The Archaeology of Elam D. T. Potts, 1999-07-29. From the middle of the 3rd millennium BC until the coming of Cyrus the Great, southwestern Iran was referred to in Mesopotamian sources as the land of Elam. A heterogeneous collection of regions, Elam was home to a variety of groups, alternately the object of Mesopotamian aggression and aggressors themselves, an ethnic group seemingly swallowed up by the vast Achaemenid Persian empire, yet a force strong enough to attack Babylonia in the last centuries BC. The Elamite language is attested as late as the Medieval era, and the name Elam as late as 1300 in the records of the Nestorian church. This book examines the formation and transformation of Elam's many identities through both archaeological and written evidence and brings to life one of the most important regions of Western Asia, re-evaluates its significance and places it in the context of the most recent archaeological and historical scholarship.

Babel und Bibel 3 Leonid E. Kogan, Natalia Koslova, Sergey Loesov, Serguei Tishchenko, 2007-06-30. This is the third volume of Babel und Bibel, an annual of ancient Near Eastern, Old Testament and Semitic studies. The principal goal of the annual is to reveal the inherent relationship between Assyriology, Semitics and biblical studies, a relationship that our predecessors comprehended and fruitfully explored but that is often neglected today. The title Babel und Bibel is intended to point to the possibility of fruitful collaboration among the three disciplines in an effort to explore the various civilizations of the ancient Near East. The tripartite division of Babel und Bibel corresponds to its three principal spheres of interest: ancient Near Eastern, Old Testament and Semitic studies. Contributions are further subdivided into articles, short notes and reviews.

mathematics was one of the key elements of scribal training and is thus pivotal to our understanding of the educational practices and intellectual history of ancient Mesopotamia The main body of this book is a mathematical and philological discussion of the two hundred technical constants or coefficients found in early second millennium mathematics Their names and mathematical functions are established leading to improved interpretations of several large mathematical topics The origins of many coefficients and much of the more practical mathematics are traced to late third millennium accounting and quantity surveying practices Finally the coefficients are used to examine some aspects of mathematics education in early Mesopotamia

Gilgamesh, Enkidu, and the Netherworld and the Sumerian Gilgamesh Cycle Alhena Gadotti, 2014-08-08 Alhena Gadotti offers a much needed new edition of the Sumerian composition *Gilgamesh Enkidu and the Netherworld* last published by Aaron Shaffer in his 1963 doctoral dissertation Since then several new manuscripts have come to light prompting not only a new edition of the text but also a re examination of the composition In this book Gadotti argues that *Gilgamesh Enkidu and the Netherworld* was the first not the last of the Sumerian stories about Gilgamesh She also suggests that a Sumerian *Gilgamesh Cycle* currently only attested in old Babylonian manuscripts ca 18th century BCE was in fact developed during the Ur III period ca 2100 2000 BCE

Providing a new way to look at the Sumerian Gilgamesh stories this book is relevant not only to scholars of the ancient Near East but also to anyone interested in epic and epic cycle **Gudea and His Dynasty** Sibylle Edzard, Dietz Otto

Marín, 2021-08-24 A collection of studies that explores the extractive systems of eleven ancient states and societies from across the ancient world Ancient Taxation is a collection of studies that explores the extractive systems of eleven ancient states and societies from across the ancient world ranging from Bronze Age China to Anglo Saxon Britain The contributors discuss the inherent challenges of taxation in predominantly agro pastoral societies including basic tax strategy e g taxing goods vs labor in kind vs money taxes etc the mechanics of assessment and collection and the politics of negotiating the cooperation of social economic and political elites and other important social groups In assembling a broad range of studies this book sheds new light on the commonalities and differences between ancient taxation systems and so on the broader fiscal and institutional practices of antiquity It also provides new impetus for further comparative research into extractive practices across ancient societies and between antiquity and recent historical periods The book will be of interest to those studying ancient social and economic history the history of social organization and the history of ancient Greece and Rome Egypt the Ancient Near East or ancient China The Grammar of Perspective Christopher Woods, 2008-05-31 The so called Sumerian conjugation prefixes are the most poorly understood and perplexing elements of Sumerian verbal morphology Approaching the problem from a functional typological perspective and basing the analysis upon semantics Professor Woods argues that these elements in their primary function constitute a system of grammatical voice in which the active voice is set against the middle voice The latter is represented by heavy and light markers that differ with respect to focus and emphasis As a system of grammatical voice the conjugation prefixes provided Sumerian speakers with a linguistic means of altering the perspective from which events may be viewed giving speakers a series of options for better approximating in language the infinitely graded spectrum of human conceptualization and experience Woods is to be commended for establishing a new precedent for analyzing Sumerian grammar which will hopefully become a model for future studies of the language Paul Delnero Johns Hopkins University
