The House Sparrow John Henry Gurney,1885 **The Triumphant Tale of the House Sparrow** Jan Thornhill,2018-04-01 Behold the most despised bird in human history So begins Jan Thornhill s riveting beautifully illustrated story of the House Sparrow She traces the history of this perky little bird one of the most adaptable creatures on Earth from its beginnings in the Middle East to its spread with the growth of agriculture into India North Africa and Europe Everywhere the House Sparrow went it competed with humans for grain becoming such a pest that in some places sparrow catcher became an actual job and bounties were paid to those who got rid of it But not everyone hated the House Sparrow and in 1852 fifty pairs were released in New York City In no time at all the bird had spread from coast to coast Then suddenly at the turn of the century as cars took over from horses and there was less grain to be found its numbers began to decline As our homes gardens cities and farmland have changed providing fewer nesting and feeding opportunities the House Sparrow s numbers have begun to decline again though in England and Holland this decline appears to be slowing Perhaps this clever little bird is simply adapting once more This fascinating book includes the life history of the House Sparrow and descriptions of how the Ancient Egyptians fed it to the animals they later mummified how it traveled to Great Britain as a stowaway on ships carrying Roman soldiers and how its cousin the Eurasian Tree Sparrow was almost eradicated in China when Mao declared war on it A wealth of back matter material is also supplied **The House Sparrow at Home and Abroad - With Some Concluding Remarks Upon Its Usefulness, and Copious References to the Literature of the Subject** Thomas George Gentry,2007-10 PREFACE THE Author of this very practical treatise on Scotch Loch Fishing desires clearly that it

may be of use to all who had it He does not pretend to have written anything new but to have attempted to put what he has to say in as readable a form as possible Everything in the way of the history and habits of fish has been studiously avoided and technicalities have been used as sparingly as possible The writing of this book has afforded him pleasure in his leisure moments and that pleasure would be much increased if he knew that the perusal of it would create any bond of sympathy between himself and the angling community in general This section is interleaved with blank sheets for the readers notes The Author need hardly say that any suggestions addressed to the case of the publishers will meet with consideration in a future edition We do not pretend to write or enlarge upon a new subject Much has been said and written and well said and written too on the art of fishing but loch fishing has been rather looked upon as a second rate performance and to dispel this idea is one of the objects for which this present treatise has been written Far be it from us to say anything against fishing lawfully practised in any form but many pent up in our large towns will bear us out when we say that on the whole a days loch fishing is the most convenient One great matter is that the loch fisher is dependent on nothing but enough wind to curl the water and on a large loch it is very seldom that a dead calm prevails all day and can make his arrangements for a day weeks beforehand whereas the stream fisher is dependent for a good take on the state of the water and however pleasant and easy it may be for one living near the banks of a good trout stream or river it is quite another matter to arrange for a days river fishing if one is looking forward to a holiday at a date some weeks ahead Providence may favour the expectant angler with a good day and the water in order but experience has taught most of us that the good days are in the minority and that as is the case with our rapid running streams such as many of our northern streams are the water is either too large or too small unless as previously remarked you live near at hand and can catch it at its best A common belief in regard to loch fishing is that the tyro and the experienced angler have nearly the same chance in fishing the one from the stern and the other from the bow of the same boat Of all the absurd beliefs as to loch fishing this is one of the most absurd Try it Give the tyro either end of the boat he likes give him a cast of all flies he may fancy or even a cast similar to those which a crack may be using and if he catches one for every three the other has he may consider himself very lucky Of course there are lochs where the fish are not abundant and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught and where each has a fair chance Again it is said that the boatman has as much to do with catching trout in a loch as the angler Well we dont deny that In an untried loch it is necessary to have the guidance of a good boatman but the same argument holds good as to stream fishing

The Sparrow ,1986 **The Fall of the Sparrow** Nigel Marlin Balchin,1962 **The Sparrow** M. D. Russell,2010-02-23 **The House Sparrow at Home and Abroad** Thomas G. Gentry,2015-08-04 Excerpt from The House Sparrow at Home and Abroad With Some Concluding Remarks Upon Its Usefulness and Copious References to the Literature of the Subject In offering this little volume to the public the author feels confident that it will meet with a cordial reception from those who have neither the leisure nor the patience to make such

investigations as a work like the present requires In view of the many heated discussions which the sparrow has produced in this country tending to show its general usefulness or wholesale destructiveness a careful and critical survey of its life history detailing the minutest particulars thereof cannot fail to awaken attention and to command respect A desire to know the subject in all its bearings must certainly be of paramount importance Agriculturists and fruit growers mainly of all others will certainly reap the first fruits of such knowledge The facts which the writer has gleaned from various fields of observation but largely from his own at infinite pains and expense subserve in the highest degree the interests of humanity and should not be carelessly set aside or lightly considered With the disappearance of our highly insectivorous native species before the rapid and insolent advances of their hardy foreign brother and the consequent multiplication of insect foes must come the destruction of vegetation and the entailment of untold misery upon man and beast About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
