The Concept of Existence in the Concluding Unscientific Postscript R.H. Johnson, 2012-12-06 The writings of Kierkegaard continue to be a fertile source for contemporary philosophical thought Perhaps the most interesting of his works to a philosopher is the Concluding Unscientific Postscript to the Philosophical Fragments The Fragments is a brief algebraic piece in which the author attempts to put forward the central teachings of Christianity in philosophical terminology The work is addressed to a reader who has a philosophical bent and who may therefore be tempted to relate to Christianity via such questions as Can the truth of Christianity be established The analysis of the Fragments establishes that this way of relating to Christianity is misguided since Christianity and philosophy are categorically different Having done this the author turns his attention in the Postscript to the question of how an individual human being can properly establish a relationship to Christianity In order to become a Christian one must first of all exist Nothing more than thatP one may be tempted to think Yet at the very core of the Postscript is the notion that to exist as an individual human being is difficult The author goes so far as to claim that men have forgotten what it means to exist The Concept and Reality of Existence Toshihiko Izutsu, 2009

Bradford, 1980 **The Meaning of the Terms: 'existence' and 'reality'** Alvin Thalheimer, 1918 *The Role of Contradictions in Spinoza's Philosophy* Yuval Jobani, 2016-01-29 Spinoza is commonly perceived as the great metaphysician of coherence The Euclidean manner in which he presented his philosophy in the Ethics has led readers to assume they are facing a strict and consistent philosophical system that necessarily follows from itself As opposed to the prevailing understanding of Spinoza and his work *The Role of Contradictions in Spinoza's Philosophy* explores an array of profound and pervasive contradictions in Spinoza's system and argues they are deliberate and constitutive of his philosophical thinking and the notion of God at its heart Relying on a meticulous and careful reading of the Theological Political Treatise and the Ethics this book reconstructs Spinoza's philosophy of contradictions as a key to the ascending three degrees of knowledge leading to the Amor intellectualis Dei Offering an exciting and clearly argued interpretation of Spinoza's philosophy this book will interest students and scholars of modern philosophy and philosophy of religion as well as Jewish studies Yuval Jobani is Assistant Professor at the Department of Hebrew Culture Studies and the School of Education at Tel Aviv University *The Conceptual Structure of Reality* Gal Yehezkel, 2014-05-22 This book describes a novel conception of reality one that uniquely incorporates an idealistic view of existence with an account of objectivity It introduces a general model of conceptual analysis and demonstrates its effectiveness in exposing and establishing the existence of conceptual ties The book begins by introducing the tools and principles needed for the conceptual analysis undertaken in chapters that follow Next it presents a detailed examination into existence contingency idealism self consciousness and natural laws In the process the author critically examines the conceptions of existence held by Kant Frege and Russell argues that the determinations of past present and future are subjective in the sense that they imply the existence of consciousness in

relation to which they are fixed shows that every possible reality includes sufficient conditions for self consciousness and confronts the question of the uniformity of nature which states that reality is subject to natural laws In the end the idealistic conception of reality developed in this book implies that existence is relative rather than absolute in the sense that it is determined in relation to a point of view internal to reality This view of existence implies that reality necessarily exists

Stanley Rosen,2024-05-31 Although Hegel considered Science of Logic essential to his philosophy it has received scant commentary compared with the other three books he published in his lifetime Here philosopher Stanley Rosen rescues the Science of Logic from obscurity arguing that its neglect is responsible for contemporary philosophy s fracture into many different and opposed schools of thought Through deep and careful analysis Rosen sheds new light on the precise problems that animate Hegel s overlooked book and their tremendous significance to philosophical conceptions of logic and reason Rosen s overarching question is how if at all rationalism can overcome the split between monism and dualism Monism which claims a singular essence for all things ultimately leads to nihilism while dualism which claims multiple irreducible essences leads to what Rosen calls the endless chatter of the history of philosophy The Science of Logic he argues is the fundamental text to offer a new conception of rationalism that might overcome this philosophical split Leading readers through Hegel s book from beginning to end Rosen s argument culminates in a masterful chapter on the Idea in Hegel By fully appreciating the Science of Logic and situating it properly within Hegel s oeuvre Rosen in turn provides new tools for wrangling with the conceptual puzzles that have brought so many other philosophers to disaster **Denying Existence A.**

Chakrabarti,2013-03-14 This book tries to explore in language as non technical as possible the deepest philosophical problems regarding the logical status of empty singular terms such as Pegasus Batman The impossible staircase departs in Escher s painting Ascending Descending etc and regarding sentences which deny the existence of singled out fictional entities It will be fascinating for literary theorists with a flair for logic to students of metaphysics and philosophy of language and for historians of philosophy interested in the fate of the Russell Meinong debate For teachers of these aspects of analytic philosophy this will provide a textbook which goes beyond the Western tradition without plunging into any mystical Eastern Emptiness which is what some previous comparative philosophers did [The Concept of Service Quality in Commercial](#)

relationship between parent and child husband and wife employer and employee and citizen and state for instance as a person being owned sounds as the person being a slave We have redeemed the reality of ownership There are things one can own and things one cannot own although acquirable therefore there are things one has the Right to acquire and things one has no Right to acquire If you cannot own it and you acquire it then you have stolen it rendering you a criminal as theft is a crime Learn Commercial Practice it is the legitimate method of acquiring and possessing and ownership John Fiske on the Idea of God Edmund Thomas Shanahan,1897 *The Presbyterian Quarterly* ,1890 **The Conception of God** Josiah Royce,Joseph LeConte,George Holmes Howison,Sidney Edward Mezes,1898 **Thinking with Kierkegaard** Arne Grøn,2022-12-31 Arne Grøn's reading of Søren Kierkegaard's authorship revolves around existential challenges of human identity The 35 essays that constitute this book are written over three decades and are characterized by combining careful attention to the augmentative detail of Kierkegaard's text with a constant focus on issues in contemporary philosophy Contrary to many approaches to Kierkegaard's authorship Grøn does not read Kierkegaard in opposition to Hegel The work of the Danish thinker is read as a critical development of Hegelian phenomenology with particular attention to existential aspects of human experience Anxiety and despair are the primary existential phenomena that Kierkegaard examines throughout his authorship and Grøn uses these negative phenomena to argue for the basically ethical aim of Kierkegaard's work In Grøn's reading Kierkegaard conceives human selfhood not merely as relational but also a process of becoming the self that one is through the otherness of self experience that is the body the world other people and God This book should be of interest to philosophers theologians literary studies scholars and anyone with an interest not only in Kierkegaard but also in human identity **English and American Philosophy Since 1800** Arthur Kenyon Rogers,1922 *Bacon to Kant* Garrett Thomson,2012-05-21 In teaching Modern philosophy the absence of a comprehensive secondary text results in much class time spent on clarifying the ideas of the philosophers leaving little room for philosophical discussion of wider issues *Bacon to Kant* was developed as a response to the classroom need to offer undergraduate philosophy students an introduction to the claims and arguments of ten of the most studied Rationalist Empiricist and Enlightenment era philosophers Descartes Spinoza Leibniz Bacon Hobbes Locke Berkeley Hume Rousseau and Kant The text is designed to be accessible without being philosophically naive Thomson explains and analyzes central arguments in a readable and engaging style Critical assessments of evolving views and arguments contrasting interpretations of original texts and thought provoking questions designed to promote lively discussion help students connect the material to broader contemporary philosophical issues Proceedings of the Aristotelian Society Aristotelian Society (Great Britain),1891 Includes Report of the executive committee for 1887 88 1914 15 list of members in each volume **The Concept of Control** Savilla Alice Elkus,1907 **Aristotelian Logic and the Arabic Language in Alfarabi** Shukri Abed,1991-01-01 This book explores the reaction of tenth century Arab philosopher Abu Nasr Alfarabi to the logical works of Aristotle From numerous short treatises

the author develops a systematic and comprehensive topical survey of Alfarabi's logical writings. The book is divided into two major parts: language as a tool of logic (Chapters 1-5) and logic as a tool with which to analyze language (Chapter 6). The first five chapters deal with Alfarabi's analysis of the meanings of various terms as they are used in logic and philosophy. Alfarabi refutes the Arab grammarians who claimed that Arab logicians were building a language within a language and shows that the philosophical meanings of terms are in fact their most original and essential meanings. The final chapter deals with Alfarabi's analysis of certain aspects of the Arabic language such as copula and demonstrates that Arabic like any natural language conforms to universal logical structures of which natural languages are only a concrete expression.
