Ceschin,2012

Billy Sparrow was a little bird who lived in a small town He had a brother called Horatio and a little sister called Heloise The three little sparrows were only a few weeks old They lived in a corner of the roof of an old wooden house located right in the middle of the main city square Their little town was a beautiful place happy and clean There were many trees in the city square Oak trees aspen trees maple trees and birch trees With so many trees right in front of their home mom and dad sparrow didn't have to fly too far out in search of food for their three little birds Billy and his brother and his sister were too young to catch the insects they

needed to eat They couldn't fly at all and mom and dad had to come and go from tree to tree all day long to bring them their food The three little sparrows had no feathers But this was good because it was summer and their house was very hot day and night Sleeping was one of their favorite activities and they slept till late every day When they woke up mom and dad had already gone out to catch their breakfast Billy was the most active of the three little sparrows Right after getting out of bed he would sit by the front porch of his little house and stay there for hours looking at mom and dad flying from tree to tree catching insects for their children He also loved to look at the other birds that flew around the square Billy considered flight as the most wonderful thing in the world He couldn't wait for the time when he would start his training But it was too dangerous for a little bird with no feathers to sit like that for hours at the edge of the roof of a tall house It was especially dangerous because of Lucifer the big black cat that lived across the square from his house Lucifer was mean and extremely fast If Billy weren't careful he could fall to the ground and become cat food in a matter of seconds Father Sparrow kept warning him about that Billy he would say You have to learn to stay inside Move away from there right now and go sit in the living room with your brother and sister But dad Billy would always say If I sit in the living room I won't be able to see you flying out there Patiently Mr Sparrow always tried to change his son's mind I know son But if you fall you are going to hurt yourself and cry all day long There was no use Billy couldn't resist and would come out to the porch and sit at the edge of the roof right after breakfast He couldn't wait for the day when he too would take the leap into thin air and fly like a bird

**Flight Paths** Darryl McGrath, 2016-01-11 Finalist for the 2017 da Vinci Eye presented by Hopewell Publications In the late 1970s the bald eagle and the peregrine falcon were heading toward extinction victims of the combined threats of DDT habitat loss and lax regulation Flight Paths tells the story of how a small group of New York biologists raced against nature's clock to bring these two beloved birds back from the brink in record setting numbers In a narrative that reads like a suspense tale Darryl McGrath documents both rescue projects in never before published detail At Cornell University a team of scientists worked to crack the problem of how to breed peregrine falcons in captivity and then restore them to the wild Meanwhile two young untested biologists tackled the overwhelming assignment of rebuilding the bald eagle population from the state's last nesting pair one of whom the female was sterile McGrath interweaves this dramatic retelling with contemporary accounts of four at risk species the short eared owl the common loon the Bicknell's thrush and the piping plover She worked alongside biologists as they studied these elusive subjects in the Northeast's most remote regions and the result is a story that combines vivid narrative with accessible science and is as much a tribute to these experts as it is a call to action for threatened birds Readers are taken to a snow covered meadow as an owl hunts her prey a loon family's secluded pond an eagle nest above the Hudson River and a mountaintop at dusk in search of the Bicknell's thrush one of the planet's rarest birds Combining a little known chapter of New York's natural history with a deeply personal account of a lifelong devotion to birds Flight Paths is not only a story of our rapidly changing environment and a tribute to some of New York's

most heroic biologists but also a captivating read for anyone who has ever thrilled to the sight of a rare bird      *Flight Paths* Rebecca Heisman,2023-03-17 How and why birds navigate the skies travelling from continent to continent flying thousands of miles across the earth each autumn and spring has continually fascinated the human imagination but only recently have we been able to fully understand these amazing journeys How did this revolution come about *Flight Paths* is the never before told story of how an eccentric group of ornithologists engineers and other pioneering scientists have harnessed nearly every technological development of the last hundred years to understand bird migration in detail from where and when they take off their flight paths and behaviours their destinations and the challenges they face getting there In this fascinating and compelling story Rebecca Heisman uncovers the secret history of an ornithological arms race that not only helped solve the mystery of bird migration using radar radioactive isotopes satellites and the humble aluminium band but has also given us much needed insight into how best to protect and conserve the bird life we cherish      **Birds of Western Canada**
