Slippery Slope:

Slippery Slope Arguments Douglas N. Walton, 1992 Douglas Walton rejects the view that the slippery slope argument is a fallacy contending that such arguments can be used correctly in some cases as a reasonable type of argument to shift a burden of proof in a critical discussion

Nursing Ethics Janie B. Butts, Karen L. Rich, 2013

Character and Cops Edwin J. Delattre, 2002 This book is a study of the nature and formation of the moral integrity and intellectual competence that make individuals and institutions worthy of the public trust

Research Handbook on the Economics of Criminal Law Alon Harel, Keith N. Hylton, 2012-01-01 Jeremy Bentham and Gary Becker established the tradition of analyzing criminal law in utilitarian and economic terms This seminal book continues that tradition with specially commissioned original papers that span the philosophical foundations of the use of economics in criminal law both traditional economic perspectives and behavioral and experimental approaches to the discipline The contributors examine and evaluate the optimal design of criminal law norms as well as the ideal structure of law enforcement institutions They delineate what wrongs ought to be criminalized identify the boundaries between criminal law and tort and determine the optimal size of sanctions given the differential vulnerability of victims They also analyze the special considerations that apply to the regulation of corporate crime the effects of technology on crime and the effects of the distribution of wealth on sentencing This essential Handbook provides students and scholars of criminal law and law and economics the opportunity to explore the diversity of contemporary approaches to the economics of crime Criminologists sociologists and policymakers will also find it a valuable addition to their collections

Fallacies in Medicine and Health Louise Cummings, 2020-02-29 This textbook examines the ways in which arguments may be used and abused in medicine and health The central claim is that a group of arguments known as the informal fallacies including slippery slope arguments fear appeal and the argument from ignorance undertake considerable work in medical and health contexts and that they can in fact be rationally warranted ways of understanding complex topics contrary to the views of many earlier philosophers and logicians Modern medicine and healthcare require lay people to engage with increasingly complex decisions in areas such as immunization lifestyle and dietary choices and health screening Many of the so called fallacies of reasoning can also be viewed as cognitive heuristics or short cuts which help individuals make decisions in these contexts Using features such as learning objectives case studies and end of unit questions this textbook examines topical issues and debates in all areas of medicine and health including antibiotic use and resistance genetic engineering euthanasia addiction to prescription opioids and the legalization of cannabis It will be useful to students of critical thinking reasoning logic argumentation rhetoric communication health humanities philosophy and linguistics

First, Second, and Other Selves Jennifer Whiting, 2016-05-02 In her essay collection *First Second and Other Selves* Essays on Friendship and Personal Identity well known scholar of ancient philosophy Jennifer Whiting uses Aristotle's theories on friendship as a springboard to engage with contemporary philosophical work on personal identity and moral psychology

Philosophical Foundations of Precedent Timothy Endicott, Hafsteinn Dan Kristjánsson, Sebastian Lewis, 2023-03-27

Philosophical Foundations of Precedent offers a broad deep and diverse range of philosophical investigations of the role of precedent in law adjudication and morality The forty chapters present the work of a large and inclusive group of authors which comprises of well established leaders in the discipline and new voices in legal philosophy The magnitude of the resulting project is extraordinary presenting a diverse array of innovative and creative philosophical investigations of the practice of adhering to past decisions in law and allied fields of practical reasoning And by the same token the contributions elucidate the reasons that courts and other decision makers may have for departing from what has been done before The phenomena under investigation include the law and practice of common law and civil jurisdictions around the world In addition to its fundamental relevance to common law jurisdictions this work will be of broad and significant interest to theoretically minded audiences in continental Europe Latin America and Asia because it involves an extensive study of practices of precedent in civil law systems as well as common law systems Medical Law Emily Jackson, 2019 Providing a clear and accessible guide to medical law this work contains extracts from a wide variety of academic materials so that students can acquire a good understanding of a range of different perspectives Is Death Ever Preferable to Life? Ian Olver, 2013-06-29 This is an original contribution to the much debated area of the value that we should place on human life With the euthanasia issue highlighted in the public arena this book argues for a non absolutist highest value on life ethic and how that fits with society's current emphasis on individual autonomy Not only are the arguments for and against placing a highest value on life explored but the way of arguing particularly the use of slippery slopes is discussed By the use of everyday examples the impact of placing a high value on life is explored A futuristic intensive care ward round illustrates the ethical and resource issues with which we would be challenged in adopting a highest value on life policy for medical decisions This book will be useful for students of ethics nursing and medicine as well as those engaged in the public debate on euthanasia **A Life-Centered Approach to Bioethics** Lawrence E. Johnson, 2010-12-06 Approaches bioethics on the basis of a conception of life and what is needed for the affirmation of its quality in the most encompassing sense Johnson applies this conception to discussions of controversial issues in bioethics including euthanasia abortion cloning and genetic engineering His emphasis is not on providing definitive solutions to all bioethical issues but on developing an approach to coping with them that can also help us deal with new issues as they emerge The foundation of this discussion is an extensive examination of the nature of the self and its good and of various approaches to ethics His bioethic is integrally related to his well known work on environmental philosophy The book also applies these principles on an individual level offering a user friendly discussion of how to deal with ethical slippery slopes and how and where to draw the line when dealing with difficult questions of bioethics **Law and Global Health** Michael Freeman, Sarah Hawkes, Belinda Bennett, 2014-05-29 Current Legal Issues like its sister volume Current Legal Problems now available in journal format is based upon an annual

colloquium held at University College London Each year leading scholars from around the world gather to discuss the relationship between law and another discipline of thought Each colloquium examines how the external discipline is conceived in legal thought and argument how the law is pictured in that discipline and analyses points of controversy in the use and abuse of extra legal arguments within legal theory and practice Law and Global Health the sixteenth volume in the Current Legal Issues series offers an insight into the scholarship examining the relationship between global health and the law Covering a wide range of areas from all over the world articles in the volume look at areas of human rights vulnerable populations ethical issues legal responses and governance How Best to 'Go On'? Prospects for a 'Modern Synthesis' in the Sciences of Mind Kevin Moore, John Cromby, 2016-08-08 Psychology straddles areas from the biological to the social and cultural Within that vast range there have been recent explosions of interest in neuropsychology genetics and epigenetics and the evolutionary bases of mindedness Correspondingly there have been conceptual innovations and new empirical evidence in relation to the embodied social and discursive processes supporting mind and personhood Simultaneously awareness of developmental processes and their dynamic interweaving of genetic physiological neurological social and cultural elements has also increased Might such developments help connect the dots between diverse aspects of mindedness and the contexts within which it arises Whilst it seems clear that mind is co constituted of both biological and socio cultural processes how might we bring these disparate realms of knowledge together In a number of these areas suggestive integrative possibilities have been explored e g predictive processing embodied and situated cognition dynamic developmental systems theory and insights such as a focus on action knowledge as skills embeddedness and connectivity have been pursued across a range of disciplines This edited collection of articles bring together such possibilities and others in the same forum in order to provide an opportunity to re visit a recurring discussion within theoretical psychology The claimed lack of and potential for theoretical synthesis and unity While the chapters range over a number of areas of research this collection is focused on current prospects for conceptual synthesis within or convergence of research between aspects of mind and mindedness As is clear from the contributions it highlights integrative conceptual proposals that emphasize action orientation process embeddedness and connectivity especially between explanatory levels Beyond specific proposals for integration several of the contributions explicitly or implicitly expose broader questions about the purpose of psychological research the epistemological and ontological commitments required and the relevant social political and economic contexts within which such research is performed This is perhaps inevitable since any aim for synthesis of various understandings of mind will or should lead to consideration of the general implications beyond the science that follow from an integrated account of mind and mindedness Whether or not the contributions in this volume provide insights into profitable paths towards greater theoretical synthesis in the sciences of mind or alternatively provide grist for the mill of renewed skepticism over the potential or even desirability of such synthesis is unpredictable Whichever the outcome we feel sure that they will

help provoke future productive research in and thinking about the sciences of mind Kevin Moore and John Cromby Associate Guest Editors *Lethal Logic* Dennis A. Henigan, 2009-06-30 Guns don't kill people people kill people When guns are outlawed only outlaws will have guns An armed society is a polite society Who hasn't heard these engaging assertions time and time again Burned into the national consciousness by years of targeted disciplined messaging by the National Rifle Association and others they are just a few of the bumper sticker slogans that have defined the gun control debate in America Long ridiculed by gun control advocates they are the first words that come to mind for most Americans when the gun issue is discussed This is the first book both to acknowledge the profound and deadly impact of the gun lobby's bumper sticker logic on the gun control debate and to systematically expose the misguided thinking at the core of the pro gun slogans Indeed the author contends that the gun lobby's remarkable success in blocking passage of lifesaving gun laws is the result in large part of its relentless and effective use of these simple and resonant messages Their persuasive power has been a largely ignored influence on the current politics of gun control in which the gun lobby wields unprecedented power in the Republican Party while many Democratic Party leaders see the policy benefits of stronger gun laws as not worth the political risk of standing up to the NRA The book contends that the current political stalemate over guns will never be broken until the pro gun slogans are exposed as the cleverly disguised fallacies that they are **Radical Conflict** Andrew R. Smith, 2016-05-05 *Radical Conflict* addresses conflict at interpersonal and communal legal and rhetorical ethno-political global and geopolitical levels The conflicts analyzed are radical because in each some intense and often prolonged violence takes place The chapters address different kinds of violence's physical and gratuitous structural and socio-economic legal and symbolic all with significant ill effects and injustices that spiral in all directions All share an interest in exploring imaginatively and speculatively what can be done to attenuate such cycles of violence The volume analyzes how recurrent narratives mythologies media-ted constructions and other discourses of liberal democratic and authoritarian states play a significant role in exacerbating or thwarting violence exposing escalating legitimizing rationalizing propagating but also possibly mitigating violence in all of its forms Each contributor provides a critical interpretation of the status of the conflict under inquiry including a teacher verbally abusing and ridiculing a student then exposing it in social media a community torn apart by environmental disaster the incommensurate but not incommensurable conflict between Israelis and Palestinians the Muslim Brotherhood and the militarized states of Egypt and Libya urban discourses in cyberspace among Moroccan and Maghreb youth that have become counter-signifying publics against oppression of the state the role of media and violence in Zimbabwe's political struggle the impact of the Circassian diaspora in global politics especially in the United States India's soft power approach to the Kashmir conflict as a way to capitalize on it through tourism the agonistic discourses that pervade the conflict over the Sahara and deprive Sahrawi people of rights and how the liberal state is implicated in the gratuitous violence of ISIL The volume also offers a section on the rhetoric of exclusionary laws associated with intractable conflicts of

the abortion conflict the right to die controversy and a Burkean perspective on violence in Bangladesh Contributors suggest what can be done conceptually and politically to mitigate and end violations of those who are most vulnerable banished forgotten damaged and often silenced Thinking Your Way to Freedom Susan T. Gardner,2009-01-16 This is a critical thinking textbook with a difference Rather than focusing exclusively on improving college students academic achievement Gardner seeks to change how students think through issues that are important in their lives beyond school **The Politics of Hate Speech Laws** Alexander Brown,Adriana Sinclair,2019-09-18 This book examines the complex relationship between politics and hate speech laws domestic and international How do political contexts shape understandings of what hate speech is and how to deal with it Why do particular states enact hate speech laws and then apply extend or reform them in the ways they do What part does hate speech play in international affairs Why do some but not all states negotiate agree and ratify international hate speech frameworks or instruments What are some of the best and worst political arguments for and against hate speech laws Do political figures have special moral duties to refrain from hate speech Should the use of hate speech by political figures be protected by parliamentary privilege Should this sort of hyperpolitical hate speech be subject to the laws of the land civil and criminal Or should it instead be handled by parliamentary codes of conduct and procedures or even by political parties themselves What should the codes of conduct look like Brown and Sinclair answer these important and overlooked questions on the politics of hate speech laws providing a substantial body of new evidence insights arguments theories and practical recommendations The primary focus is on the UK and the US but several other country contexts are also explored and compared in detail including Nigeria Kenya South Africa India China Japan Turkey Germany Hungary and Italy Methodologically the two authors draw on approaches and concepts from a range of academic disciplines including law and legal theory political theory applied ethics political science and sociology international relations theory and international law **Methods in Medical Ethics** Jeremy Sugarman,Daniel P. Sulmasy,2001 Twenty four American specialists provide descriptions of techniques critiques and notes on resources and training on a variety of methods used in medical ethics Individual chapters are devoted to each of 11 methods philosophy religion and theology professional codes legal methods casuistry history qualitative ethnographic quantitative surveys experimental methods and economics and decision science Discussion includes how these methods can relate to one another and how to assess the quality of scholarship in medical ethics in connection with such issues as physician assisted suicide euthanasia and medical genetics For scholars teachers editors and students in all disciplines contributing to the field c Book News Inc *The Oxford Handbook of Philosophy and Disability* Adam Cureton,David Wasserman,2020 This Handbook introduces philosophers as well as other scholars in the humanities and social sciences to one of the most dynamic new areas of philosophical inquiry Disability raises some of the deepest conceptual and normative issues about human embodiment and well being dignity respect justice and equality and personal and social identity But it also raises pressing practical questions for educational

health reproductive and technology policy and confronts controversial questions about the scope and direction of the human and civil rights movements The Handbook addresses these issues and more with contributions from some of the most prominent philosophers in the field The clarity it brings to these discussions demonstrates fully the continued centrality and importance of philosophical inquiry

Slippery Slope: Bestsellers in 2023 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous engrossing novels enthralling the hearts of readers worldwide. Lets delve into the realm of popular books, exploring the fascinating narratives that have captivated audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This heartfelt tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail. Slippery Slope : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Slippery Slope : Delia Owens "Where the Crawdads Sing" This captivating coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a exceptional and suspenseful novel that will keep you speculating until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
