laws in the United States and Canada the opioid crisis and the rising costs of pharmaceuticals have sharpened the public's awareness of drugs and their regulation. Government industry and the medical profession however have a mixed record when it comes to framing policies and generating knowledge to address drug use and misuse. In *Strange Trips* Lucas Richert investigates the myths, meanings and boundaries of recreational drugs, palliative care drugs and pharmaceuticals as well as struggles over product innovation, consumer protection and freedom of choice in the medical marketplace. Scrutinizing how we have conceptualized and regulated drugs amid the pressing and competing interests of state regulatory bodies, pharmaceutical and for-profit companies, scientific researchers and medical professionals, Richert asks how perceptions of a product shift from dangerous substance to medical breakthrough or vice versa. Through close examination of archival materials, accounts and records, he brings substances into conversation with each other and demonstrates the contentious relationship between scientific knowledge, cultural assumptions and social concerns. Weaving together stories of consumer resistance and government control, *Strange Trips* offers timely recommendations for the future of drug regulation.

Fashion & Merchandising Fads Frank Hoffmann, Beulah B Ramirez, 2014-06-23 Fads by nature and by definition are hard to capture yet Hoffmann and Bailey have captured over one hundred of the passing fashion fancies and merchandising miracles during America's short history in their latest collection of fads *Fashion Merchandising Fads*. Life devoid of fads is impossible to imagine and the fads that do enter our lives become vehicles for amusement upon retrospection. How long any fad stays in vogue is anybody's guess but Hoffmann and Bailey have again found those fads that somehow took root and flourished if only for a short period of time in America. Concise entries describe each fad from its beginning to its demise and its devout followers. Readers are sure to recognize many of the trends and fads collected in *Fashion Merchandising Fads*. As you browse through the contents, you will have readers smiling as they remember Alex Stroh's Beer Drinking Dog and Baby On Board Stickers, Barbie Dolls and Celebrity Perfumes, Convertibles, Digital Watches and Drive In Banking, Garfield, G.I. Joe and Handbags for Men, Knickers and Matchbox Cars, The Model T and the Mustang, Paper Dolls and Rubik's Cube, Silly Putty, the Slinky and Synthetics in Clothes, Top Hats, the Trilby and Twiggy, VCRs, Yuppies and Zubaz. Each fad featured in *Fashion Merchandising Fads* is examined thoroughly and concisely by the authors. They look at the historical setting, how the trend became popular and the people most fascinated and involved with the trend. References follow each entry to make further reading on each fad a relatively easy task for those intrigued by fads. As fads enter and encompass society for a period of time, this collection of fads arranged alphabetically is sure to captivate readers from beginning to end or in a world of fads from the A-2 Flight Jacket to the Zipper.

Suffering Made Real M. Susan Lindee, 2008-10-10 The atomic bombs dropped on Hiroshima and Nagasaki in August of 1945 unleashed a force as mysterious as it was deadly: radioactivity. In 1946 the United States government created the Atomic Bomb Casualty Commission (ABCC) to serve as a permanent agency in Japan with the official mission of studying the medical effects of radiation on the survivors. The next ten years saw the ABCC's most intensive

research on the genetic effects of radiation and up until 1974 the ABCC scientists published papers on the effects of radiation on aging life span fertility and disease

Suffering Made Real is the first comprehensive history of the ABCC's research on how radiation affected the survivors of the atomic bomb

Arguing that Cold War politics and cultural values fundamentally shaped the work of the ABCC M Susan Lindee tells the compelling story of a project that raised disturbing questions about the ethical implications of using human subjects in scientific research

How did the politics of the emerging Cold War affect the scientists biomedical research and findings

How did the ABCC document and publicly present the effects of radiation

Why did the ABCC refuse to provide medical treatment to the survivors

Through a detailed examination of ABCC policies archival materials the minutes of committee meetings newspaper accounts and interviews with ABCC scientists Lindee explores how political and cultural interests were reflected in the day to day operations of this controversial research program

Set against a period of conflicting views of nuclear weapons and nuclear power *Suffering Made Real* follows the course of a politically charged research program and reveals in detail how politics and cultural values can shape the conduct results and uses of science
