between interested thinkers across fields who too often must labor and converse apart It offers the vantage point afforded by traversing old boundaries and exploring concerns shared by many scholars and researchers in international circles in pursuit of social and cultural innovation in the governance of work and education and advancing wider social debate **World Yearbook of Education 2008** Debbie Epstein, Rebecca Boden, Rosemary Deem, Fazal Rizvi, Susan Wright, 2013-01-11 This volume examines higher education in globalized conditions through a focus on the spatial historic and economic relations of power in which it is embedded Distinct geometries of power are emerging as the knowledge production capability of universities is increasingly globalized Changes in the organization and practices of higher education tend to travel from the West to the rest Thus distinctive geographies of knowledge are being produced intersected by geometries of power and raising questions about the recognition production control and usage of university produced knowledge in different regions of the world What flows of power and influence can be traced in the shifting geographies of higher education How do national systems locate themselves in global arenas and what consequences does such positioning have for local practices and relations of higher education How do universities and university workers respond to the increasing commodification of knowledge How do consumers of knowledge assess the quality of the goods on offer in a global marketplace The 2008 volume of the World yearbook addresses these questions highlighting four key areas Producing and Reproducing the University How is the university adapting to the pressures of globalization Supplying Knowledge What structural and cultural changes are demanded from the university in its new role as a free market supplier of knowledge Demanding Knowledge Marketing and Consumption How can consumers best assess the quality of education on a global scale Transnational Academic Flows What trends are evident in the flow of students knowledge and capital with what consequences The 2008 volume is interdisciplinary in its approach drawing on scholarship from accounting finance and human geography as well as from the field of education Transnational influences examined include UNESCO and OECD GATS and the effects of digital technologies Contrasting contexts include Central and Eastern Europe Finland China and India and England With its emphasis on the interrelationship of knowledge and power and its attention to emergent spatial inequalities Geographies of Knowledge Geometries of Power Framing the Future of Higher Education provides a rich and compelling resource for understanding emergent practices and relations of knowledge production and exchange in global higher education

Globalisation and Education Policy Reform in Botswana Richard Tabulawa, 2023-07-21 This book uses the global local dialect approach to explicate education policy reform in Botswana and interrogates the practical effects of the various education policies on curriculum pedagogy and governance of the Botswana General Education system Considering the effect of three reform policies since Botswana's Independence in 1966 the book evaluates the performance of each of the policies and examines their consequences in terms of the interplay of global forces and domestic pressures The result of this interplay has been an education landscape that while reflecting globally circulating education discourses markedly differs

from those same discourses The book argues that the State in Botswana has appropriated education policy to legitimate itself in times of crisis and that each policy has improved access to general education but collectively have failed to improve its quality making suggestions for how this can be improved in the future As the first book of its kind to delve into education in Botswana from a single authored critical lens the book will be a highly relevant reading for academics researchers and post graduate students of African education comparative education education policy and curriculum studies Local Economic and Employment Development (LEED) Better Use of Skills in the Workplace Why It Matters for Productivity and Local Jobs OECD, International Labour Organization, 2017-11-02 This joint OECD ILO report provides a comparative analysis of case studies focusing on improving skills use in the workplace across eight countries **The SAGE Handbook of Research in International Education** Mary Hayden, Jeff Thompson, Jack Levy, 2007-01-03 The editors of the SAGE Handbook of Research in International Education have brought together an impressive array of scholars whose cutting edge research addresses the growing field of international education from the experiences of K 12 schools around the world to the field of teacher education This book raises important questions and should be read by a broad audience Kenneth Cushner Executive Director of International Affairs and Professor of Education Kent State University The editors of this admirable handbook have set out to produce a report on international education Their consummate success in doing so gives those of us working in the field a new and invaluable resource The editors may be academics but this is a book largely written by about and for those whose job it is to teach internationally No one working in international education will fail to be provoked challenged or inspired by the compelling arguments advanced within this authoritative volume Peter MacKenzie Principal Hiroshima International School The book is well organized in carefully integrated sections and chapters and the references alone are a valuable bibliographical tool An indispensable work highly recommended for education reference collections and the libraries of individual researchers J B Thomas Emeritus Professor of Educational Studies Loughborough University Interest in the field of international education has never been more intense than at present There are a rapidly increasing number of schools worldwide set up specifically to meet the demands of those parents who through their own professional activities wish to have their sons and daughters educated in schools that offer programmes based on international values Such schools have embraced the promotion of international education as one of their major goals and consequently an increasing number of organisations currently offer curricula that claim to be international in nature Such global movements have created a parallel increase in the incorporation of forms of international education within national school systems throughout the world This has resulted in wider forms of collaboration between schools in the public and private sectors nationally and internationally generating a much more substantial base of professional experience in the implementation of schemes for international education than had previously existed This book analyses the origins contributions and interpretations of international education The authors identify approaches to research that will progress our knowledge and understanding of the field and

extend and even redraw it on the basis of the research evidence presented Content includes A historical overview of the ways in which the term international education has been interpreted The theoretical interpretation of international education in its current context International education in practice exploration of the issues in terms of students curricula pedagogies and organising formal institutions Conceptual challenges for international education in the future This handbook is an essential resource for those who are involved in the practice and academic study of international education It will be of particular interest to researchers and teachers in universities governmental and private curriculum development agencies examination authorities administrators and teachers in schools This volume is another valuable SAGE contribution to the expanding literature on international education Not all handbooks are described as essential reading but this one will be and will become an indispensable work of reference highly recommended for education libraries both academic and governmental and for the bookshelves of individual researchers and all involved in international education the three editors and their fellow authors can take a collective pride in having given us an excellent volume which very successfully completes a chronological and theoretical journey through the issues practices and future questions presented by international research and practice in international education Journal of Research in International Education Third International Handbook of Globalisation, Education and Policy Research Joseph Zajda, 2021-09-17 This handbook presents a global overview of current research in education and education policy reforms during the last decade It provides an accessible practical and comparative source of current research that examines the intersecting and diverse discourses of this important issue It first examines globalisation education and policy research and reforms in higher education including coverage of main trends in education and policy reforms globally as well as specific policy issues such as gender equity minorities and human rights Next the handbook offers a comparative perspective that evaluates the ambivalent and problematic relationship between globalisation the state and education reforms globally It features coverage on curricula issues and education reforms in schools around the world the curriculum in the global culture as well as globalisation and education futures with respect to social justice and human rights The handbook contributes to a better and a more holistic understanding of the education reforms and research nexus offering possible strategies for the effective and pragmatic policy planning and implementation at the local regional and national levels It will serve as a vital sourcebook of ideas for researchers practitioners and policy makers in education
