**The Complete Book of Bicycle Commuting** John Stewart Allen,1981      *Living on Two Wheels - 2nd Edition* Dennis Coello,2010-11 Coello explains how the average family can live with no car He begins by explaining why bikes are designed differently for different uses and detailing how to choose one how to maintain it and how to tour and travel by bike

*Bicycles in American Highway Planning* Bruce D. Epperson,2014-11-17 The United States differs from other developed nations in the extent to which its national bicycle transportation policy relies on the use of unmodified roadways with cyclists obeying the same traffic regulations as motor vehicles This policy known as vehicular cycling evolved between 1969 when the 10 speed boom saw a sharp increase in adult bicycling and 1991 when the American Association of State Highway and Transportation Officials adopted an official policy that on road bikeways were not desirable This policy resulted from a growing realization by highway engineers and experienced club cyclists that they had parallel interests the cyclists preferred to ride on highways because most bikeways were not designed for high speeds and pack riding and the highway engineers did not want to divert funding from roadways to construct bikeways Using contemporary magazine articles government reports and archival material from industry lobbying groups and national cycling organizations this book tells the story of how America became a nation of bicyclists without bikeways      **Bicycling for Transportation** Melissa Bopp,Dangaia Sims,Daniel Piatkowski,2018-04-16 Bicycling for Transportation examines the individual and societal factors of active transportation and biking behavior The book uses an Interdisciplinary approach to provide a comprehensive overview of bicycling for transportation research It examines the variability in biking participation among different demographic groups and the multiple levels of influence on biking to better inform researchers and practitioners on the effective use of community resources programming and policymaking It is an ideal resource for public health professionals trying to encourage physical activity through biking In addition it makes the case for new infrastructure that supports these initiatives Provides evidence based insights on cost effective interventions for improving biking participation Includes numerous case studies and best practices that highlight multi level approaches in a variety of settings Explores individual and social factors related to biking behavior such as race gender and self efficacy      Bicycle Commuting Eva Heinen,2011 Cycling is cheaper healthier and in urban environments often faster than other modes of transport Nevertheless many individuals do not cycle even for short distances This publication aims to explain why commuters differ in their decisions as to whether or not to cycle Results indicate that the individual day to day choice to commute by bicycle is affected by personal attitudes towards cycling to work social norms the work situation weather conditions and trip characteristics In addition the book provides evidence that different groups of bicycle commuters exist non cyclists part time cyclists and full time cyclists The mode choice of individuals within these groups depends partly on a number of different factors Non cyclists seem not to cycle because they consider it impractical either due to the distance involved their need to transport goods the need for a car during office hours
