defining and multilingual because a short definition of the term and equivalents in other languages help to achieve our main aim which consists in showing the basic geographical terminology and harmonizing it in several languages Having this into consideration we deliberately mixed two types of dictionaries in one Organized alphabetically via English Provides short definition of geographical terms in English and Russian Includes multilingual translation of terms from English to Russian French German Spanish *British Bulletin of Publications on Latin America, the Caribbean, Portugal and Spain* ,1998 Colonial Latin American Historical Review ,1994
