Pienkos, 2008 *The Constitution of the United States* James Montgomery Beck, 1929 **Writings on American History**, 1928 **The Constitutional Review**, 1924 **The Bookman**, 1924 *Public Affairs Information Service Bulletin*, 1926 **The Jewish Tribune and Hebrew Standard**, 1924 **Public Opinion and the Teaching of History in the United States** Bessie Louise Pierce, 1926 History of the United States Asa Earl Martin, 1928 Contesting the Philippines Steven Rood, Veronica L Taylor, 2024-05-09 The Duterte administration 2016-22 marked the return of an authoritarian style of rule in the Philippines. It was also accompanied by an economic recovery that was better than many expected at least until the onset of the COVID-19 pandemic. Both during and following the Duterte period, the country was buffeted by a series of internal and external shocks that called into question the state's legal and social policy contract with its citizens. This period of contesting the Philippines was an intense normative and practical struggle to shape or reshape some of the Philippines' most critical institutions: the Constitution, the presidency, the Supreme Court, and the rule of law, the free press, regional autonomy, and independent regulatory institutions. These developments energized many domestic policy actors: technocrats, the business sector, civil society organizations, the police, and the military, armed groups, and religious leaders across the spectrum of Filipino politics. This volume considers some key sites of contestation between and among domestic policy actors, including the executive, during this eventful period for political and legal institutions in the Philippines. **National University Law Review**, 1926 *Weeding and Sowing* Hans Freudenthal, 1977-12-31 A title that sounds like poetry and a subtitle that seems to contradict the title. But the subtitle is right and originally it was just the title. A strange subtitle isn't it? Preface to a Science of Mathematical Education. All sciences in their prenatal stage have known this kind of literature only the term used was not Preface but for instance Prolegomena which means the same though it sounds less provisional. In fact such works were thicker than the present one by up to ten times. There is much more that can be said about a science before it comes into being than after with the first results comes modesty. This is the preface to a book that will never be written not by me nor by anybody else. Once a science of mathematical education exists it will get the preface it deserves. Nevertheless this preface or what for honesty's sake I have labelled so must fulfil a function: the function of accelerating the birth of a science of mathematical education which is seriously impeded by the unfounded view that such already exists. Against this view I have to argue: it rests on a wrong estimation both over and under estimation at the same time of what is to be considered as science. **Michigan State Bar Journal**, 1924 **American Bankers Association Journal**, 1925
