The acid metabolism of certain succulent plants now known as Crassulacean Acid Metabolism CAM has fascinated plant physiologists and biochemists for the last one and a half centuries However since the basic discoveries of De Saussure in 1804 that stem joints of *Opuntia* were able to remove CO from the 2 atmosphere during the night and of Heyne in 1815 see Wolf 1960 that organic acids accumulate in the leaves of *Bryophyllum calycinum* during the night the two main aspects of CAM diurnal CO gas exchange and metabolism of malic acid 2 have first been studied nearly independently Hence it is not surprising that most research to elucidate the mechanism of CAM has been during the last 15 years since CO exchange and malate metabolism were studied and interpreted in its 2 context These efforts finally resulted in a clear realization that the CAM phenom enon is a variation on the mode of how plants can photosynthetically harvest CO from the atmosphere 2 The interpretation of CAM in this sense was stimulated by the discovery of another variant of photosynthesis the C pathway see Black 1973 Hatch and 4 Slack 1970 Hatch 1976 Because this newly discovered photosynthetic pathway is recognized to be very closely related to the CAM pathway the work on the latter became intensified during these last years *All about miniature plants and gardens indoors and out* Bernice Brilmayer,2023-07-10 In *All about miniature plants and gardens indoors and out* Bernice Brilmayer artfully delves into the enchanting realm of miniature gardening a field that skillfully marries horticultural expertise with artistic expression Through a blend of practical guidance and vivid imagery Brilmayer explores the diverse opportunities for cultivating miniature plants while addressing their varying growth needs and aesthetic potentials Her lyrical prose enriched with historical context and design philosophy encourages readers to engage with both indoor and outdoor spaces transforming them into lush compact enclaves of beauty that reflect personal creativity Brilmayer s extensive background in botany and landscape design informs her narrative underscoring her lifelong passion for miniature ecosystems Her dedication to sustainable gardening and her experience in educational workshops reveal an author deeply committed to making gardening accessible and enjoyable for all This book is
