All immigrants to America have a story with the American Dream a story sometimes intimately intertwined with personal dreams My story might be a surprising if not maybe an unexpected one diverging from the usual account of pitiful existence in Haiti's slums or that of struggle for adaptation to America's way of life by one of Haiti's boat people who landed on South Florida's coast It is a story that starts from the lower plains of the Artibonite Valley in Haiti with a dream from my great grandfather Joisil Estim and continues in the United States ultimately in Powell Ohio It is the story of a Haitian immigrant born in the small coastal town of Saint Marc Haiti It evolves with my experiences growing up in my native country where my formative years were influenced by a connection to a diverse sociocultural environment It progresses with my interaction with other societal enclaves in foreign lands like Germany and ultimately in the United States It is an account of dreams fulfilled or unfulfilled due not only to factors such as the convergence of different motivational agents dreambuilders the winds blowing on corporate America whether in Haiti or the United States but also to different conditions such as country of origin globalization social class and Afro ethnicity in America dreamkillers It is the story of coping with life changes of integration into the American mainstream of successes and disappointments of an immigrant from Haiti But it is more than the story of an immigrant it also reflects in a way the struggle of all immigrants coping with the pursuit of the American Dream and the quest for adaptation and continuous learning It relates to all those who have wrestled with their dreams those who have learned to make the best out of life's circumstances and keep a positive outlook in the era we live in Dreambuilders dreamkillers are in all walks of life **Going Home Through Seven Paths to Nowhere** Katalin G. The Baby Matrix Laura Carroll, 2012-05-17 In the movie The Matrix the character Morpheus offers two pills to Neo if he takes the blue pill he will go on with life as he has before believing what he has always believed If he takes the red pill he will find out what the matrix really is and many of his earlier beliefs will be shattered When it comes to taking a hard look at a specific set of beliefs about parenthood and reproduction that has driven our society for generations The Baby Matrix is the red pill The Baby Matrix looks at long held beliefs about parenthood and reproduction and unravels why we believe what we believe It lays out We commonly think our desire to have children boils down to our biological wiring but author Laura Carroll says it s much more than that Unlike other books on parenthood The Baby Matrix Why Freeing Our

Minds From Outmoded Thinking About Parenthood Reproduction Will Create a Better World takes a serious look at powerful social and cultural influences that drive the desire for the parenthood experience and lays out why we need to be very aware of these influences to make the most informed decisions about parenthood the historical origins of beliefs about parenthood and reproduction why many of these beliefs no longer work for society or were never true in the first place why we continue to believe them anyway the prices society pays as a result The Baby Matrix shows us how we got here brings to light what is true which includes knowing about the powerful influence of pronatalism and explains why society can no longer afford to leave pronatalism unquestioned This is not a book about convincing people not to have children says Carroll I want people to be very aware of the long held social and cultural pressures and be able to free themselves from those pressures when making parenthood choices This will result in more people making the best decisions for themselves will foster a society in which those who are best suited to become parents are the ones who have children and one that knows what it means to bring a child into the world today This book will make you examine your own intentions and beliefs will rile you and might just change your mind Whether you are already a parent want to become a parent are still making up your mind or know you don t want children you ll never think about parenthood in the same way The Baby Matrix is a must read for anyone interested in psychology sociology anthropology parenting issues environmentalism and social justice But most of all it s for anyone parent or not who reveres the truth and wants the best for themselves their families and our world **Horror**

The Cultural Life of Catastrophes and Crises Carsten Meiner, Kristin Veel, 2012-10-30

Catastrophes and crises are exceptions They are disruptions of order In various ways and to different degrees they change and subvert what we regard as normal They may occur on a personal level in the form of traumatic or stressful situations on a social level in the form of unstable political financial or religious situations or on a global level in the form of environmental states of emergency The main assumption in this book is that in contrast to the directness of any given catastrophe and its obvious physical economical and psychological consequences our understanding of catastrophes and crises is shaped by our cultural imagination No matter in which eruptive and traumatizing form we encounter them our collective repertoire of symbolic forms historical sensibilities modes of representation and patterns of imagination determine how we identify analyze and deal with catastrophes and crises This book presents a series of articles investigating how we address and interpret catastrophes and crises in film literature art and theory ranging from Voltaire s eighteenth century Europe haunted by revolutions and earthquakes to the 1994 genocide in Rwanda to the bleak prophetic landscapes of Cormac McCarthy

The Epic of America James Truslow Adams, 2017-09-29 There is a tradition of one volume narrative histories of the United States in which the political military diplomatic social and economic strands are skillfully interwoven Rather than add to these volumes The Epic of America paints a sweeping picture of the diverse past that has created America s national story In this important narrative James Truslow Adams reviews how the ordinary American has matured over time in outlook character and opinion Adams grew increasingly conscious of how different an American is now from the man or woman of any other advanced nation He is equally interested in the whole of American history how it began and what it represented in the first half of the twentieth century Adams traces the historical origins of the American concept of bigger and better attitudes toward business the American Dream and other characteristics generally considered typically American Ever since America became an independent nation each generation has seen an uprising of its citizens to save the American Dream from forces seeking to overwhelm and dispel it Possibly the greatest of these struggles is still ahead not a struggle of revolutionists against established order but of the ordinary person who seeks to hold fast to the rights of life liberty and the pursuit of happiness This classic book is valuable for a new age and as important for this new century as it was when originally written

Song of the North Country, David Pichaske, 2010-04-08. A remarkably fresh piece of Dylan scholarship focusing on the profound impact that his Midwestern roots have had on his songs, politics, and prophetic character. *Halloween*, Murray Leeder, 2015-02-17. The 1970s represented an unusually productive and innovative period for the horror film, and John Carpenter's *Halloween* (1978) is the film that capped that golden age, and some say ruined it by ushering in the era of the slasher film. Considered a paradigm of low-budget ingenuity, its story of a seemingly unremarkable middle-American town becoming the site of violence on October 31 struck a chord within audiences. The film became a surprise hit that gave rise to a lucrative franchise, and it remains a perennial favourite. Much of its success stems from the simple but strong constructions of its three central characters: brainy introverted teenager Laurie Strode, a late bloomer compared to her more outgoing friends; Dr. Loomis, the driven, obsessive psychiatrist; and Michael Myers, the inexplicable, ghostlike, masked killer. Film scholar Murray Leeder offers a bold and provocative study of Carpenter's film, which hopes to expose qualities that are sometime effaced by its sequels and remakes. It explores *Halloween* as an unexpected ghost film and examines such subjects as its construction of the teenager and the relationship of *Halloween* the film to *Halloween* the holiday, and Michael Myers's brand of pure evil. It is a fascinating read for scholars and fans alike.
