## **The Concept Of Equality:**

The Concept of Equality in the Writings of Rousseau, Bentham, and Kant Alfred Tuttle Williams,1907      The Concept of Equality in Its Relation to a Principle of Political Obligation Frank Fritts,1915      **The Roots of Equality** Lantz Miller,2023-07-31 For centuries thinkers have grappled with the mystery of how humans first formulated the notion of equality The species is quite territorial and according to history has demonstrated a violent streak How could such a creature have developed the peaceful impulse to ensure everyone gets their fair share Some have surmised that equality was a last gasp measure the guarantee of peace to avert self annihilation However a closer examination of the phenomenon across the existence of Homo sapiens illuminates a naturalistic solution to the puzzle Lantz Miller traces the early advancements of our species to argue that rather than concocting equality to forestall self annihilation it was forged through a lived condition of freedom over hundreds of thousands of years Bringing together insights from both philosophy and anthropology **The Roots of Equality Anthropological and Normative Sources** investigates how our foraging ancestors came to thrive in egalitarian communities without sacrificing autonomy along the way      **The Concept of Equality in the Writings of Rousseau, Bentham, and Kant** Alfred Tuttle Williams,1972      **Equality and Non-Discrimination in the EU** Giovanni Zaccaroni,2021-02-26 Discussing the fundamental role played by equality and non discrimination in the EU legal order this insightful book explores the positive and negative elements that have contributed to the consolidation of the process of EU legal integration It provides an in depth analysis of the three key dimensions of equality in the EU equality as a value equality as a principle and equality as a right      **Equality in International Society** R. Hjorth,2014-11-18 The author re examines the concept of equality in international society past and present The view that equality necessarily flows from sovereignty is considered a contingent rather than a necessary contention A new framework for equality in international society is sketched out emphasising the normative strength of the principle of equality      **The Concept of Equality in Its Relation to a Principle of Political Obligation** Frank Fritts,1982      **The Concept of Equality** William T. Blackstone,1969      **Equality and Non-Discrimination under International Law** Stephanie Farrior,2017-07-05 The principles of equality and non discrimination lie at the heart of international human rights law They are the only human rights explicitly included in the UN Charter and they appear at the beginning of virtually every major human rights instrument This volume contains selected works by leading authors on the subject of equality and non discrimination under international law The selections are grouped into four sections The first presents essays that explore theoretical concepts of equality and non discrimination The next addresses the development of international legal standards on the subject The third presents articles analyzing how those standards have been interpreted and applied by UN and regional human rights bodies and the last contains works on what measures besides legal action States are to take to in order to achieve equality and non discrimination      **The Color of Equality** Devin J. Vartija,2021-08-06 The Enlightenment is often either praised as the wellspring of modern egalitarianism

or condemned as the cradle of scientific racism How should we make sense of this paradox The Color of Equality is the first book to investigate both the inclusive language of common humanity and the hierarchical language of race in Enlightenment thought seeking to understand how eighteenth century thinkers themselves made sense of these tensions Using three major Enlightenment encyclopedias from England France and Switzerland the book provides a rich contextualization of the conflicting ideas of equality and race in eighteenth century thought Enlightenment thinkers used physical features to categorize humanity into novel racial groups in a discourse that was imbued with Eurocentric aesthetic and moral judgments Simultaneously however these very same thinkers politicized equality by putting it to new uses such as a vitriolic denunciation of slavery and inhumane treatment that was grounded in the nascent philosophy of human rights Vartija contends that the tension between Enlightenment ideas of race and equality can best be explained by these thinkers attempt to provide a naturalistic account of humanity including both our physical and moral attributes Enlightenment racial classification fits into the novel inclusion of humanity in histories of nature while the search for the origins of morality in social experience alone lent equality a normative authority it had not previously possessed Eschewing straightforward approbation or blame of the Enlightenment The Color of Equality demonstrates that our present day thinking about human physical and cultural diversity continues to be deeply informed by an eighteenth century European intellectual revolution with global ramifications

*Education Reform and Social Class in Japan* Takehiko Kariya, 2012-12-12 Until the early 1990s Japanese education was widely commended for achieving outstanding outcomes in global comparison At the same time it was frequently criticized for failing to cultivate individuality and creativity in students Wide ranging education reforms were enacted during the 1990s to remedy these perceived failings However as this book argues the reforms produced a different outcome than intended contributing to growing disparity in learning motivation and educational aspiration of students from different class backgrounds instead Takehiko Kariya demonstrates by way of empirical sociological analysis that educational inequality in Japan has been expanding and that a new mechanism of educational selection has begun to operate which he calls the incentive divide Casting light on recent changes in Japanese society to critically reassess educational policy choices this book's quantitative and qualitative analyses of the mass education society in post war Japan offer important insights also for understanding similar problems faced in other parts of the world at present Translated into English for the first time the Japanese language version of Education Reform and Social Class in Japan won the first Osaragi Jir Prize for Commentary sponsored by the Asahi shinbun This book will be of interest to students and scholars in the fields of Asian studies Japanese studies education sociology and social
