The Consequences Of Nuclear Proliferation Lessons From South Asia Bcsia Studies In International Security:

The Consequences of Nuclear Proliferation Devin T. Hagerty, 1998 Hagerty analyzes how India and Pakistan interacted in diplomatic and military crises before their 1998 nuclear tests He presents detailed studies of the January 1987 Indo Pakistani crisis precipitated by India's Brasstacks military exercises and the 1990 confrontation over Kashmir Hagerty concludes that relations between India and Pakistan in recent years support the argument that nuclear proliferation does not necessarily destabilize international relations and may even reduce the risk of war The Consequences of Nuclear Proliferation Devin T. Hagerty, 1997

The Coming Crisis Victor A. Utgoff, 2000 How will continued proliferation of nuclear weapons change the global political order This collection of essays comes to conclusions at odds with the conventional wisdom Stephen Rosen and Barry Posen explore how nuclear proliferation may affect US incentives to confront regional aggression Stephen Walt argues that regional allies will likely prove willing to stand with a strong and ready United States against nuclear backed aggression George Quester and Brad Roberts examine long term strategic objectives in responding to nuclear attack by a regional aggressor Richard Betts highlights the potential for disastrous mistakes in moving toward and living in a world heavily populated with nuclear armed states Scott Sagan explains how the nuclear nonproliferation policies best suited to some states can spur proliferation by others Caroline Ziemke shows how the analysis of a state's strategic personality can provide insights into why it might want nuclear weapons and how its policies may develop once it gets them And Victor Utgoff concludes that the United States seems more likely to intervene against regional aggression when the aggressor has nuclear weapons than when it does not

Biological Weapons Joshua Lederberg, 1999 foreword by William S Cohen U S Secretary of Defense Biological weapons pose a horrifying and growing threat to the United States and to the world in general Revelations about Iraq's weapons research and the plans of the Aum Shinrikyo cult in Japan serve as frightening reminders of the potential for military or terrorist use of biological agents The essays in this book many of which were originally published in the *Journal of the American Medical Association* examine the medical

America's Achilles' Heel Richard A Falkenrath,Robert D Newman,Bradley A. Thayer,1998-07-08 Nuclear biological and chemical NBC weapons delivered covertly by terrorists or hostile governments pose a significant and growing threat to the United States and other countries Although the threat of NBC attack is widely recognized as a central national security issue most analysts have assumed that the primary danger is military use by states in war with traditional military means of delivery The threat of covert attack has been imprudently neglected Covert attack is hard to deter or prevent and NBC weapons suitable for covert attack are

available to a growing range of states and groups hostile to the United States At the same time constraints on their use appear to be eroding This volume analyzes the nature and limits of the covert NBC threat and proposes a measured set of policy responses focused on improving intelligence and consequence management capabilities to reduce U S vulnerability About the authors Richard A Falkenrath is Assistant Professor of Public Policy at Harvard s Kennedy School of Government He served as Executive Director of the Belfer Center for Science and International Affairs BCSIA and before that as a Research Fellow He is the author and co author of *Shaping Europe s Military Order* 1995 *Avoiding Nuclear Anarchy* 1996 *America s Achilles Heel Nuclear Biological Chemical Terrorism and Covert Attack* 1998 and numerous journal articles and chapters of edited volumes Falkenrath has been a Visiting Research Fellow at the German Society of Foreign Affairs DGAP in Bonn He holds a PhD from the Department of War Studies King s College London where he was a British Marshall Scholar and is a summa cum laude graduate of Occidental College Los Angeles with degrees in economics and international relations He is on leave in 2001 2002 and is currently serving as Director for Counterproliferation and Homeland Defense at the National Security Council Bradley A Thayer is Assistant Professor of Political Science at the University of Minnesota Duluth

Blackwill, Paul Dobbins, 2000 Systematic and concrete prescriptions for strengthening America s alliances in the Asia Pacific region Unlike the new and largely peaceful Europe the Asia Pacific region is fraught with old instabilities and new risks as well as opportunities America s Asian alliances face an arc of potential instability from the divided Korean peninsula in Northeast Asia to the nuclear confrontation between India and Pakistan on the South Asian subcontinent to an unstable Indonesia in Southeast Asia The United States and its allies must also address the rise of Chinese power slow the spread of nuclear and high tech conventional weapons maintain access to energy resources and expand the world free trade system In this book nine distinguished US and Australian strategists present systematic and concrete prescriptions for strengthening America s Asian alliances These policy driven chapters address the roles that the US Japan US South Korea and US Australia alliances can play in ensuring long term stability and prosperity in the region

Condemned to Repetition? Andrew Bennett, 1999 Why did the Soviet Union use less force to preserve the Soviet empire from 1989 to 1991 than it had used in distant and impoverished Angola in 1975 This book fills a key gap in international relations theories by examining how actors preferences and causal conceptions change as they learn from their experiences Andrew Bennett draws on interviews and declassified Politburo documents as well as numerous public statements to establish the views of Soviet and Russian officials He argues that Soviet leaders drew lessons from their apparent successes in Vietnam and elsewhere in the 1970s that made them more interventionist Then as casualties in Afghanistan mounted in the 1980s Soviet leaders learned different lessons that led them to withdraw from regional conflicts and even to abstain from the use of force as the Soviet empire dissolved The loss of this empire led to exaggerated fears of domino effects within Russia and a resurgence of interventionist views culminating in the Russian invasion of Chechnya in

1994 Throughout this process Soviet and Russian leaders and policy experts were divided into competing schools of thought as much by the information to which they were exposed as by their apparent material interests This helps explain how Gorbachev and other new thinkers were able to prevail over the powerful military party industrial complex that had dominated Soviet politics since Stalin s time *Holding the Line* Cindy Williams,2001 An objective and detailed look at the American defense budget and military strategy **Bridges and Boundaries** Colin Elman,Miriam Fendius Elman,2001-04-13 Bridges and Boundaries offers a conversation between what might loosely be described as traditionalist diplomatic and military historians and political scientists who employ qualitative case study methods to examine international relations The book opens with a series of chapters discussing differences commonalities and opportunities for cross fertilization between the two disciplines To help focus the dialogue on real events and research the volume then revisits three empirical topics that have been studied at length by members of both disciplines British hegemony in the nineteenth century diplomacy in the interwar period and the causes of World War II and the origins and course of the Cold War For each of these subjects a political scientist a historian and a commentator reflect on how disciplinary guild rules have shaped the study of international events The book closes with incisive overviews by Robert Jervis and Paul W Schroeder Bridges and Boundaries explores how historians and political scientists can learn from one another and illustrates the possibilities that arise when open minded scholars from different disciplines sit down to talk *Toxic Terror* Jonathan B. Tucker,2000-02-28 In depth case studies of twelve terrorist groups and individuals who from 1946 to 1998 allegedly acquired or employed CBW agents Policymakers scholars and the news media have been alarmed by the potential for chemical and biological weapons CBW terrorism and the U S Congress has allocated billions of dollars for counterterrorism and consequence management programs Driving these concerns are the global spread of scientific knowledge and technology relevant to CBW terrorism and the vulnerability of civilian populations to chemical and biological attacks Notably lacking from the analysis however has been a careful assessment of the terrorists themselves What types of terrorist groups or individuals are both capable of acquiring chemical and biological weapons and motivated to use them and for what purposes Further what types of toxic agents would probably be produced and how would they be delivered Answers to these questions would enable policymakers to prepare for the most likely contingencies To this end Toxic Terror provides in depth case studies of twelve terrorist groups and individuals who from 1946 to 1998 allegedly acquired or employed CBW agents The cases were researched from primary sources including court documents interviews and declassified government files By comparing the twelve cases the book identifies characteristic motivations and patterns of behavior associated with CBW terrorism and provides an empirical basis for prudent cost effective strategies of prevention and response *Defense and Security* Karl R. DeRouen,Uk Heo,2005 *Index to Volumes I-xlv. 1886-1930* ,1931 A review devoted to the historical statistical and comparative study of politics economics and public law *American Book Publishing Record Cumulative 1998* R R Bowker Publishing,1999-03 *The*
