Melville Mendel C zanne Curie Br ncusi Einstein Wittgenstein Keynes and Goodall Blok shows how a significant proportion in fact benefited from social exclusion Beethoven s increasing deafness isolated him from his friends creating more time for composing and experimenting while Darwin s chronic illness gave him an excuse to avoid social gatherings and get on with his work Adversity took various forms including illegitimate birth early parental loss conflict with parents bankruptcy chronic illness physical deficiencies neurological and genetic disorders minority status peripheral origins poverty exile and detention Blok argues however that all these misfortunes had the same effect alienation from mainstream society As outsiders innovators could question conventional beliefs and practices With little to lose they could take chances and exploit opportunities With governments universities and industry all emphasizing the importance of investing in innovation typically understood to mean planned and focussed research teams this book runs counter to conventional wisdom For far more often radical innovation in science and art is entirely unscripted resulting from trial and error by individuals ready to take risks fail and start again
