The Courts, Social Science, and School Desegregation Betsy Levin, 2018-02-06 This book surveys the legal issues confronting courts as they decide school desegregation cases and the extent to which social science research has been brought to bear on those issues It examines the relationship between school segregation and residential segregation

School Desegregation in the 21st Century Christine H. Rossell, David J. Armor, Herbert J. Walberg, 2002-09-30 Leading scholars in the fields of history and law have assembled an enormous amount of empirical data on the outcomes of school desegregation and conclude that the policies of the past mandatory reassignment and strict racial quotas had too few benefits and too many costs to make them viable alternatives for the future Chapter topics include the history of school desegregation the development of the law the desegregation effectiveness of remedies ability grouping and classroom desegregation racial disparities in school discipline intergroup relations the attitudes and opinions of adults in desegregated school districts and the outlook for the future The authors conclude that one of the biggest successes of school desegregation is that there is almost universal acceptance of the principle that racial discrimination is immoral But school desegregation has had some important failures as well most importantly the failure to improve the academic achievement of black students and race relations between black and white students in desegregated schools There have also been some serious costs white flight and protest voting associated with forced busing and the use of strict racial quotas The concluding chapter argues that the solution to racial disparities in achievement and to racial separation lies in compensatory education for low achieving poor children and school choice programs that do not use racial criteria but provide financial assistance to low income families The Impact of School Desegregation Policies on White Public School Enrollment, 1968-1976 Franklin D.

Wilson, 1982 *The Science and Law of School Segregation and Diversity* Roger J. R. Levesque, 2018 The Science and Law of School Segregation and Diversity examines the sources of the disconnect between scientific findings on school segregation and how the U S legal system addresses it evaluates these sources empirical and legal foundations explains why they persist and reveals what can be done about them *School desegregation* United States. Resources in Education ,1985 Social Research in the Judicial Process Wallace D. Loh,1984-09-17 How to inform the judicial mind Justice Frankfurter remarked during the school desegregation cases is one of the most complicated problems Social research is a potential source of such information Indeed in the 1960s and 1970s with activist courts at the forefront of social reform the field of law and social science came of age But for all the recent activity and scholarship in this area few books have attempted to create an intellectual framework a systematic introduction to applied social legal research Social Research in the Judicial Process addresses this need for a broader picture Designed for use by both law students and social science students it constructs a conceptual bridge between social research the realm of social facts and judicial decision making the realm of social values Its unique casebook format weaves together judicial opinions empirical studies and original text It is a process oriented book that teaches skills and perspectives cultivating an informed sensitivity to the use and misuse of psychology social psychology and sociology in appellate and trial adjudication Among the social legal topics explored are school desegregation capital punishment jury impartiality and eyewitness identification This casebook is remarkable for its scope its accessibility and the intelligence of its conceptual integration It provides the kind of interdisciplinary teaching framework that should eventually help lawyers to make knowledgeable use of social research and social scientists to conduct useful research within a legally sophisticated context Understanding School Segregation Xavier Bonal,Cristián Bellei,2018-10-04 During recent decades social inequalities have increased in many urban spaces in the globalized world and education has not been immune to these tendencies Urban segregation migration movements and education policies themselves have produced an increasing process of school segregation between the most disadvantaged social groups and the middle classes Exploring school segregation patterns in Argentina Belgium Brazil Chile England France Peru Spain Sweden and the USA this volume provides an overview of the main characteristics and causes of school segregation as well as its consequences for issues such as education inequalities students performance social cohesion and intercultural contact The book is organized in three parts with Part 1 exploring the systemic dimensions of education inequalities that shape different patterns of school segregation and the extent to which public policies have addressed this challenge Part 2 focuses on the consequences of school segregation on student performance and other educational aspects and the Part 3 explores how school segregation dynamics are shaped by market forces and privatization of education Whilst focusing on different dimensions of school segregation each chapter explores the magnitude trends and consequences of school segregation providing readers with a comprehensive overview of the phenomenon and facilitating cross country comparisons Moreover the volume provides important evidence about the dynamics and characteristics of school segregation which is key for the planning and implementation of desegregation policies **School Segregation and Social Cohesion in Santiago** Andres Molina,2021-04-16 This book examines the consequences of educational segregation from the perspective of social cohesion It investigates the impact of separating students along socioeconomic lines on student attitudes dispositions and outlooks

considered important for social cohesion as well as on achievement opening the discussion about the social costs of school segregation The separation of students based on their social background is a common feature of schooling in many modern systems This is not only due to the influence of residential segregation but also to the effects of policies promoting educational privatisation parental choice and student academic selection By recognising the importance of schooling for citizenship and social integration the chapters in this book explore how the separation of students throughout their school lives can contribute to the division of citizens beyond school and how social segregation in school systems affect social cohesion more broadly By exploring the case of Santiago Chile the study is a timely contribution to the understanding of the roots of social division and the role that schools play in creating cohesive societies The originality of the approach and the evidence presented draw on implications that should be of interest to a wider audience concerned with contemporary discussions on solidarity and its erosion by educational segregation in urban environments *Encyclopedia of Education*
