Walter, 2003-10-16 This book first published in 1994 describes the development of Buenos Aires during the period from 1910 to the early 1940s focusing on the role of politics and local government in the evolution of the city The Creation of Modern Buenos Aires Joel Horowitz, 2024-04-01 The Creation of Modern Buenos Aires examines the impact of civic associations on the culture and the society of Buenos Aires and their ties to politics in the first decades of the twentieth century. The period saw the emergence of the modern political system with true appeals to the voters tremendous urban growth and the solidification of a barrio identity Historian Joel Horowitz examines four types of organizations football clubs bibliotecas populares popular libraries sociedades de fomento development societies that pushed for barrio improvements and universidades populares popular universities that provided practical training beyond the primary school level All four types became important social centers and were connected to the political world The book focuses on the period from the passage of a voting reform law in 1912 which made male citizen voting obligatory and fraud more difficult to the military coup of 1943 The book shows how civic associations helped create the social world of the city focusing especially on the part they played in the development of the sense of barrio It demonstrates how civic associations became vital links in the system of politics that emerged creating spaces for politicians to build connections to different communities <u>Urban Histories of Science</u> Oliver Hochadel, Agustí Nieto-Galan, 2018-09-20 This book tells ten urban histories of science from nine cities Athens Barcelona Budapest Buenos Aires Dublin 2 articles Glasgow Helsinki Lisbon and Naples situated on the geographical margins of Europe and beyond Ranging from the mid nineteenth to the early twentieth centuries the contents of this volume debate why and how we should study the scientific culture of cities often considered peripheral in terms of their production of knowledge How were scientific practices debates and innovations intertwined with the highly dynamic urban space around 1900 The authors analyze zoological gardens research stations observatories and international exhibitions along with hospitals newspapers backstreets and private homes while also stressing the importance of concrete urban spaces for the production and appropriation of knowledge They uncover the diversity of actors and urban publics ranging from engineers scientists architects and physicians to journalists tuberculosis patients and fishermen Looking at these nine cities around 1900 is like glancing at a prism that produces different and even conflicting notions of modernity In their totality the ten case studies help to overcome an outdated centre periphery model This volume is thus able to address far more intriguing historiographical questions How do science technology and medicine shape the debates about modernity and national

Ellison, 1980 The Power of Place (RLE Social & Cultural Geography) John Agnew, James Duncan, 2014-01-10 Reflecting the revival of interest in a social theory that takes place and space seriously this book focuses on geographical place in the practice of social science and history There is significant interest among scholars from a range of disciplines in bringing together the geographical and sociological imaginations. The geographical imagination is a concrete and descriptive one concerned with determining the nature of places and classifying them and the links between them The sociological imagination aspires to explanation of human activities in terms of abstract social processes The chapters in this book focus on both the intellectual histories of the concept of place and on its empirical uses They show that place is as important for understanding contemporary America as it is for 18th century Sri Lanka They also show how the concept can provide insight into old problems such as the nature of social life in Renaissance Florence and Venice The editors are leading exponents of the view of place as a concept that can mediate the geographical and sociological imaginations Africa, Asia, and South America Since 1800 A. Baily, 2016-11-15 Most studies of immigration to the New World crime have focused on the United States Samuel L Baily's eagerly awaited book broadens that perspective through a comparative analysis of Italian immigrants to Buenos Aires and New York City before World War I It is one of the few works to trace Italians from their villages of origin to different destinations abroad Baily examines the adjustment of Italians in the two cities comparing such factors as employment opportunities skill levels pace of migration degree of prejudice and development of the Italian community Of the two destinations Buenos Aires offered Italians more extensive opportunities and those who elected to move there tended to have the appropriate education or training to succeed These immigrants who adjusted more rapidly than their North American counterparts adopted a long term strategy of investing savings in their New World home In New York in contrast the immigrants found fewer skilled and white collar jobs more competition from previous immigrant groups greater discrimination and a less supportive Italian enclave As a result rather than put down roots many sought to earn money as rapidly as possible and send their earnings back to family in Italy Baily views the migration process as a global phenomenon Building on his richly documented case studies the author briefly examines Italian communities in San Francisco Toronto and Sao Paulo He establishes a continuum of immigrant adjustment in urban settings creating a landmark study in both immigration and comparative history Buenos Aires Stanley R.
