**The Cambridgeshire Report on the Teaching of Music - Music and the Community**, 1933 **Instrumental Teaching in Nineteenth-Century Britain** David Golby, 2016-06-17 First published in 2004 this book demonstrates that while Britain produced many fewer instrumental virtuosi than its foreign neighbours there developed a more serious and widespread interest in the cultivation of music throughout the nineteenth century Taking a predominantly historical approach the book moves from a discussion of general developments and issues to a detailed examination of violin pedagogy

method and content which indicates society's influence on cultural trends and informs the discussion of other instruments and institutional training that follows. In the first study of its kind it examines in depth the inextricable links between trends in society, education and levels of achievement. It also extends beyond profession and art music to amateur and popular spheres. A useful chronology of developments in nineteenth century British music education is also included. This book will be of interest to those studying the history of instrumental teaching and Victorian music. Music in Schools J. Brian Brocklehurst, 2025-05-01. First published in 1962. Music in Schools discusses all aspects of the teaching of singing in schools. The most effective methods of laying the foundations of musicianship are fully dealt with and ways are considered in which movements, speech and simple instrumental playing can be used to develop children's musical literacy, aural perception and creative ability. Attention is given to the development of children's taste for and in music including jazz and popular music and stress is laid on the importance of children as active participants in the appreciation lesson, not simply passive spectators. The place of instrumental music in schools is considered fully and methods of teaching the playing of percussion instruments, rhythmic and melodic recorders, bamboo pipes, harmonicas and melodicas are examined. Suggestions are made concerning the formation of school brass bands and piano string and wind instrument classes. Advice is also given on the training and conducting of school orchestras. Other subjects which receive attention include continuity in school music, the value of musical aptitude tests, the use of films and other visual aids, the provision of equipment for music rooms in schools and the place of music in the education of mentally and physically handicapped children. **The Piano Teacher's Source Book** Maurice Hinson, 1980.
