---

Edited by  
Christopher Clague

During the past decade, the East-West relationship has become a central theme in international relations. The Soviet Union's invasion of Czechoslovakia in 1968, the Sino-Soviet split, the Cuban missile crisis, the Vietnam war, and the Sino-American rapprochement have all contributed to a new awareness of the importance of the East-West relationship. The 1980s are expected to be a decade of continued change and development in this relationship. This book, edited by Christopher Clague, is a collection of essays that explore the prospects for the East-West relationship in the 1980s. The essays are written by leading experts in the field and provide a comprehensive overview of the current state of the relationship and the challenges it faces in the future. The book is divided into three main sections: the first section deals with the Soviet Union, the second with China, and the third with the United States. Each section contains several essays that examine different aspects of the relationship, such as trade, culture, and politics. The book is a valuable resource for anyone interested in international relations and the East-West relationship.
