The Conserver Society A Workable Alternative For The Future:

The Conserver Society Kimon Valaskakis,1979 **The Conserver Society : a Workable Alternative for the Future** Kimon Valaskakis,1979 *Life in 2030* John B. Robinson,2007-10-01 *Life in 2030* is a ground breaking practical and above all positive vision of life in twenty first century Canada As we move into the next century the development of sustainable and environmentally benign patterns of resource utilization and socioeconomic development is an essential priority In this book John Robinson and his co authors investigate the possibility and impacts of a sustainable future for Canada Based on research initiated by the Sustainable Society Project in 1988 *Life in 2030* is unique in that it uses backcasting instead of forecasting to trace the path of Canada forty years into the future to the year 2030 Instead of predicting the most likely future based on current trends the authors set out a desirable future and discuss the changes that would need to occur between 1990 and 2030 to arrive at this future vision This vision derived from ethical political and ecological principles is not viewed as definitive for the authors hope to inspire others to conceive of and work towards their own visions of a sustainable future *Life in 2030* makes a significant contribution to interdisciplinary studies on the environment and sustainability because it develops a scenario that allows for an evaluation of the changes required to achieve a sustainable society This book is required reading for anyone interested in a sustainable future environment It also provides an original and provocative look at life in Canada in the twenty first century *The Conserver Society* Kimon Valaskakis,1979 **The Conserver Society** Karl E. Henion,Thomas C. Kinnear,American Marketing Association,1979 **The Earth as Transformed by Human Action** B. L. Turner,William C. Clark,Robert W. Kates,John F. Richards,Jessica T. Mathews,William B. Meyer,1993-01-29 *The Earth as Transformed by Human Action* is the culmination of a mammoth undertaking involving the examination of the toll our continual strides forward technical and social take on our world The purpose of such a study is to document the changes in the biosphere that have taken place over the last 300 years to contrast global patterns of change to those appearing on a regional level and to explain the major human forces that have driven these changes The first section deals strictly with the major human forces of the past 300 years and the second is a detailed account of the transformations of the global environment wrought by human action The final section examines a range of perspectives and theories that purport to explain human actions with regard to the biosphere **The Fourth Wave** Herman Bryant Maynard,Susan E. Mehrtens,1996 1576750027*The Fourth Wave* foresees a radically different future a future in which business principles concern for the environment personal integrity and spiritual values are integrated It looks toward a future in which today's corporations serve both local and global society advocate a redefinition of wealth are innovators *Global Environmental Risk* Jeanne X. Kasperson,Roger E. Kasperson,2013-05-13 Despite international initiatives such as the Earth Summit in 1992 and ongoing efforts to implement the Kyoto Protocol human activities continue to register a destructive toll on the planetary environment At root research on global environmental risk seeks new pathways for reversing unsustainable trends curtailing

ongoing destructive activities and creating a life sustaining planet This book takes stock of the distinctive challenges posed by global environmental risks the capacity of knowledge systems to identify and characterize such risks and the competence of human society to manage the unprecedented complexity Particular attention trains on engaging in ways conducive to enhancing social learning and adaptation the large uncertainties inherent in these risks Various chapters enlist different scales of analysis to explore the manifestation and causes of global environmental risks in all the diversity of their regional expression Throughout the editors and contributors accord prominence to the vulnerability of people and places to environmental degradation Understanding vulnerability is a neglected key to assessing the nature of the risks and determining strategies for altering trajectories of threat Global risk futures the editors argue are not intractable and are still amenable to a risk analysis enterprise that is democratic in principle humanistic in concept and geared to the realities that pertain to the particular societies locales and regions that will ultimately bear the risk *The Return of Scarcity* Herbert Cole Coombs,1990-06-11

The essays in this 1990 book link widely shared environmental concerns to an original and penetrating analysis of contemporary economic trends **Society and Technological Change** Rudi Volti,2005-06-07 Provides a comprehensive introduction to the interactions of society and technology The new fifth edition includes coverage of such timely topics as cloning stem cell research genetically modified foods terrorism intellectual property and the global impact of the internet **Sustainable Development as a Civilizational Revolution** Artur Pawlowski,2011-05-24

As a concept sustainable development is in conflict with traditional development based upon economic growth Sustainable development is an attempt to formulate a programme that integrates different aspects ecological social and economical which were usually considered as separate from each other Sustainable Development as a Civilizationa *Explorations in Environmental Political Theory* Joel Jay Kassiola,2015-03-04 The contributors to this volume focus on the political and value issues that in their shared view underlie the global environmental crisis facing us today They argue that only by transforming our dominant values social institutions and way of living can we avoid ecological disaster *Society and Technological Change, Fourth Edition* Rudi Volti,2001 Argues that society pushes for technological change that in turn shapes society

Environmentalists Lester W. Milbrath,1985-06-30 In a groundbreaking study Lester Milbrath argues the need for a deep change in our belief structure Environmentalists Vanguard for a New Society describes a revolution in process Basing his work on the views of modern environmentalists Milbrath delineates a new social paradigm a new understanding and revised values to show how the world functions in a way different from what our institutions and culture presuppose It is a book about our civilization the human condition and the quality of life Many of the ideas and much of the evidence in this volume are derived from a three nation study of environmental beliefs and values Teams of scholars in England Germany and the United States distributed questionnaires to the general public and to public officials business and labor leaders and environmentalists The answers to these questions are tabulated and the inferences are drawn in this timely study which is

certain to provoke controversy and a reconsideration of basic beliefs **The Death of Industrial Civilization** Joel Jay Kassiola,1990-08-14 The Death of Industrial Civilization explains how the contemporary ecological crisis within industrial society is caused by the values inherent in unlimited economic growth and competitive materialism Kassiola shows that the limits to growth critique of industrial civilization is the most effective stance against what seems to be a dominant and invincible social order He prescribes the social changes that must be implemented in order to transform industrial society into a sustainable and more satisfying one Rethinking Freire and Illich Rosa Bruno-Jofré,Michael Attridge,Jon Igelmo Zaldívar,2023-10-02 Marking the fiftieth anniversary of two of the most influential books in modern educational and social theory Rethinking Freire and Illich introduces readers to the results of the symposium of Paulo Freire s Pedagogy of the Oppressed and Ivan Illich s Deschooling Society The collection uniquely analyses Freire and Illich together although not in a comparative way It acknowledges that both Freire and Illich led in different ways to a new approach to perceiving and understanding the concept of liberation as a human condition while also presenting current criticisms of their work from a gendered perspective and by Indigenous scholars in the US and Canada Drawing on contributions from historians of education theologians digital experts and philosophers of education the book offers a historical analysis using extensive primary sources and an originality of topics It introduces the ways in which the current generation reads the overall works of Freire and Illich in the search for a reconstructed democratic education As a result Rethinking Freire and Illich presents Freire and Illich in light of contemporary issues in this generation and offers renewed searches for a good and just life and a reconstructed democratic education *New Thinking for a New Millennium* Richard A. Slaughter,2002-11 The study of futures is an area of increasing interest and one that is comprehensively examined in this new collection with contributions from key names in the field Reader's Guide to the Social Sciences Jonathan Michie,2014-02-03 This 2 volume work includes approximately 1 200 entries in A Z order critically reviewing the literature on specific topics from abortion to world systems theory In addition nine major entries cover each of the major disciplines political economy management and business human geography politics sociology law psychology organizational behavior and the history and development of the social sciences in a broader sense Public Policy and Futures Bibliography ,1980 *Achieving Sustainable Development* Ann Dale,John B. exchange of knowledge among the academic community government non governmental organizations and industry The contributors look far beyond merely identifying and analyzing selected issues and problems To facilitate public discussion and to affect policy development at least one initiative is proposed and detailed for each problem identified Achieving Sustainable Development provides an overall introduction to critical subjects in sustainable development industrial growth women institutional arrangements industrial practices and aboriginal peoples Most importantly it argues for the immediate development of a research and policy agenda for Canada and suggests mechanisms for its implementation
