The Comparative Study Of Religions:

A Comparative Study of Religions Mugambi, J.N.K.,2015-03-16 This book is the result of concerted teamwork among the academia staff of the Department of Religious Studies University of Nairobi between 1986 and 1990 The Project was prompted by the necessity to produce relevant and comprehensive textbooks for the undergraduate degree programme The book has remained in demand confirming the relevance and quality of its content covering the whole range of major religions of the world with extensive geographical and historical scope It includes a specific section on African Religion thus placing the African Religious Heritage within the mainstream of the comparative study of the world's religions

The Comparative Study of Religions Joachim Wach,1958 **A Comparative Study of Religions** Y. Masih,2013-01-01 A Comparative Study of Religions has been written by a scholar who has occupied himself with the subject of religion for over fifty years But no finality can be claimed the reason is that religion deals with what is transcendent in the sense that it deals with what man is going to be Advaitism terms this futuristic end as becoming Brahman Jainism as regaining one's pristine glory theists as becoming gold fit for heaven However Bergson and other evolutionists would say that religion is a collective and cooperative effort of men to become gods This simply means the divinising of man what Aurobindo calls supermind They refer to a state beyond human ills beyond human infatuation and beyond the befogging of human intellect This is known in Jainism as sarvajnata One thing is clear that fighting with other human beings in the name of religion is subhuman As religious men we are fellow travellers in the direction of the realm of spirit Here the nomenclature of Hindus Muslims Christians etc ceases to be meaningful Of course we have to go very far and we have not made any beginning yet However at present the advaitic principle of differences Brahman can serve the purpose of harmonizing all religions Here we have adopted this principle Secondly the key concepts of different religions have been shown to mingle with one another *The Comparative Study of Religions* Alban Gregory Widgery,1922 **The Comparative Study of Religions** Alban Gregory Widgery,1923

Religious Worlds William E. Paden,1994-08-01 From Gods to ritual observance to the language of myth and the distinction between the sacred and the profane Religious Worlds explores the structures common to all spiritual traditions

Religion John Gaines Vaughan,2015-06-02 Excerpt from Religion A Comparative Study The author has a definite purpose in offering this book to the public He is aware that there are many valuable works on the subject of Comparative Religion He regards some of them as too voluminous and technical for the average reader who is seeking an intelligent understanding of the Great Religions of the world Others show unmistakable signs of having been made in Germany and as being a part of the destructive higher criticism that has done harm to the cause of Christianity Some of these volumes are admirable in every way but are so condensed they do not give a general survey of the field The present work will doubtless prove equally unsatisfactory to many readers but if others get as much pleasure and profit from its perusal as the author has in its preparation he will be well paid We have treated the subject under three general heads I The Science of Comparative

Religion II The History of Religions III The Comparison of Religions The religious idea is one and innate but as this idea is expressed by different peoples it is colored by the medium through which it passes About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Comparative Studies in History of Religions Erik Reenberg Sand, Jørgen Podemann Sørensen, 1999 It was Max Müller who coined the famous motto of the comparative study of religion He who knows one knows none Since its first beginning in the second half of the nineteenth century the history of religions has always somehow invoked comparative insights as its very raison d'être The nature of these insights has been under constant debate and at times scepticism and devastating critique of the more pretentious comparative projects made regionally specialized studies seem the only legitimate enterprise within the discipline The fact remains however that the major general issues addressed by historians of religions are rooted in considerations of a comparative nature The dossier of papers from an international conference held at the University of Copenhagen discusses tradition as well as new approaches to the fundamental issues of the aim scope and validity of comparative studies in history of religions No longer bound to monolithic visions of history and human nature these papers critically explore the limits and the roles of comparison in the study of religion

New Patterns for Comparative Religion William E. Paden, 2016-05-19 The cross cultural study of religion has always gone hand in hand with the worldview sciences or intellectual frameworks of the time These frames whether focused on psychology or politics gender or colonialism bring out perspectives for understanding religious behavior Today one of our common civic worldviews is represented in the shift from scriptural to evolutionary history This volume brings together in one place key essays by professor emeritus William Paden showing a progression of steps he has taken in exploring bridgeworks between comparative religion and evolutionary models of religious behavior One of the leading scholars in religious studies Paden shows ways that religion can be contextualized as part of the natural world and thus seen as reflecting the ingrained sociality and world making drive of the human species Paden argues that although comparativism has been challenged as too culture bound too western or too gendered cross over categories and concepts between religious traditions cannot be avoided Arguing that there are recurrent patterns of human behavior common to our species and that thereby underlie all cultures he proposes that the missing link in the Religion Evolution debate is comparative religion a global cross cultural perspective on religious behaviours throughout time Each article is contextualized within this overall trajectory of thought within Paden's work and the history of the discipline as a whole

scientific atheism structuralism and theories of religion From time to time the series publishes volumes that map the state of the art and the history of the discipline *Towards a Methodology for Comparative Studies in Religious Education* Oddrun M.H. Bråten, 2013 In this book Oddrun M H Br ten set out to utilise and test her methodology for comparative religious education This synthesises two sets of ideas The first includes supranational national and subnational processes Formal supranational processes refer to international educational policymaking in international organisations Informal supranational processes include secularisation pluralisation and globalisation Subnational processes refer to variations between regions within a country The second set of ideas concerns the societal institutional instructional and experiential levels of curriculum They are affected by supranational national and subnational processes In discussing the societal level attention needs to be given to the histories of religion state and school in each country Research at the institutional level involves analysis of relevant policy documents and legislation in each country while research at the instructional level involves analysis of how teachers interpret plan and teach the curriculum while the experiential level researches how students interact with one another and with teachers to develop their understanding A third set of ideas includes Br ten s use of Schiffauer and collaborators concepts of social national imaginary and civil enculturation These concepts help in grasping the historical and sociological depth of national traditions This publication is a groundbreaking study in the methodology of comparative religious education and the author won the award for Outstanding Research Student of 2009 2010 in the field of education at the University of Warwick *A Magic Still Dwells* Kimberley C. Patton, Benjamin C. Ray, 2000-01-11 In this assessment of the field of compartive religion this text surmounts the seemingly intractable division between postmodern scholars who reject the comparative endeavour and those who affirm it It brings together leading historians of religion from a range of backgrounds and vantage points **Considering Comparison** Oliver Freiberger, 2019-01-02 The comparative method is an integral part of religious studies All the technical terms that scholars of religion use on a daily basis such as ritual hagiography shrine authority fundamentalism hybridity and of course religion are comparative terms Yet comparison has been subject to criticism including postcolonialist and postmodernist critiques Older approaches are said to have used comparison primarily to confirm preconceptions about religion More recently comparison has been criticized as an act of abstraction that does injustice to the particular neglects differences and establishes a mostly Western power of definition over the rest of the world In this book Oliver Freiberger takes a closer look at how comparison works Revisiting critical debates and examining reflections in other disciplines including comparative history sociology comparative theology and anthropology Freiberger proposes a model of comparison that is based on a thorough epistemological analysis and that takes both the scholar s situatedness and his or her agency seriously Examining numerous examples of comparative studies *Considering Comparison* develops a methodological framework for conducting and evaluating such studies Freiberger suggests a comparative approach which he calls discourse comparison that confronts the omnipresent risks of

decontextualization essentialization and universalization This book makes a case for comparison arguing that it is indispensable for a deeper analytical understanding of what we call religion The book is intended to enrich the practice of both aspiring and seasoned comparativists stimulate much needed further discussions about comparative methodology and encourage more scholars to produce responsible comparative studies
