Skyscrapers of the Future Carlo Aiello, 2011-01-01 No other architectural genre captures our imagination and reflects our cultural and technological achievements like these towers that pierce the sky We start off with the history and evolution of building high from the Egyptian pyramids Gothic cathedrals and first American skyscrapers to the contemporary reality in Asia and the Middle East We present two fascinating interviews the first one with Carol Willis the founder and director of the Skyscraper Museum in New York City who explains the true genetics and economics behind the birth and future of the skyscraper The second one with Italian artist Giacomo Costa who shares his vision about the relationship between the natural environment human activity and supernatural reality with provocative images of an apocalyptic urban future Javier Quintana exposes the time gap between new architectural concepts and their built reality like Arne Høisek's City of the Future designed in 1928 and materialized in 1998 by Cesar Pelli as the Petronas Towers in Kuala Lumpur or Sergei Lopatin's 1925 idea for the Veshenka Tower in Moscow later observed as the Willis Tower former Sears Tower in Chicago in 1974 Another group of essays explore the global influence of Manhattan as a contemporary Babylon to be replicated across the world or the role of the Italian Futurists Japanese Metabolists and Archigram who influenced generations of architects and designers to push forward the concept of vertical living In the Opinion section you will find critiques on some of the latest

ideas for skyscraper design by some of the most forward looking architects like the concept of pixilated tectonics in Le Project Triangle in Paris by Herzog while Morphosis Architects explores new programs for vertical density with The Phare Tower Lastly Studio SHIFT masterfully integrates their Miya Tower in Sichuan China with the existing landscape Central to this book are thirty projects from eVolo's 2009 Skyscraper Competition which look into the future of the skyscraper with the use of new technologies programs and aesthetic expression Sustainability globalization flexibility and adaptability are just some of the multi layered elements explored by some the entries You will find examples of cities in the sky horizontal skyscrapers that link various cities or emergency architecture for disaster zones

The Story Behind Skyscrapers Sean Price, 2009-01-01 Examines the history of the world's tallest buildings including some of the challenges faced in design and construction and how their builders tested the limits of technology

The Skyscraper and the City Don LePan, 2025-09-18 The Skyscraper and the City brings together thirty years of the artist's watercolor images of cities LePan's work goes against the tradition of presenting skyscrapers with a hard and precise verticality the lines of these towers blur and bleed into each other into the sky and the natural world and often into the human life of the city In their sense of movement these watercolor images of bridges and baseball stadiums as well as of skyscrapers at times recall the work of John Marin while in their viewpoint they may bring to mind the bird's eye view city paintings of Oskar Kokoschka or John Hartman LePan's paintings have been exhibited only once in a solo show in Brooklyn in 2008 Commenting on that exhibition Hartman whose sweeping canvasses have been acclaimed world wide described these watercolor works as very good and together they form a coherent and focused body of work The Skyscraper and the City includes images from as far afield as Cape Town London and Sydney but the primary focus is on the North American city Calgary Chicago Los Angeles New Orleans New York and Vancouver are each the subject of numerous paintings in all over fifty cities are represented Substantial captions accompanying many of the images discuss the circumstances in which the work was painted various aesthetic issues and the architectural history of the buildings depicted An appendix includes examples of the artist's preliminary sketches and photographs In a brief introduction LePan discusses the history of skyscraper art the nature of watercolor as a medium and his own background as a watercolor painter
