 psychiatry is an evolving subdiscipline within cultural psychiatry that deals with the impact of migration on the mental health  
 of those who have migrated and those who work with these groups and provide services to them Stress related to migration  
 affects migrants and their extended families either directly or indirectly The process of migration is not just a phase but leads  
 on to a series of adjustments including acculturation which may occur across generations Factors such as changes in diet  
 attitudes and beliefs and overall adjustment are important in settling down and making the individuals feel secure This  
 period of adjustment will depend upon the individual migrant s pre migration experiences migration process and post  
 migration experiences but also upon an individual s personality social support and emotional response to migration Socio  
 demographic factors such as age gender educational and economic status will all play a role in post migration adjustment In  
 order to understand the impact on individuals not only the type of migration and different stressors but also the types of  
 psychological mechanisms at a personal level and the resources and processes at a societal level need to be explored Despite  
 the number of refugees and asylum seekers around the world increasing at an astonishing rate the mental health needs of  
 migrants are often ignored by policy makers and clinicians The Oxford Textbook of Migrant Psychiatry is designed to serve as  
 the comprehensive reference resource on the mental health of migrants bringing together both theoretical and practical  
 aspects of the mental health needs of refugees and asylum seekers for researchers and professionals Individual chapters  
 summarise theoretical constructs related to theories of migration the impact of migration on mental health and adjustment  
 collective trauma individual identity and diagnostic fallacies The book also covers the practical aspects of patient  
 management including cultural factors ethnopsychopharmacology therapeutic interaction and therapeutic expectation and  
 psychotherapy Finally the book will examine special clinical problems and special patient groups Part of the authoritative
