The Abuse of Beauty Arthur C. Danto,2003 Leading art critic and philosopher Arthur Danto here explains how the anti beauty revolution was hatched and how the modernist avant garde dislodged beauty from its throne Danto argues not only that the modernists were right to deny that beauty is vital to art but also that beauty is essential to human life and need not always be excluded from art

Meaning and Truth in African Philosophy Grivas Muchineripi Kayange,2018-11-23 This book offers a new way of doing African philosophy by building on an analysis of the

way people talk The author bases his investigation on the belief that traditional African philosophy is hidden in expressions used in ordinary language As a result he argues that people are engaging in a philosophical activity when they use expressions such as taboos proverbs idioms riddles and metaphors The analysis investigates proverbs using the ordinary language approach and Speech Act theory Next the author looks at taboos using counterfactual logic which studies the meaning of taboo expressions by departing from a consideration of their structure and use He argues that the study of these figurative expressions using the counterfactual framework offers a particular understanding of African philosophy and belief systems The study also investigates issues of meaning and rationality departing from a study on riddles explores conceptual metaphors used in conceptualizing the notion of politics in modern African political thought and examines language and marginalization of women and people with disabilities The book differs from other works in African philosophy in the sense that it does not claim that Africans have a philosophy as is commonly done in most studies Rather it reflects and unfolds philosophical elements in ordinary language use The book also builds African Conception of beauty and truth through the study of language

The Significance of Beauty P.M. Matthews, 2013-06-29 In the Critique of Judgment Kant argues that feeling is part of the system of the mind Judgments of taste based on feeling are a unique kind of judgment and the feeling that is their foundation forms an independent third power of the mind Feeling has a special role within this system in that it also provides a transition between the other two powers of the mind cognition and desire Matthews argues that feeling our experience of beauty provides a transition because it orients humans in a sensible world Judgments of taste help overcome the difficulties that arise when rational cognitive and moral ends must be pursued in a sensible world Matthews demonstrates how feeling disassociated from rational activities in Kant's earlier works is now central in reaching rational ends and understanding humans as unified rational beings Audience This book would be of interest to research libraries and university libraries philosophers historians and aestheticians *International Journal of Ethics*, 1913 Includes section Book reviews

Essays on the Nature of Art Eliot Deutsch, 1996-11-01 In this newest book the author presents a theory of art which is at once universal in its general conception and historically grounded in its attention to aesthetic practices in diverse cultures The author argues that especially today art not only enjoys a special kind of autonomy but also has important social and political responsibilities

Obsessive-Compulsive Disorder and Uncertainty Moshe Marcus, Steven Tuber, 2021-07-12 In Obsessive Compulsive Disorder and Uncertainty Struggling with a Shadow of a Doubt Moshe Marcus and Steven Tuber examine the structural and intrapsychic features of the self as presented within OCD compulsive doubting and more broadly within OCD compulsions Marcus and Tuber further elucidate central object relational paradigms within OCD doubting and suggest a broader framework that can be used to consider the interplay between both the cognitive as well as the affective components required to make judgments

Icons in Time, Persons in Eternity C.A. Tsakiridou, 2016-05-13 Icons in Time Persons in Eternity presents a critical interdisciplinary examination of contemporary

theological and philosophical studies of the Christian image and redefines this within the Orthodox tradition by exploring the ontological and aesthetic implications of Orthodox ascetic and mystical theology It finds Modernist interest in the aesthetic peculiarity of icons significant and essential for re evaluating their relationship to non representational art Drawing on classical Greek art criticism Byzantine ekphraseis and hymnography and the theologies of St Maximus the Confessor St Symeon the New Theologian and St Gregory Palamas the author argues that the ancient Greek concept of enargeia best conveys the expression of theophany and theosis in art The qualities that define enargeia inherent liveliness expressive autonomy and self subsisting form are identified in exemplary Greek and Russian icons and considered in the context of the hesychastic theology that lies at the heart of Orthodox Christianity An Orthodox aesthetics is thus outlined that recognizes the transcendent being of art and is open to dialogue with diverse pictorial and iconographic traditions An examination of Chinese Zen art theory and a comparison of icons with paintings by Wassily Kandinsky Pablo Picasso Mark Rothko and Marc Chagall and by Japanese artists influenced by Zen Buddhism reveal intriguing points of convergence and difference The reader will find in these pages reasons to reconcile Modernism with the Christian image and Orthodox tradition with creative form in art

A History of Six Ideas W. Tatarkiewicz, 2012-12-06 The history of aesthetics like the histories of other sciences may be treated in a two fold manner as the history of the men who created the field of study or as the history of the questions that have been raised and resolved in the course of its pursuit The earlier History of Aesthetics 3 volumes 1960 68 English language edition 1970 74 by the author of the present book was a history of men of writers and artists who in centuries past have spoken up concerning beauty and art form and creativity The present book returns to the same subject but treats it in a different way as the history of aesthetic questions concepts theories The matter of the two books the previous and the present is in part the same but only in part for the earlier book ended with the 17th century while the present one brings the subject up to our own times And from the 18th century to the 20th much happened in aesthetics it was only in that period that aesthetics achieved recognition as a separate science received a name of its own and produced theories that early scholars and artists had never dreamed of

The Revival of Beauty Catherine Wesselinoff, 2023-08-18 This book provides original descriptive accounts of two schools of thought in the philosophy of beauty the 20th century Anti Aesthetic movement and the 21st century Beauty Revival movement It also includes a positive defence of beauty as a lived experience extrapolated from Beauty Revival position Beauty was traditionally understood in the broadest sense as a notion that engages our sense perception and embraces everything evoked by that perception including mental products and affective states This book constructs and places in parallel with one another the Anti Aesthetic and Beauty Revival movements In the author's view Anti Aestheticism is devoted to a decisive negation of beauty denying its importance as a philosophical notion and its significance as a lived experience It suggests that beauty is a merely sensual experience which can be used at best as a distraction from justice and at worst as an instrument of evil Alternatively the Beauty Revival

movement advances arguments for beauty as an experience that extends primarily to sensual experience but which also calls forth mental products and cognitive and affective states evoked by that experience After reconstructing these two positions the author elaborates on the notion of beauty as a lived experience through three key moments which occur in the process of our experiencing beautiful objects These moments are a the conditions that constitute an experience of beauty b the attitudinal features most likely to lead to the experience of beauty and c the results of the experience of beauty The Revival of Beauty will be of interest to scholars and advanced students working in aesthetics history of philosophy and art history

Wittgenstein on Religious Belief Genia Schönbaumsfeld, 2023-02-02 Wittgenstein published next to nothing on the philosophy of religion and yet his conception of religious belief has been both enormously influential and hotly contested In the contemporary literature Wittgenstein has variously been labelled a fideist a non cognitivist and a relativist of sorts This Element shows that all of these readings are misguided and seriously at odds not just with what Wittgenstein says about religious belief but with his entire later philosophy This Element also argues that Wittgenstein presents us with an important third way of understanding religious belief one that does not fall into the trap of either assimilating religious beliefs to ordinary empirical or scientific beliefs or seeking to reduce them to the expression of certain attitudes Beauty and Sensibility in the Thought of Jonathan Edwards Roland Delattre, 2006-04-01 This illuminating analysis of Jonathan Edwards philosophical theological ethical program focuses on his concept of beauty as our central clue to the nature of reality and the life of God Delattre shows that beauty not only provides Edwards with a model for the manner of divine governance but operates throughout his thought as both the goal and means of redemption Essential to his understanding of the operation of beauty as the law of moral order is Edwards aesthetic affectional model of the self which corresponds to his aesthetic articulation of the system of being and good Thus the distinguishing mark of Edwards theology his elevation to centrality of both the primary beauty of being's cordial consent to being and the secondary beauty of harmony and proportion is shown to be the key to his interpretation of the dynamics of the moral and spiritual life
