their ideas have been used and critiqued in a selective bibliography of key publications and key publications which review or critique *Social Geographies* Kath Browne, Dhiren Borisa, Mary Gilmartin, Niharika Banerjea, 2024-04-24 *Social Geographies The Basics* introduces what social geography is and what it might be. It outlines the key contours of social geographies and also disrupts some of the conventions of the discipline in both its content and structure. This book approaches social geographies by beginning with the resistances, contestations and solutions that communities use to challenge exclusions in place and space in order to create equitable societies. It then addresses the inequalities, precarities and problems that prompt these interventions. This allows the book to emphasise the importance of activism in the here and now and to show how activism often makes issues visible and contested in ways that are then theorised by academics. *Social Geographies* starts with solidarities, communities and networks before moving to examine difference, precarity and mobilities. Each chapter offers key case studies that centre resistance, contestations of inequitable power and local knowledges that can often be seen as solutions to national and transnational issues, creating a decolonial understanding of social geography from below within and across national contexts. This book is essential reading for undergraduate students and readers new to the area as well as anyone studying introductory geography, social, cultural and critical geography, the spatial turn and issues of spatialities and key issues like precarity, power, difference, equality and mobilities. *Handbook for Asian Studies Specialists* Noriko Asato, 2013-10-08 An indispensable tool for librarians who do reference or collection management, this work is a pioneering offering of expertly selected print and electronic reference tools for East Asian Studies. Chinese, Japanese and Korean. *Handbook for Asian Studies Specialists: A Guide to Research Materials and Collection Building Tools* is the first work to cover reference works for the main Asian area languages of China, Japan and Korea. Several leading Asian Studies librarians have contributed their many decades of experience to create a resource that gathers major reference titles, both print and online, that would be useful to today's Asian Studies librarian. Organized by language group, it offers useful information on the many subscription-based and open source electronic tools relevant to Asian Studies. This book will serve as an essential resource for reference collections at academic libraries. Previously published bibliographies on materials dealing with China or Japan or Korea, but none have coalesced information on all three countries into one work or are written in English. And unlike the other resources available, this work provides the insight needed for librarians to make informed collection management decisions and reference selections. **Encyclopedias about Muslim Civilisations** Aptin Khanbaghi, 2019-07-31 *Encyclopedias about Muslim Civilisations* Edited by Aptin Khanbaghi *Information Sources of Political Science* Stephen W.
