Causes of War Stephen Van Evera, 2013-01-15 What causes war How can military conflicts best be prevented In this book Stephen Van Evera frames five conditions that increase the risk of interstate war false optimism about the likely outcome of a war a first strike advantage fluctuation in the relative power of states circumstances that allow nations to parlay one conquest into another and circumstances that make conquest easy According to Van Evera all but one of these conditions false optimism rarely occur today but policymakers often erroneously believe in their existence He argues that these misperceptions are responsible for many modern wars and explores both World Wars the Korean War and the 1967 Mideast War as test cases Finally he assesses the possibility of nuclear war by applying all five hypotheses to its potential onset Van Evera's book demonstrates that ideas from the Realist paradigm can offer strong explanations for international conflict and valuable prescriptions for its control

Entessar, 2023-05-26 First Published in 1992 Reconstruction and Regional Diplomacy in the Persian Gulf goes beyond a description of the recent events by analysing the social political and economic patterns of interaction between the Gulf states The argument is strengthened by a consideration of the role of the superpowers in the region s political discourse and of religion as a force for a change Not only do the authors provide an easily accessible basis for explaining the current problems in the region but they also offer their own sometimes provocative policy prescriptions This book is an important read for scholars and researchers of Middle East politics and Middle East history

BOOK JACKET

Of Fears and Foes Jose V. Cipurut, 2001-09-30 At the end of the deadliest century known to mankind the world still finds itself mired in bloodshed In addition to formal interstate conflict we see an increase in other forms of organized violence including ethnic warfare terrorism civil conflict and internationally necessitated police actions Cornered by these powerful global forces nation states continue their quest for security Theirs is a search plagued by futility since the very meaning of the word security is being eroded by the pace and tenor of change in an evolving international environment more complex and confusing than ever The explanatory power of traditional notions of international security which has provided a cornerstone for international relations theory as a whole seems increasingly inadequate in helping to understand the makings of global security A novel approach is needed one that integrates discerning insights from the study of language history geography religion economics and technology with more traditional understandings of the workings of power on an international level and on an intranational scale

Of Fears and Foes presents just this kind of innovative thinking by some of the most creative scholars working on these issues today Cipurut invites us to consider a fundamental reassessment of what constitutes security and insecurity in an emerging global environment

Beyond Progress Hugh De Santis, 1996-05-15 Argues that in a world of dwindling resources economic inequality and unremitting violence the belief in endless progress can no longer be sustained Asserts that we have arrived at a great historic divide in which the old modern order is giving way to an age of mutualism Draws on world history and the study of international relations to explore the emerging future in which new forms of social and political identity and regional associations and alignments will be needed to solve global problems Argues that mutualism will require a dramatical change in the way states international institutions corporations and local communities interact and that this transformation will be especially difficult for the United States
