## **The Construction Of Space In Early China:**

**The Construction of Space in Early China** Mark Edward Lewis, 2012-02-01 This book examines the formation of the Chinese empire through its reorganization and reinterpretation of its basic spatial units the human body the household the city the region and the world The central theme of the book is the way all these forms of ordered space were reshaped by the project of unification and how at the same time that unification was constrained and limited by the necessary survival of the units on which it was based Consequently as Mark Edward Lewis shows each level of spatial organization could achieve order and meaning only within an encompassing superior whole the body within the household the household within the lineage and state the city within the region and the region within the world empire while each level still contained within itself the smaller units from which it was formed The unity that was the empire's highest goal avoided collapse back into the original chaos of nondistinction only by preserving within itself the very divisions on the basis of family or region that it claimed to transcend

happening in urban China This book is a critical review of existing urban China research which is found wanting due to the decontextualized use of theories and concepts developed in the West Urban China Reframed A Critical Appreciation consists of epistemological theoretical and methodological contributions to remedy these limitations by focusing on a number of relevant topics First models are widely employed in any study and China nowadays has invoked models like city system zones and global city in socio economic development How to interpret them in terms of knowledge production in a strong party state Second given the global prevalence of neoliberalism it is an important debate whether neoliberalism is applicable to China Third what is urban ideology in China How to contextualize it Are debates about the differentiation between the city and urbanization relevant to China Fourth massive rural urban migration in China has taken place within its mega rural urban dual system an institution that has persisted since the 1950s How does it manifest nowadays Fifth has the town country divide in China like in the West disappeared If not how can one interpret China s town country relations within the politics and administration of the Chinese state Sixth how to decipher the territorial development in the Pearl River Delta the world s factory under the auspices of the state The collection of essays in this volume contributes to the theoretical understanding of urban China The chapters in this book were originally published in the Eurasian Geography and Economics

**The Blue Frontier** Ronald C. Po, 2018-08-23 Argues that Qing China was not just a continental empire but a maritime power protecting its interests at sea **Communication and Cooperation in Early Imperial China** Charles Sanft, 2014-02-01 Challenges traditional views of the Qin dynasty as an oppressive regime by revealing cooperative aspects of its governance This revealing book challenges longstanding notions of the Qin dynasty China s first imperial dynasty 221 206 BCE The received history of the Qin dynasty and its founder is one of cruel tyranny with rule through fear and coercion Using a wealth of new information afforded by the expansion of Chinese archaeology in recent decades as well as traditional historical sources Charles Sanft concentrates on cooperative aspects of early imperial government especially on the communication necessary for government Sanft suggests that the Qin authorities sought cooperation from the populace with a publicity campaign in a wide variety of media from bronze and stone inscriptions to roads to the bureaucracy The book integrates theory from anthropology and economics with early Chinese philosophy and argues that modern social science and ancient thought agree that cooperation is necessary for all human societies Early Chinese Religion, Part One: Shang through Han (1250 BC-220 AD) (2 vols.) John Lagerwey, Marc Kalinowski, 2008-10-31 Together and for the first time in any language the 24 essays gathered in these volumes provide a composite picture of the history of religion in ancient China from the emergence of writing ca 1250 BC to the collapse of the first major imperial dynasty in 220 AD It is a multi faceted tale of changing gods and rituals that includes the emergence of a form of secular humanism that doubts the existence of the gods and the efficacy of ritual and of an imperial orthodoxy that founds its legitimacy on a distinction between licit and illicit sacrifices Written by specialists in a variety of disciplines the essays cover such subjects as divination and cosmology

exorcism and medicine ethics and self cultivation mythology taboos sacrifice shamanism burial practices iconography and political philosophy Produced under the aegis of the Centre de recherche sur les civilisations chinoise japonaise et tib taine UMR 8155 and the cole Pratique des Hautes tudes Paris Authorship and Cultural Identity in Early Greece and China Alexander Beecroft,2010-01-25 In this book Alexander Beecroft explores how the earliest poetry in Greece Homeric epic and lyric and China the Canon of Songs evolved from being local oral and anonymous to being textualised interpreted and circulated over increasingly wider areas Beecroft re examines representations of authorship as found in poetic biographies such as Lives of Homer and the Zuozhuan and in the works of other philosophical and historical authors like Plato Aristotle Herodotus Confucius and Sima Qian Many of these anecdotes and narratives have long been rejected as spurious or motivated by na ve biographical criticism Beecroft argues that these texts effectively negotiated the tensions between local and pan cultural audiences The figure of the author thus served as a catalyst to a sense of shared cultural identity in both the Greek and Chinese worlds It also facilitated the emergence of both cultures as the bases for cosmopolitan world orders

**The Early Chinese Empires** Mark Edward Lewis,2010-10-30 In 221 BC the First Emperor of Qin unified what would become the heart of a Chinese empire whose major features would endure for two millennia In the first of a six volume series on the history of imperial China Lewis highlights the key challenges facing court officials and scholars who set about governing an empire of such scale and diversity **The Shaman and the Heresiarch** Gopal Sukhu,2012-08-08 The Li sao also known as Encountering Sorrow attributed to the poet statesman Qu Yuan 4th 3rd century BCE is one of the cornerstones of the Chinese poetic tradition It has long been studied as China s first extended allegory in poetic form yet most scholars agree that there is very little in the two thousand year old tradition of commentary on it that convincingly explains its supernatural flights its complex floral imagery or the gender ambiguity of its primary poetic persona The Shaman and the Heresiarch is the first book length study of the Li sao in English offering new translations of both the Li sao and the Nine Songs The book traces the shortcomings of the earliest extant commentary on those texts that of Wang Yi back to the quasi divinatory methods of the highly politicized tradition of Chinese classical hermeneutics in general and the political machinations of a Han dynasty empress dowager in particular It also offers an entirely new interpretation of the Li sao one based not on Qu Yuan hagiography but on what late Warring States period artifacts and texts including recently unearthed texts teach us about the cultural context that produced the poem In that light we see in the Li sao not only a reflection of the era of the great classical Chinese philosophers but also the breakdown of the political religious order of the ancient state of Chu *Battlefronts Real and Imagined* D. Wyatt,2008-05-12 This collection examines the cultural and intellectual dimensions of war and its resolution between Han Chinese and the various ethnically dissimilar peoples surrounding them during the crucial middle period of Chinese history **A History of the World in 12 Maps** Jerry Brotton,2014-10-28 A New York Times Bestseller Maps allow the armchair traveler to roam the world the diplomat to argue his points the ruler to

administer his country the warrior to plan his campaigns and the propagandist to boost his cause rich and beautiful Wall Street Journal Throughout history maps have been fundamental in shaping our view of the world and our place in it But far from being purely scientific objects maps of the world are unavoidably ideological and subjective intimately bound up with the systems of power and authority of particular times and places Mapmakers do not simply represent the world they construct it out of the ideas of their age In this scintillating book Jerry Brotton examines the significance of 12 maps from the almost mystical representations of ancient history to the satellite derived imagery of today He vividly recreates the environments and circumstances in which each of the maps was made showing how each conveys a highly individual view of the world Brotton shows how each of his maps both influenced and reflected contemporary events and how by considering it in all its nuances and omissions we can better understand the world that produced it Although the way we map our surroundings is more precise than ever before Brotton argues that maps today are no more definitive or objective than they have ever been Readers of this beautifully illustrated and masterfully argued book will never look at a map in quite the same way again A fascinating and panoramic new history of the cartographer s art The Guardian The intellectual background to these images is conveyed with beguiling erudition There is nothing more subversive than a map The Spectator A mesmerizing and beautifully illustrated book The Telegraph

**State Power in Ancient China and Rome** Walter Scheidel, 2015 Two thousand years ago the Qin Han and Roman empires were the largest political entities of the ancient world developing simultaneously yet independently at opposite ends of Eurasia Although their territories constituted only a small percentage of the global land mass these two Eurasian polities controlled up to half of the world population and endured longer than most pre modern imperial states Similarly their eventual collapse occurred during the same time The parallel nature of the Qin Han and Roman empires has rarely been studied comparatively Yet here is a collection of pioneering case studies compiled by Walter Scheidel that sheds new light on the prominent aspects of imperial state formation This essential new volume builds on the foundation of Scheidel s Rome and China 2009 and opens up a comparative dialogue among distinguished scholars They provide unique insights into the complexities of imperial rule including the relationship between rulers and elite groups the funding of state agents the determinants of urban development and the rise of bureaucracies By bringing together experts in each civilization State Power in Ancient China and Rome provides a unique forum to explore social evolution helping us further understand government and power relations in the ancient world
